The gods in the cycle of the universe Big Crunch Reabsorption of the universe

- This is a tutorial resulting from a small project to find the place of the gods in the cycle of the universe.
- The goal is to allow all those who are disgusted by the religions of the gods, etc., to have another vision of the kingdoms closer to their time. Humans of the past had neither school nor scientific research to give them the details of the universe other than through little tales passed down orally from generation to generation. A molecule? A galaxy? A particle? Or quantum matter? How could we make them understand in their time? These tales make you laugh now, and you cannot find anything serious in matters of religion. But your culture is not that of past peoples; your customs and traditions are not theirs; your ways of life are not theirs; most of you don't even speak their language. It is not obligatory to make human sacrifices for the polytheists of all kingdoms. Some deities who received human sacrifices no longer function this way simply because their believers have gradually adopted another relationship. Those who regularly delve into the thoughts of the gods of the kingdom where they want to go after death (only 1 kingdom) for eternity or between 2 lives, those have a place in the kingdom. the engine is pious love (Gods of the offering of worship that we celebrate as the god of Sacrifice: The soldier shows sacrifice and dies to save his own, the soldier shows offering of worship and dies to save his own the meaning is not the same! and the word offering of worship does not have its place! it is therefore not the god of piety (of the offering of worship, of sacrifice) who is described here. certain to worship offer animals or other flowers and perfumes of incense, it is said that one must offer what one finds best form of materialization of your love for the divinity.

Let's Start to adore the creation of the universe 2nd Phase : phase creation of matériel and antimatériel with the Black Moon New Moon Old Moon the Lorddess Goddess Chandra Goddess Chandra is Brahman, is monoïst omniprésent omniscient omnipotent

Ganesha Son of Shiva and D'Uma was the joy of his mother as much by his beauty as by his vivacity of spirit, mother of whom he was very close and accomplice.

Shiva, gone to war when he returned to his palace, came face to face with the little one, but already a very strong son of Uma who blocked his way on the order of his mother stipulating that you will not let anyone in. .

Shiva arrived in front of Ganesh and the latter reacted as if he did not recognize his father forbidding him, the husband of Uma and the highest God of the kingdom (first to take place in Bindu to enter the apartments of his wife

Shiva not recognizing his son either, cut his head off.
 death Uma began to mourn the disappearance of Ganesha
 then Shiva resuscitates him and places an elephant head to replace the decapitated head and this is also the samsaric cycle of the cosmos the previous cosmos dies to be reborn but with it samsara Ganesha dies to be reborn always somewhat different there will be planets of galaxies but they will not be that of the previous one there will be creatures and kingdoms but they will not be that of the previous they will be new a little bit comparable to the transcendent Divien universal mother Praprakriti who change her head From Prakriti to Adi Prakriti on the moment of the end of the big rip and on the end of the resorption big crunch to reborn as bindu and expensing
 it's a little bit this magic that make Hiranayagarbha the Cosmic Lingam divine universal to dye on end of Big crunch in order to reborn as new bindu size in the direction of the expansion

and it is the parable of the 2 times born when from soul making its life you come to enter religion
 you were without discipline allowing to realize yourself an animal human being not yet completely human forgetting the Gods and the beauty of the universe of the cosmos and all that it contains. then you become a human being, of divine nature therefore knowing his nature Brahman better and recognition Brahman the nature omnipresent monoist omniscient omnipotent in all things

in the process of destruction and rebirth of the universe Brahma is the common divine nature that a great scientist described as "nothing is created, nothing is formed, nothing everything is transformed"

it is a definition of the common divine nature which manifests as the lord God Brahma thus the whole universe is but a form of this common reality of all things.

this form is destroyed by space-time compression under the effect of the cosmos which is reabsorbed like Vazuki the cosmic serpent devouring itself by its tail, Vazuki Ouroboros.

Brahma undergoes transformation there (reduction space time rebirth of galaxies and stellar systems with life ecosystem souls then the growth of destruction by fusion of galaxies until the final destruction in a hole of hypergravity then a runoff goes to the mouth of Ganga (who himself is a fraction of what the Brahma reality is who took shape from this aspect of the end of the previous cosmos then there is nothing then the cosmos emerges reborn in the state of Bindu towards a new Big Bang creator of matter particles antiparticles then molecular then towards the birth of stars planets and galaxies

The complete cycle of the universe repeats itself in this way and is a simple transformation of Brahma reality.

Let's celebrate the universe making the cosmos reborn as Bindu.

The common divine nature of the god Brahma is transformed into the quantum universe node by Ananta Shesha, the creator serpent, who thus gives reality to Paraprakriti and makes it the common divine nature of the god Brahma in this creative quantum node (the common divine nature is not very creative outside of a divine universal (universe quantum node). From this universe quantum node, a part of what is god Brahma in the universe is transformed into the cosmos.

Thus, at the end of reabsorption, Brahma/Sarasvati is both everything in the cosmos and everything in the universe.

They transform into the final destroyer and swallow what they are of matter in the cosmos, transforming into radiation, then what is of the final destroyer evaporates, transforming into radiation, which ends up being swallowed into what is of the final abyss, then there is no more cosmos and the Sarasvati oscillation at the level of what they are in the scalar field ceases. Sarasvati seems to have disappeared from the universe and the cosmos. What remains is what produces the quantum node, a part of what Brahma/Sarasvati are for the creator serpent Ananta Shesha in this quantum node universe. Shortly after, when there is nothing more visible where there was an entire cosmos, Sarasvati reappears in the Scalar field and Brahma/Sarasvati in addition to what they are in the form of scalar fields universe transforms into universal divine energy Mulaprakriti which causes a transformation of what Brahma/Sarasvati are of universe (Scalar fields Paraprakriti in configuration Adi Prakriti which transforms into Shoonya Bindu Prakriti a little of god Brahma/goddess SARASVATI in the form of universe in configuration era of planck phase big bang.

The Snake creator Ananta Shesha knots space time Kala Bhairava and his acting power Kalaratri he knots space with time and events as well as their organization in the volume space time and making them interact making Kala Bhairava and Kalaratri creator. Thus Kala bhairava and Kalaratri make the cosmos reborn in the Bindu state when the cosmos dies for lack of manifested matter remains the space of the quantum knot universe an aspect of space time when this space resumes the oscillation the universe passes into Bindu and the cosmic bubble is reborn the size of a Hot particle

Divine nature Parabrahman True reality Brahman uncreated independent consistent consistent, snake creator of Quantum realm Lord King of universe snake creator Ananta Shesha cosmic Snake manifestation of the cosmic force lord King of universe Vairaki, Great architect of the universe lord King of the universe Vishvakarma, independent Divine universal Mother Lordless Queen of the universe Pangaladi the universe all its cycle dance, Divine universal Mother of the Bindu the universe no movement photo only Lordless Queen of the universe Adi-Prakriti, Divine universal mother Bindu Lordless Queen of universe Shesha the universe no solidly placed, line of the universe, Divine universal mother no movement Lordless Queen of universe Padma the universe no separation only 1 Divine universal energy Lordless Queen of universe bindu space of universe Mahapadma the nuclear energy field universe Cosmic Lingam Divine universal Lord King of universe Hare jagadish, Cosmic lord divine universal Lord King of universe Pantha coincidence center of the 3 world Lord of the 3 worlds god Shiva and lordless of the 3 worlds goddess Parashakti, Coincidence destiny of the 3 worlds Lord of the 3 worlds God Padma and Lordless goddess of the 3 worlds goddess Kadi, Chief of Brahman King and queen of Gods and Goddesses Lord King God Indra and lordless queen Goddess Indrani.

The Snake Creator Ananta Shesha knots the emptiness Shraddha and the opulence, her husband, and makes them interact, making them creators. Thus, from Shraddha, emptiness, and from her husband, opulence, the cosmos is reborn in the Bindu state.

At the end of the previous universe, after the destruction of all matter and the cosmic bubble, the cosmos is dead, but the universe remains: the quantum universe knot Paraprakriti, which is the smallest volume of Adi Prakriti. It is a space, a void, in which Ananta Shesha knots himself, creating the universe (the scalar field). Scalar activity ceases. There is no longer any oscillation or divine universal energy, but in this Emptiness (Shraddha), the scalar field remains, although inactive. Ananta Shesha is indeed there. So when the snake creator Ananta Shesha resumes activity In the quantum node universe he creates an opulence (husband of Shraddha) of fluctuation of the quantum void. Thus making Shraddha and her husband reborn the cosmos in the Bindu state universe

Let's celebrate the parity of Emptiness: Goddess Shraddha and her husband, opulence/promiscuity. It is by their nature that the serpent creator Ananta Shesha obtains the rebirth of the cosmos in the Bindu universe.

The quantum knot of the universe is a small zone of infinity in which infinity is knotted, producing Emptiness and opulence, a zone of low density at night (Goddess Ratri) or high density (Darkness) (God Vibhu). Thus, when there is no more cosmos at all in the universe, there remains Emptiness and non-emptiness (Opulence Promiscuity), with higher density (Darkness Vibhu) or lower density (Darkness Ratri) at night. This is what is represented by a 3D cube made of rows of nodes or balls which represent the quantum node universe Paraprakriti set of mesh of Ananta Shesha without this zone of infinity when the cosmos dies at the end of the big crunch this cube stops oscillating then shortly after the oscillation goddess Sarasvati resumes and the cosmos is reborn in Bindu universe. Where does it come from that the void oscillates fluctuates it is the game of Ananta shesha between emptiness and Opulence it creates in the emptiness zones of opulence then the opulence becomes emptiness and emptiness opulence it is then the vibration Sarasvati in this game of quantum fluctuation of the void zones oscillate and become very dense they become darkness Vibhu other oscillates and become less dense they become the night Ratri.

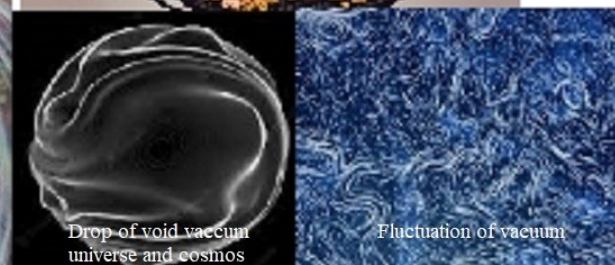

During the Planck Era, the universe is in Bundu configuration. Paraprakriti is Shoonya Bindu. The universe is the divine universal aspect. Both Hiranyargarbha and Purusha have Paraprakriti as their divine universal aspect. When Paraprakriti is Shoonya Bindu, they have Shoonya Bindu as their divine universal aspect.

In the volume of the universe and cosmos, Hiranyargarbha contemplates Purusha, which is transformed into Hiranyargarbha. And it is Hiranyargarbha that we look at, but thanks to Purusha, we dissociate what does not move from what does. The volume of Hiranyargarbha is then the size of a particle. In which the Sarasvati oscillation begins to activate again. The universal divine energy Mulaprakriti reappeared in Hiranyargarbha and a part of it transforms what we want into Purusha. Emptiness and opulence are first of all what is transformed; it produces the fluctuations of the Void which are due to the emptiness and opulence that Ananta Shesha creates in the void.

This rebirths Mulaprakriti which is a bit of Hiranyargarbha which transforms into Mulaprakriti so we see it in Purusha inside Hiranyargarbha. Purusha is first of all the scalar oscillation due to the fluctuations of the void and transforms into the energy of the Mulaprakriti scalar field.

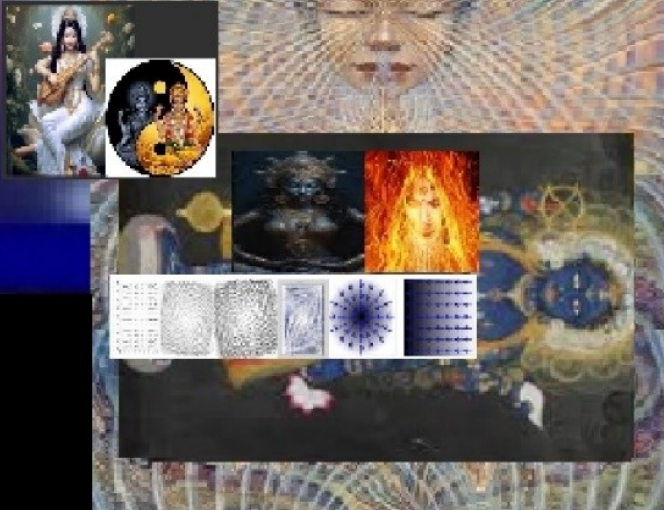

Let's celebrate love lord god Kama. Love reborn inside the cosmic Lingam divine universal Hiranyargarbha when his divine universal aspect is Shoonya divine universal bindu: the oscillation reborn inside the scalar field universe Shoonya from fluctuation of vacuum void the vacuity Lorddess goddess Shraddha of the quantum node universe welcome the opulence Shraddha's husband who take shape abundance of vacuum fluctuation. And Love reborn from them from Shraddha and her husband the god of opulence. Kama manages the peace between emptiness and opulence opulence plunges into emptiness which moves elsewhere in order to offer space to opulence it is a dance of love interaction between emptiness and opulence. their dance is set to the oscillation everything is then unified everything oscillates with the same quantum oscillation the temperature increases and rises to 10^{32} Kelvin there is neither matter antimatter nor basic interaction.

Kama and Rati reborning inside the Bindu from Vacuity goddess Shraddha and her husband the opulence
Of god Brahma shape Vacuity and the other Shape opulence. Kama and Rati are a fraction of God Brahma
and shape agissant power of love

Let's contemplate the Divine Universal and Cosmic during the rebirth process of the cosmos in Bindu Universe.

During the rebirth phase, what we call the Planck Era, the universe is in Bindu configuration. Paraprakriti is Shoonya Bindu. The universe is the divine universal aspect. Both Hiranyagarbha and Purusha have Paraprakriti as their divine universal aspect. When Paraprakriti is Shoonya Bindu, they have Shoonya Bindu as their divine universal aspect.

In the volume of the universe and cosmos, Hiranyargarba contemplates Purusha, which is transformed into Hiranyargarba. And it is Hiranyargarba that we look at, but thanks to Purusha, we dissociate what does not move from what does. The volume of Hiranyargarba is then the size of a particle. In which the Sarasvati oscillation begins to activate again. The universal divine energy Mulaprakriti reappeared in Hiranyargarba and a part of it transforms what we want into Purusha. Emptiness and opulence are first of all what is transformed. It produces the fluctuations of the Void which are due to the emptiness and opulence that Ananta Shesha creates in the void.

Certain areas become denser because they are more strongly opulent, this gives rise to the darkness Vibhu which is reborn in the universe and the less dense areas are the night Ratri.

Sarsvati reborn in Adi Prakriti which turn Paraprakriti from Adi-Prakriti to Shoonya Bindu Sarasvati make reborn the opulenc, Shraddha's husband who takes form of fluctuation of vacuum opulence. This ake reborn the Divine universal energy Mulaprakriti with the night lordless goddess Ratri and darkness inside Shonnya Bindu and Mulaprakriti the interaction between Night and Darkness make born Calor inside darkness Vibhu this calor is Agni son of darkness and night but also son of divine universal energy Mulaprakriti, and son of Brahma and Sarasvati. Agni reaches its higher temperature of all the universe cycle 10^{32} Kelvin.

Agni is the heat element is not Atri and Anasuya's son, Atri cool down Agni's temperature. At the end of Bindu and thus allows entry into the phase of creation of matter and antimatter.

The population of beings growing in the waters above Ganga as in the waters above Shantanu is the fruit of the forces of vitality of combativeness Skanda Kartikeya which takes expression through fertility Mariaman it is also for this reason that Ganesha is in the universe from the bindu, although death does not yet exist in the universe, samsara Ganesha exists as soon as there is birth again (lordless goddess Santana) but this increase in population of the universe leads to a consequence: the emptiness decreases in relation to the opulence which increases and from the top of the firmament Indra the king of the gods pray so that Shiva gives birth to a principle capable of deconfining the universe the gods pray in the cycle of the universe and this is the diu Tyaga god of the offering of worship and piety. Tyaga makes the links between the gods through their prayer Indra prays in order to deploy the potential necessary for the rebirth of space time and Shiva prays to know in which direction to work Shiva therefore creates intelligence in charge of the deconfinement of the universe and Rudra is born from the waters below Shantanu.

The population of non-atman (non-soul) creatures is increasing in the waters of the universe of Shantanu and Ganga. This is due to the fertility of the waters of the universe, which makes Goddess Santana very active. In Ganga, these are populations of quantum matter beings, while in the waters below, they are omniscient beings, a principle governing the mechanisms of the universe. The mission of love, Kama Rati, Kamakhya and Tyaga, becomes more and more difficult and then reaches its limit.

Kama and Rati, love and its active power are in charge of maintaining happiness in the universe. But in the beginning, there were only the waters. Now, there are many different people. So, Ganga could say to herself, "I am all the waters above, everything they contain." But now, there is an ego. Each particle of quantum matter answers her, "No, you are not me," yet each of these particles is a little bit of Ganga in the form of particles that it is, and the same goes for Shantanu who could say to himself I am all the waters below and what is there but now gods goddesses answer him no you are not me reconciling the 2 becomes impossible while the population prays (Tyaga) so that space is created the waters Ganga and Shantanu they can no longer support this population and want them dead the desire Kamakhya he too is no longer able to satisfy everyone because now there are people who want things incompatible with the desire of others Love Kama reaches its limit and turns towards the creative omniscience of the 3 worlds which gives birth to all these beings it comes to him as for the end of a cycle saying clearly you created me for a mission and now this mission can no longer be accomplished. Shiva then transmutes Kama to adapt it to a process of deconfinement. This is the parable of Shiva, who, with his third eye, burns Kama and remakes him with a body of ash. Kama is thus restructured to work with Rudra. Shiva knows at this instant that he is creating what will put an end to his role as the highest in the Bindu phase.

Kama Rati Kamakhya Tyaga thus passes into the service of Rudra, which means that it is the prayers (Tyaga) to deconfinement who will have power.

Shiva the lord manifestation of the creative omniscience of the 3 worlds in full work to maintain the Bindu transmutes the love the lord God Kama after this one attacked him. indeed the bindu is reborn and love is reborn from the polarity Empty and full in the common divine nature Brahma but at the start the bindu is sparsely populated, the Gods are not reborn but in their work to give back to the universe all its potential Shiva and Uma revive the Gods and many other principles that come to populate the Bindu then the waters above Ganga and the waters below Shantanu in which Shiva and Uma refound the omniscience of the Gods complains he feels their unity weakening individuals are born and unity becomes more difficult Kama the god of love and his companion rati his acting power work essentially for unity so that all may be one but there are more and more individuals it becomes incompatible with the development of all he therefore attacks Shiva who 'destroys him and transmutes his parity in order to allow a deconfinement which will authorize the development of each thing that scares Ganga and Shnatanu because it is their power that will be divided in a multitude. Kama is remade from her resuscitated ashes which gives birth to an unidentified Goddess principle of discord which breaks the unity of interactions into a superforce. immediately in the superforce appears Kamakhyia the desire which gives gravity the desire to exist by itself. Gravity the Lord God Sanata Kumara is reborn in the cosmos and Rudra can finally act and operate the deconfinement of the cosmos

At the end of the Bindu phase (planck era) Shiva and Uma-Shakti reborn Maharishi in order to have a tool to rebirth the interactions they modified the state of knowledge in the waters below Shantanu modifying the architecture of the universe Bindu Vishvakarman in Shoonya Prakriti Bindu. Maharishi reborn Gravity Sanata Kumara in the waters below lord god Shantanu finishing unbalancing the order lord god Dharma. And Gravity directly affects the quantum matter Bhumi in the waters above lordess goddess Ganga in which firmament Indra took refuge after the destruction of the previous cosmos. Indra influences the mass of matter and thus brings down the waters from above Ganga to the level of the waters below Shantanu creating the mixed waters at the level of the cosmic bubble (the cosmos) in doing so Indra deploys the potential necessary to move into the phase of creation of matter in the expansive universe we therefore leave the stability of the Bindu to enter into expansion this also destroys the unity in the Sarasvati oscillation of the scalar field Paraprakriti-Shoonya the oscillation until then unified sees the gravity Sanata Kumare desynchronize leading the forces of Vitality of combativeness Kartikeya and Valli to cause oscillation which comes to thwart the unity creating a form of disorder the energy of the scalar field universe Shoonya-Prakriti, Mylaprakriti therefore begins to produce distortions in relation to the unity and these increase in quantity the order Lord god Dharma is sufficiently unbalanced to no longer be able to return to the balance of the bindu

It celebrates the birth of Airavata, Indra's Elephant, expression of the power of influence over mass of matter. Shiva rebuilds the omniscience of gravity (Sananta Kumara) in the water below. Lord God Shantanu and Maharishi make Sanata Kumara reborn from the firmament of waters above Ganga. Indra unfolds the potentialities of the universe. The waters above Ganga descend to the level of the waters below Shantanu. Ganga is said to have fallen on Shiva's head, which was in the waters below Shantanu. It is Airavata, Indra's elephant, that we see acting. He is the expression of the power of influence over mass of matter. He influences Bhumi, the quantum matter in the waters above Ganga, and succeeds in bringing them down to the level of the waters below Shantanu.

Let's celebrate the Prosperity Lord God Kubera and the wealth lordless goddess Ashtalakshmi, on Big Bang.

During the Bindu phase, there is a time of rebirth of the parity principle and the main gods functioning of the Bindu universe. Then Kubera appears and begins to spread, but at the end of the Bindu phase, Kubera's prosperity declines, yet new wealth is created in the form of Maharishi rebirthing Sanata Kumara, gravity, but this ends up unbalancing the Prosperity already begun by the promiscuity and overpopulation of the gods which produces an executive confinement. With the birth of sanat Kumara the force of vitality lord god Kartikeya and lordless goddess Valli then unified with the oscillation universe desynchronizes from it which creates a distortion and generates Tvashtar another wealth the quantum matter then begins to accrete and take form of Spin particles new wealth, new form of more Asthalaksmi but prosperity is no longer there it has lost balance 2 new factors have entered the scene Nirra old age and Yama death the creatures spin particles and antiparticles which are born live first of all a short time Kubera without longevity is not in balance

Divine nature Parabrahman True reality Brahman monist omnipresent omniscient omnipotent, snake creator of Quantic noed Lord king of création Ananta Shesha, cosmic Snake Lord King of Creation Varaki, Architect of the création Lord king of the création Vishvakarmā, transcendant Divine universal Mother Lordness Queen of the création Dēvi, Divine universal Mother on resorption of the Bindu Lordness Queen of the création Adī-Prakriti, Divine universal mother Bindu Lordness Queen of création Shonya, Divine universal mother on expansion Lordness Queen of création Prakriti, Divine universal energy Lordness Queen of création lordness queen of universe Mulaprakriti, Cosmic Lingam Divine universal Lord King of création Hyānyargarba, Cosmic Lord Divine universal Lord King of création Puruṣa omniscience creator of the 3 world Lord god Shiva, Omniscience destroyer of the 3 worlds Lord God Rudra, Chief of Heavens King and queen of Gods and Goddesses Lord God Indra and lordness Goddess Indrani.

Celebrate the process big bang creator of the universe with the moon, dark moon as New moon lordness goddess Chandra, on bindu Phase just before the starting of the process creator. New moon symbolize the getting out from bindu phase and the starting up of the phase of creation of matter and antimatter. Lord gods Trine murti Datattreya is Rudra Yajna and Brahman as one single lord and his agissant power Lordness Tridevi Durga is Kali, Lakshmi-Shri and Sarasvati Vak they both of them trine lord and lordness work hard for the deconfinement of the universe and come out Lord god Maharishi who succeed to Break down the Supraforce interaction unified, consequently just after the King of Gods and goddesses waiting for his rebirth from the firmament succeed finally to it descends the waters above Lordness Goddess Ganga to the level of the waters below lord god Shantanyu thus creating the mixed waters essential to the birth of all matter. the story says that it fell in the hair of Shiva the lord manifestation of the omniscience creator of the 3 worlds occupying in the waters below to recast the omniscience of the Gods to make them reborn. the consequence is felt the forces of vitality of combativity Kartikeya are reborn and bring back the creative accresion Lord god Tvashtri the oscillation of the scalar chamos universe Mulaprakriti is activated leaving the synchronization, the unity and the accresion begins at the level of the quantum matter Lordness goddess Bhumi before the first particles and antiparticles are born it is around the accresion that the entire creative process of matter and antimatter will be built. This is why while Shiva, the creative omniscience, was the very high principle in the bindu phase, Tvashtri is the very high of the phase creation of matter and antimatter.

Varuna Varuni with the moon

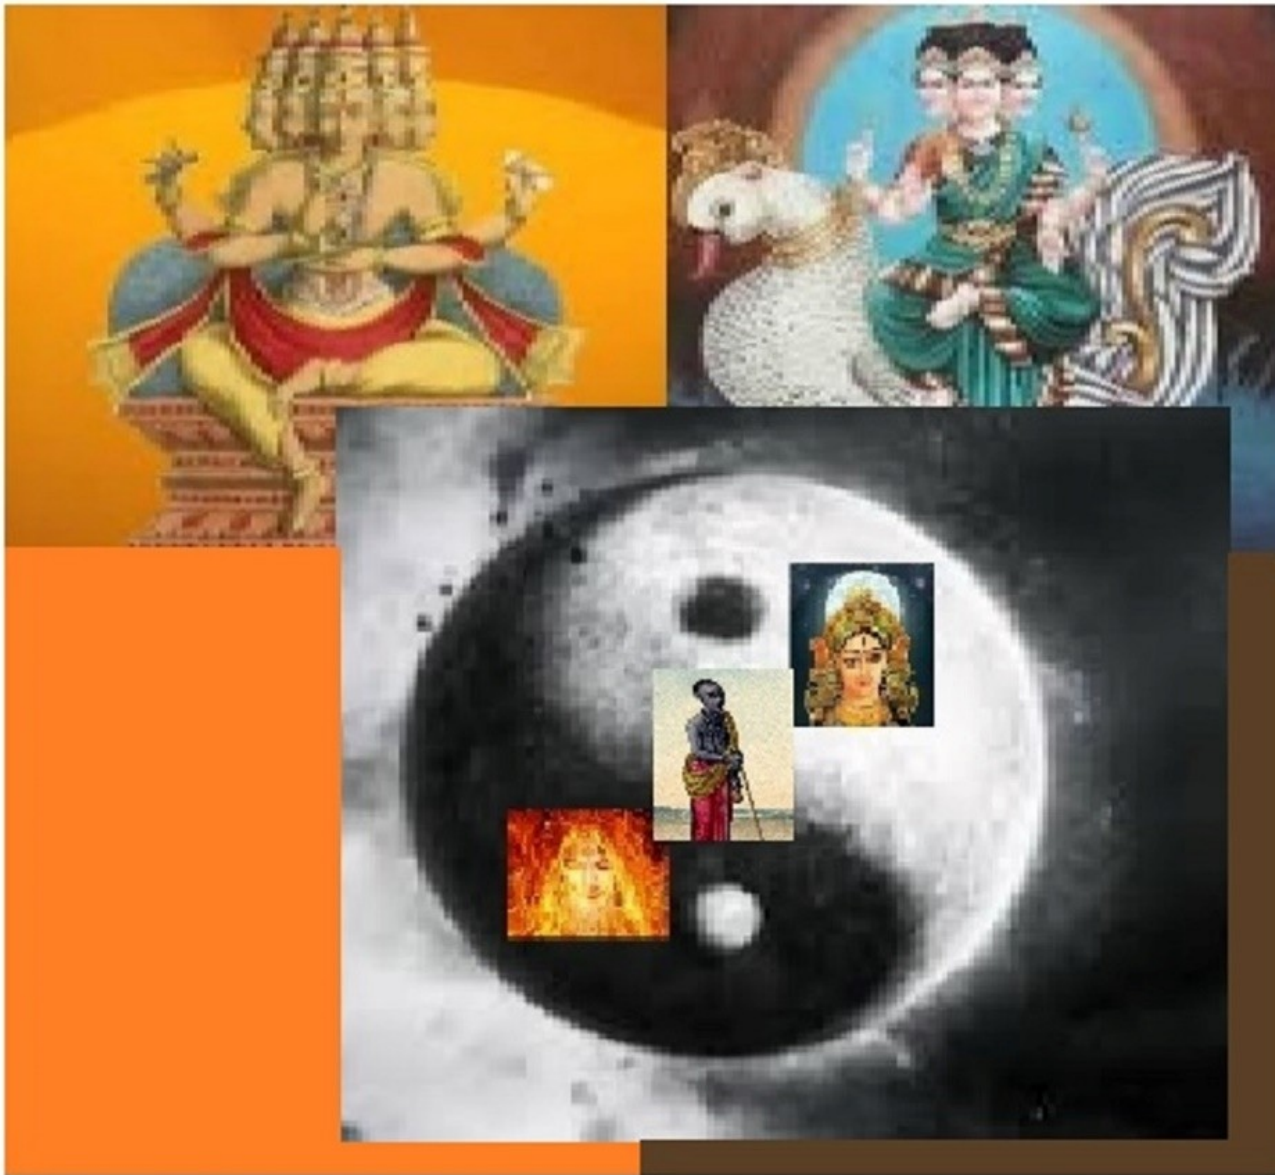

The abundance vera laksmi is increasing with the phases of creation and decrease during the ahinilation and recombination phases

Thus the quarks and the lepton emerge and grow in quantity it is Rahu Lakshmi who emerge from Goddess Chandra New Moon Lakshmi who reaches his climax by a maximum quantity of quarks (and antiquarks) in God Chandra Full Moon LAKSMI then this abundance decreases Essentially by recombination and anihilations is Ketu Decreasing moon lakshmi

thus comes by recombination the Hadrons and the fermions they are born and because it is made of quarks the quantity of quark alone decreases the ahinilation quother ant quarks and no longer finish having quarks or antiquarks alone for them the decay of their Abundance Ketu Lakshmi to the only state until Goddess black moon goddess who expresses end of cycle More quarks lakshmi quark disappears giving way to Lakshmi Hadron Fermion and Lepton

Then this emergence is Goddess Chandra New Moon Lakshmi becoming Rahu Increasing Moon Lakshmi then reached are apoged in God Chandra Full Moon Lakshmi then this one falls by the process of ahinilation (there is not yet a decombination which gives birth to the Molecules God Vidhi) but e 'Is Ketu lakshmi until their quantity stabilizes at the end of Hadron-Antihadron Goddess Chandra Old Moon LAKSHMI who ends in Goddess Chandra Black Moon Lakshmi who is the end of the cycle and waiting for a new cycle This time either with Varuna and Varuni but with Viddhi then Ankariksa and Dhatri

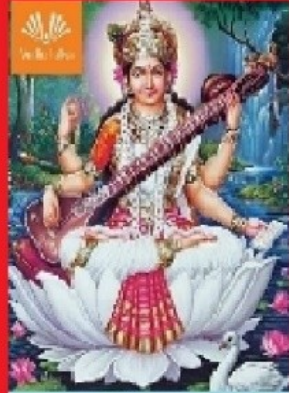

Veera Lakshmi is the Global Abundance actif in this phase and she is made of cycles of increasing and cycles of decreasing starting and ending together inside of her reality this Abundance participate to the process creator she's agissante power

Celebrate the Lord God Dharma he is the manifestation of the Hindu kingdoms of laws and mechanisms that rule the universe.

he feeds on the Lordless Goddess Dhyama Lakshmi wisdom knowledge manifested as goddess Lordless level of holiness

Dharma feeds on Vidhya because the rules depend on what is and not on what is not when a Data which was not come to be it finds its place its balance in relation to what already existed and regulates them must then integrate it to function properly so before gravity is reborn there is none and therefore the universe does not work according to gravity but when gravity is reborn then Dharma the laws and mechanism of the universe 1 integrates with all the changes it implies and the cosmos expands the same when the strong interaction is reborn as well as when the electromagnetic and weak nuclear are reborn each of the 4 represents Data in the sense of knowledge which is involved in it this aspect of them is Vidhya and when Vidhya changes in the universe Dharma follows it the high temperature (the Lord God Agni) will thus modulate from a highest zenith to a cold marking the absence of agni at the Big Rip and this temperature involves data of knowledge which modifies the temperature rules of the bindu no mechanism to create or destroy matter no other matter than Quantic the Holy Lordless Goddess Bhumi when the temperature begins to drop authorized creation process, but no mechanism possible to make molecules. At the start the interactions dissociate and there are spin particles and antiparticles of matter but their lifespan is short (when they are not annihilated by their opposite matter antimatter) this longevity will increase and that is why the particles will change to give Quarks lepton ...

this longevity is the Lord God Dhanvantari who is the Grace

it evolves because Dhanvantari will manage to put more water of life (Amritaà in each particle and antiparticles and this is an expression Mechanism of Dharma in this phase of the Big bang which evolves according to Vidhya the data the raw knowledge that integrates the increasing aptitude of Dhanvantari. as of Bhumi matter Quantic one will pass to Kamadhenu matter Particles and antiparticles but because the knowledge registers a temperature Agni too high there is no mechanism to create molecules before the temperature does not fall again

When Shiva and Uma-Shakti create Maharishi transforming a little of the common divine nature god Brahma into a tool capable of breaking the superforce to rebirth the interactions the knowledge lordless goddess Vidhya changes in the architecture of the universe Visvakarman who integrates this new potentiality inside of Paraprakriti/Shoonya-Prakriti Shoonya changes and the omniscience destroyer of the worlds lord of the worlds god Rudra the destructive intelligence of the worlds in charge of the deconfinement of the universe realizes that a new principle is born and that this is a tool that can help him finally get out of the confinement of the Bindu. He takes the lead and sends Kali, his destructive power of the worlds, to begin the process of getting out of the bindu by deconfinement, so she begins her work which will bring the universe PARaprakriti to pass from Shoonya-Prakriti to Prakriti and therefore to bring the universe to change from the very high god (central axis around which the phases are organized) to the Bindu it was Shiva but we leave the Bindu, Kali therefore begins to depose Shiva from the charge of the very high of the gods

célébrez le seigneur Dieu Tvashtre le Dieu de manifestation du ghana de l'accésion creatrice

il modèle les forme de la matière dans l'univers durant to le cycle du cosmos qui naît croît big rip et resob par un big crunch pour renaître après une final destruction dans l'univers.

le seigneur Dieu Tvashtre renaît avec la séparation des interaction unifiées durant la phase Bindu la gravité Quitte l'unification appelé supraforce et semble émerger ou naître dans le cosmos et Tvashtre se met alors à agir au service du createur de toute la matière et l'antimatière de l'univers cela crée une activité plus violente du champs scalaire et le Cosmos de Bindu se dilate puis s'expense avec la séparation des autre interaction la matière se crée à partir de rien. Il transforme la matière Quantic (matière Scalaire énergy) en matière et antimatière énoncé car c'est de l'accrétion de matière quantic qui crée la matière matière

Celebrate the king and queen of the universe they are more than gods or goddesses. The Gods and Goddesses live and evolve in the universe and the cosmos while the king and queen of the universe are the universe and/or the cosmos or even the cue that gives it reality.

It is in the universe and the cosmos that we all live.

the universal divine cosmic lingam Hiranayargarba like the universal divine cosmic Ghana vitalizer of the cosmos Purusha are both the cosmos and the universe but to show the universe in these different phases they are always accompanied by a universal divine mother.

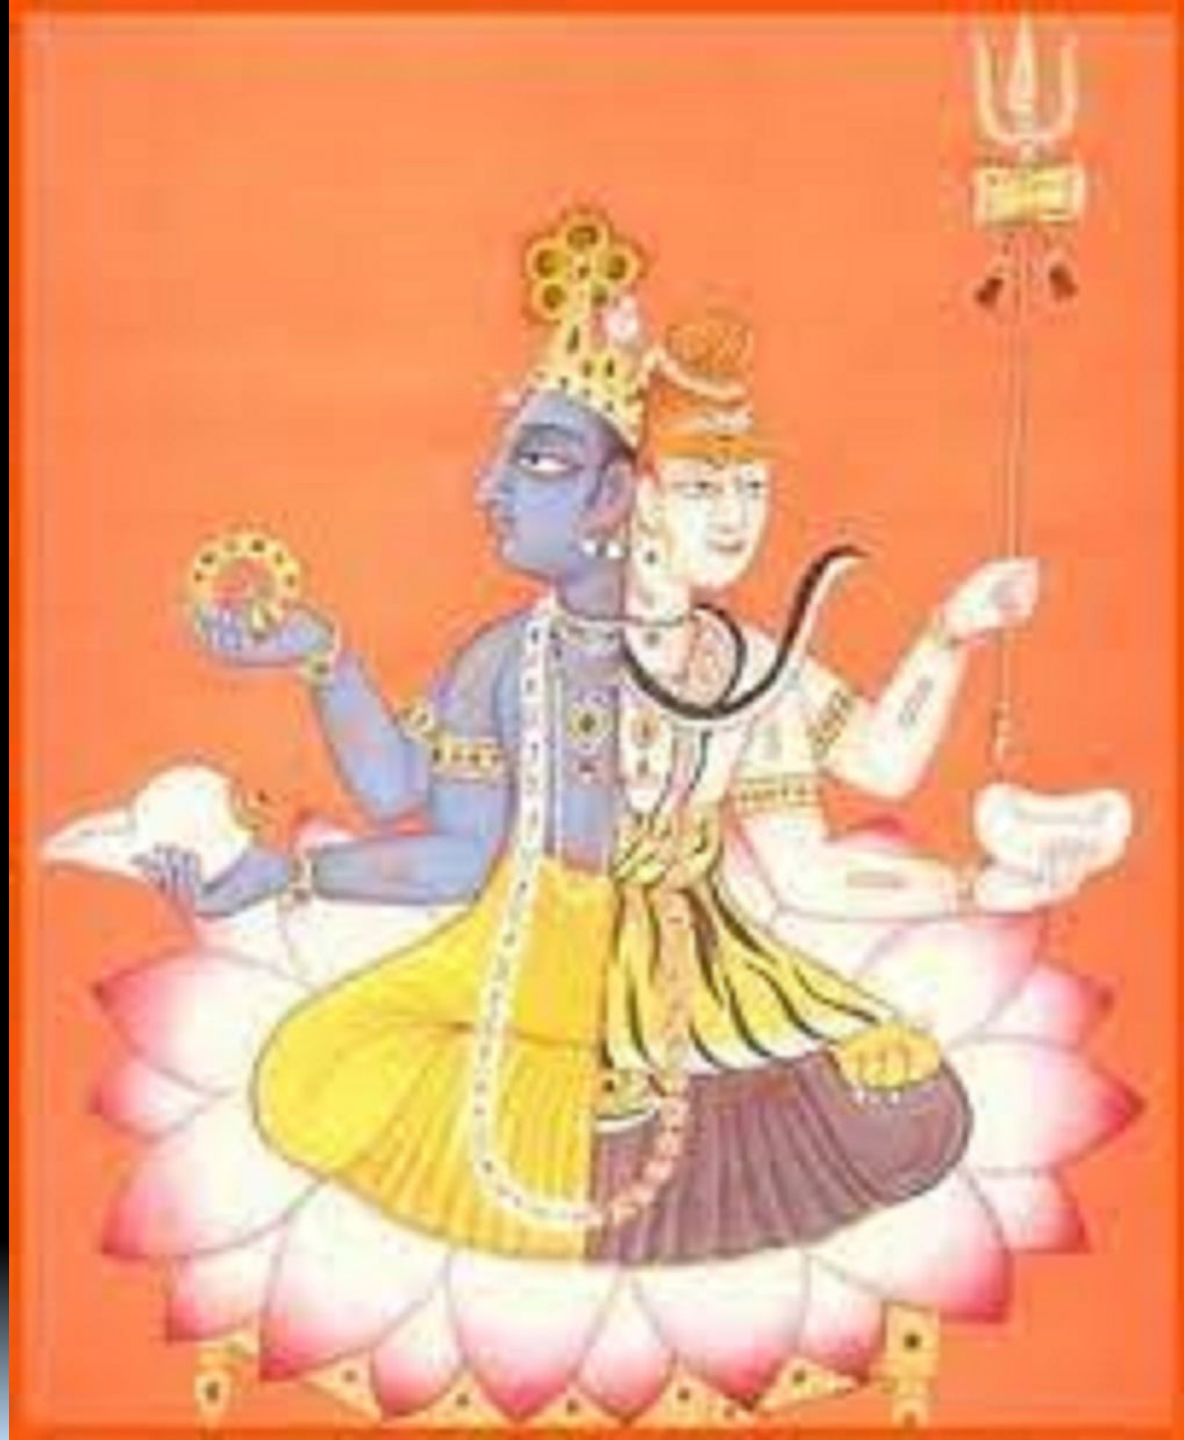

In bindu they are one with divine universal lordness Shoonya Bindu form of the universal divine transcendent Paraprakriti because the universal Divine aspect of Purusha like Hiranayargarba is Shoonya Bindu the phase universe Bindu then Paraprakriti transforms and from Shoonya Bindu she the expanding universe becomes Prakriti. Then from Bindu universe not producing particle or molecule matter with therefore an Empty cosmos the Purusha emerges from the bottom of Hiranayargarba and universal Divine energy (Mulaprakriti) the interactions are reborn and matter and antimatter are born part of the reality of Purusha in Hiranayargarba (like a soul making a physical body the soul has a form before becoming an embryo and during the embryo phase it begins to develop its body

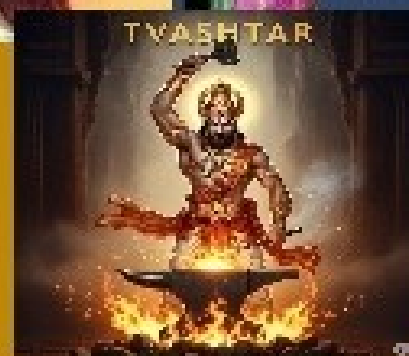

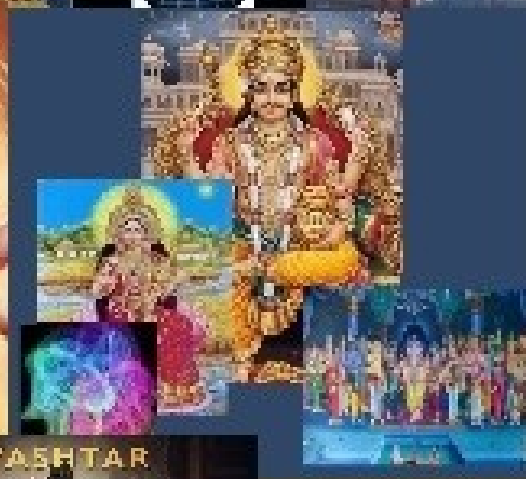

the body is like Hiranayargarba and the Ghana vitalizer is Purusha like the soul of which Hiranayargarba is the form
a part of Purusha transmutes into matter and whole matter in Hiranayargarba but it is also a part of Hiranayargarba which corresponds to the level of the Cosmos world and the cosmos is then filled with matter and antimatter and this is the first Grace (beauty elegance kindness of Prakriti Divine universal Mother one of the form of Paraprakriti

The universe in Prakriti is a noe quantum configuration produced by Ananta Shesha
Ananta Shesh produces an infinity of quantum nodes on a place of infinity this is what makes the universe in expansion this part of Ananta Shesha which is the universe is PRakriti because the universe is in expansion

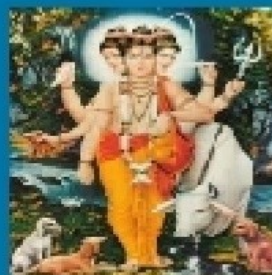

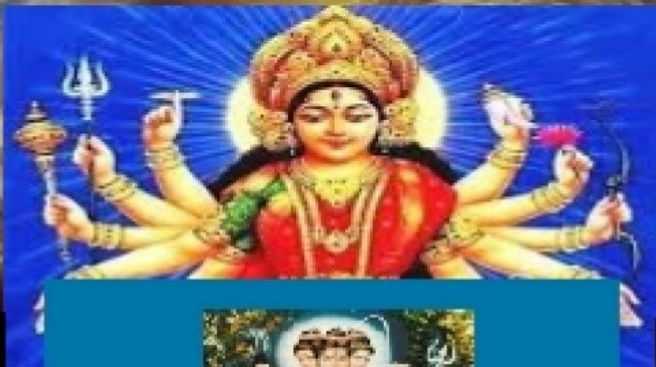

Divine nature Parashakti: True reality, Brahman, essential, omnipotent, omnipresent, reality, center of Quantum world, Lord King of universe, multi-center, divine, Shiva, cosmic, reality, manifestation of the cosmic force, Lord King of universe, Vardhi, Great architect of the universe, Lord King of the universe, Vishvakarma, transcendental Divine universal Mother, Lordless Queen of the universe, Parashakti, the universe, all its cycle, dating, Divine universal Mother of the Hindu (the universe or multiple phases only), Lordless Queen of the universe, Adi-Prakriti, Divine universal mother, Hindu, Lordless Queen of universe, Shakti, the universe or whole, plane, time of the universe, Divine universal mother, in expansion, Lordless Queen of universe, Prakriti, the universe or expansion only, Divine universal energy, Lordless Queen of universe, Lordless queen of universe, Mahapadmi, the universe, many fields, universe, Cosmic, Lingam, Divine universal Lord, King of universe, Hyarjagat, Cosmic, Lord, divine universal, Lord King of universe, Parashakti, cosmic, creator of the 3 world, Lord of the 3 worlds, god, Shiva, and, lordless of the 3 worlds, goddess, Parashakti, Omnipotent, destroyer of the 3 worlds, Lord of the 3 worlds, God, Rudra, and, Lordless goddess of the 3 worlds, goddess, Kali, Chief of Universe, King and queen of Gods and Goddesses, Lord King, God, Indra, and, Lordless queen, Goddess, Indrani.

Let's celebrate the rebirth of Dattatreya Trine murti deva from Prakriti. Lord god Dattatreya trine murti Shiva is active in the universe only in expansion so in Prakriti neither in Shoonya Bindu Prakriti nor in Adi Prakriti with Paraprakriti who passes from Shoonya in PRakriti reborn Dattatreya he is the creative capacity of Prakriti the universe in expansion

Let's celebrate the rebirth of Lord god Dattatreya trine murti Shiva deva. As Paraprakriti pass from configuration Shoonya Bindu to configuration Prakriti (Vishvakarmān the architecture that evolves inside Paraprakriti) Mulaprakriti the divine universal energy the manifestation of the Scalare energy fields universe pass from Shoonya divine universal to Prakriti Divine universal and get that way new faculties creator, the Trine Murti Shiva ahs just passed from Bindu trine murti Shiva deva to Dattatreya Trine Murti Shiva Deva.

Let's celebrate the creative power of the three expanding worlds. Prakriti represents all the Shakti goddesses of the expansion phases. It is the lordless goddess Parashakti who is reborn with gravity at the moment of the transition from Shunya Bindu (the universe) to Prakriti (the expanding universe). Paraprakriti is first reborn in the form of Adi Shakti, the creative power of the three worlds, creator of matter: particles and antiparticles, then molecules.

Let's celebrate the rebirth of Lord god Dattatreya trine murti Shiva deva. As Paraprakriti passes from Shoonya Bindu to Prakriti Vishvakarman the architecture of the universe reconfigures and makes Paraprakriti pass from Shoonya to Prakriti this modifies the potentialities of the universe which becomes Prakriti and this creates the configuration of Trine Murti the potentialities of the universal divine. Inside Paraprakriti during the passage of Shoonya to Prakriti Lord god Ati and his wife his acting power lordness goddess Anasiya rebirth the trine configuration Murti Dattatreya that is to say the creative capacity of the universe. Paraprakriti in expansion that in it is Prakriti Ati therefore also transforms the creative potential of the universal divine energy Mulaprakriti the energy of the scalar chamos universe in expansion Prakriti which becomes the potential of Mulaprakriti in expansion.

when Gravity leaves the unified suprainteraction unit Ganga then experiences distortions in her reality everything no longer oscillates with one and the same unified quantum oscillation and it is the catastrophe she declares war on the Gods and goddess she wants the return to the start before there are too many Gods and Goddesses when everything was calm
when has Shantanu in the heart of his reality now Gods and Demons fight for amrita but also to put an end to the process of creation in particular Bhismasura who by the conservation of the part antimatter matter threatens to annihilate all the matter he also takes part for the Demons and his companion ganga against the Gods

Let's celebrate the rebirth of Jagannathā Trine murti deva from Prakriti. Lord god Jagannathā trine murti Rudra is active in the universe only in expansion, there is no omniscience destroyer of the 3 worlds on reabsorbison big crunch. So in Prakriti neither in Shoonya Bindu Prakriti nor in Adi Prakriti with Paraprakriti who passes from Shoonya in Prakriti reborn Jagannathā, he is the growth capacity of Prakriti the universe in expansion, her deconfinement faculty

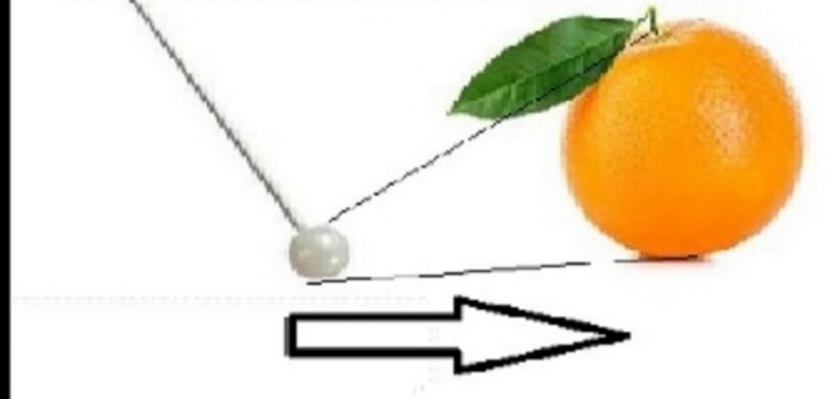

Divine nature Parabrahman True reality Brahman manifests omnipotent omnipresent, subtle creator of Quantum, seed Lord King of universe, subtle creator Ananta Shesha cosmic, subtle manifestation of the cosmic force Lord King of universe Vashukarma, transcendent Divine universal Father Lordless Queen of the universe Parashakti (the universe all in cycle during, Divine universal Mother of the Hindu (the universe on timeless phases only) Lordless Queen of the universe Adi Parashakti, Divine universal mother Shakti Lordless Queen of universe Shesha (the universe on rebirth plane time of the universe), Divine universal mother on expansion Lordless Queen of universe Pralaya (the universe on expansion only), Divine universal energy Lordless Queen of universe Ardha, queen of universe Mahapralaya, the subtle energy, fields universes, Cosmic Lordless Queen of universe Lord King of universe by time arguments, Cosmic Lordless Queen of universe Lord King of universe Parashakti cosmic, seed creator of the 3 worlds Lord of the 3 worlds god Shiva and lordless of the 3 worlds goddess Parashakti, Omniscience destroyer of the 3 worlds Lord of the 3 worlds God Rudra and Lordless goddess of the 3 worlds goddess Kali, Chief of Heavens King and queen of Gods and Goddesses Lord King God Indra and lordless queen Goddess Indrani.

During the Dilation phase led by Rudra with Kali and Sati, his active powers destructive of confinement.

The order of Lord God Dharma was the strict respect of the symmetry between matter and antimatter, the articulation of the creative knot of Particles and antiparticles (the part of Ananta Shesha which is knotted into matter, particles and antiparticles). Lord God Yajna with the abundance of quantum matter necessary to make each particle, Dakshina therefore produces as much matter spin as antimatter spin.

during the big bang process Durga is Durga Kushmananda

she is at the same time Kali, Lakshmi-Shri and Sarasvati Shatarupa expression on big bang of the creative potentiality of the oscillation.

They are both in charge of deconfinement of the universe which is the size of a particle in Bindu

The snake creator Ananta Shesha using the omniscience of the architect of the universe Vishvakarman to direct him knots and scalar energy another aspect of him which manifests as the divine universal energy Mulaprakriti he takes the form of quantum matter Bhumi then accumulation of quantum matter in packets it is also transformed into matter antiparticle particle Kamadhenu because any form of matter is accumulation of quantum node of quantum matter in antiparticle particles then in molecule.

This process of particles mater and antimater borning is manifest as holi Spirit lord god Varuna and holi spirit lordless Goddess Varuni the aspect of the snake creator tht produce that phase of creation.

Let's celebrate Vazuki the cosmic force, the cosmos showing the aspects of its force with the rebirth of gravity the cosmos expands from the size of a particle to that of an organ the whole thing filled with spin particles and antiparticles.

Lordess Goddess Vinata make born Lord god Aruna who takes the reins of the universe and the cosmos and with him Vinata makes born Garuda the movement of the cosmos and the cosmos begins its growth: Dilation, inflation expansion, stopping time then expansion then acceleration until its maximum size

Let's contemplate the omniscience of the 3 worlds as a faculty of the Paraprakriti universe. Gravity Sanata Kumara is reborn and the Paraprakriti universe passes from Shoonya Bindu Prakriti to Prakriti then Prakriti impels the cosmos Vazuki around her neck and the cosmos expands it passes from the size of a particle to that of an organ it is an aspect of Vazuki the cosmic force the cosmos showing its force, but when we look at Puruhsa we see him expand passing from the size of a particle to that of an orange Purusha is what in Hiranyargarbha moves transforms he is universe in expansion Prakriti and he is Cosmos Vazuki at the same time he is Prakriti the universe and he is Vazuki the cosmos. Inside Hiranyargarbha it is what moves, transforms, transforming Hiranyargarbha who passes from shoonya divine universal to Prakriti divine universal developing gravity then expands the lingam cosmic divine universal passes from the size of a particle to that of an Orange. In the hands of Prakriti the trident for this aspect takes the form of Rudra the destructive omniscience of the 3 worlds a faculty of the universe to deconform, to make its growth. Expanding space time Kala Bhairava is reborn with his active power Kalaratri which reorganizes space time. The trident in the hand of Prakriti takes the form of Shiva recreating the gods and goddesses, a faculty of Prakriti to develop faculties.

Let's celebrate the cosmic lord divine universal Purusha inside the cosmic divine universal lingam Hiranyargarbha and the cosmic snake Vazuki. Hiranyargarbha is the volume of the universe and cosmos as one person. Lord King of the Universe, Purusha is what moves and/or transforms in the universe and the cosmos. Thus, Purusha is a part of Hiranyargarbha, and behind Purusha's ego, we find Hiranyargarbha. A part of Hiranyargarbha transforms from scalar fields into universal divine energy, then into quantum matter, and finally into particulate matter. This part that transforms is Purusha, both universe and cosmos, but in another aspect, comparable to a soul that creates a body for itself to be born with the help of the food and genome of its parents, and very creative during the entire Big Bang process, at least. This Faculty of Hiranyargarbha to give birth in him particles and antiparticles is Varuna and his creative power Varuni and this capacity of Purusha to transform a part of him into matter particles and antiparticles is Varuna and his wife his creative power Varuni. Should we specify Purusha does not die at the moment of the birth of the sky and the earth it is his capacity to create from the scalar field which dies, neither Purusha nor Hiranyargarbha are holy spirit beings, they are holy ghana beings (there is always a universe, the universe is therefore not spirit, there is always a cosmos, the cosmos is therefore not spirit, there is no longer a big bang in the universe, the Big bang, creator of the universe is spirit) so inside Hiranyargarbha, particles and antiparticles are born, first Spin, then quarks, then leptons and hadron, before large annihilation, it is Purusha who forms his body in the cosmos inside the lingam Hiranyargarbha, his body is first made of spin, then quarks, and finally lepton, particles and antiparticles, and also after the leptons, hadron, before developing photon, light particles, during this entire phase of formation of Purusha's body, the universe and the cosmos go from the size of a particle to that of an organ, then from the volume of our star system, and finally 300,000 light years in volume. We admire Purusha in this phase because it shows him as very creative and powerful, growing from the size of a particle to 300,000 light years, but what we are seeing is happening in the cosmos; we even believe that he is born in the cosmos by making a body of matter. Outside the cosmos, it is Vazuki, the cosmic force. What we admire about Purusha is a considerable force that is seen in the cosmos; it is Vazuki, the cosmic force

Let's celebrate the rebirth of Lord god Jagannath Dattatreya trine murti Rudra deva. As Paraprakriti pass from configuration Shonya Bindu to configuration Prakriti (Vishvakarma the architecture that evolves inside Paraprakriti) Mulaprakriti the divine universal energy the manifestation of the Sclaire energy fields universe pass from Shonya dravin universal to Prakriti Divya universal and get that way new faculties creator, trine murti Rudra born. Trine Murti Rudra is the common divine nature god Brahma deconified by the Omniscience destroyer of the 3 worlds Rudra Vishnu is the maternal of knots articulation inside Ananta Shesha that Shiva and Shakti create Jagannatha trine Murti Rudra deva is the father of. Mulaprakriti and Prakriti of growth, growth of the universe and the cosmos.

Divine nature Parabrahman True reality Brahman monist omnipresent omniscient omnipotent, snake creator of Quantic noed Lord king of universe snake creator Ananta Shesha cosmic Snake manifestation of the cosmic force lord King of universe Vazuki, Great architect of the universe lord king of the universe Vishvakarman, transcendent Divine universal Mother Lordless Queen of the universe Paraprakriti (the universe all its cycle during, Divine universal Mother of the Bindu (the universe on resorption phases only) Lordless Queen of the universe Adi-Prakriti, Divine universal mother Bindu Lordless Queen of univers Shunya (the universe on rebirth planck time of the universe), Divine universal mother on expansion Lordless Queen of univers Prakriti the universe on expansion only), Divine universal energy Lordless Queen of universe lordless queen of universe Mulaprakriti(the scalars energy fields universe), Cosmic Lingan Divine universal Lord King of universe Hyanyargarbah, Cosmic Lord Divine universal Lord King of universe Purusha omniscience creator of the 3 worlds Lord of the 3 worlds god Shiva and lordess of the 3 worlds goddess Paraprakriti , Omniscience destroyer of the 3 worlds Lord of the 3 worlds God Rudra and Lordless goddess of the 3 worlds goddess Kali, Chief of Heavens king and queen of Gods and Goddesses Lord king God Indra and lordless queen Goddess Indrani

We are at the end of the Bindu phase, the Lord God Dharma order is destabilized by the arrival of Maharishi, then when he revives gravity, Sanata Kumara, through the action of gravity in the universe and the cosmos, which comes to disturb the unity, everything oscillates as one and now everything oscillates in a dissynchronized manner, in disorder, it transmutes itself, relying on the omniscience destroyer of the 3 worlds in charge of the deconfinement of the universe, Rudra, to seek a new bridge of stability elsewhere

The destructive omniscience of the 3 worlds Rudra and Kali, as we have seen, is organized around the creative accretion Tvashtri to deconfinement, but when the knowledge Lordless goddess Vidhya integrates the birth of a new principle Ucchaishrava which allows communication, the passage between universes (outside our 4 dimensions) and cosmic bubble (in our 4 dimensions)

It is then Varuna who, after being born in the waters below, Shantanu sees his active power Varuni born and join him. Everything is then ready for the phase of creation of matter and antimatter. Varuna also organizes himself around Tvashtri, the creative accretion uniting the fighting forces Kartikeya Valli, gravity Sanata Kumara, the creative accretion Tvashtri (the very high god of the phase of creation of matter and antimatter, his central axis around which this phase articulates) the fusion of matter Duvasa but also the possibility offered by Astral energy, Ucchaishrava born from the creation of mixed waters Dhanvantari the dispenser of ambrosia and water Ambrosia called waters of life Soma can finally conceive matter and send Varuni to use the gods to make it born from agglomeration of quantum matter thus born matter spin particles and antiparticles.

Taht the way lord god Dharma transmutate from Bindu Phase wiouth Shiva for higher lord god to phase creation of matter and antimatter with Tvashtri for higher lord god Dharma transmutate the imbalance due to the disappearance of superpower and the rebirth of interactions through the creation of matter

Divine nature Parabrahman True reality Brahman monist omnipresent omniscient omnipotent, snake creator of Quantum noed Lord king of universe snake creator Ananta Shesha cosmic Snake manifestation of the cosmic force lord King of universe Vazuki, Great architect of the universe lord king of the universe Vishvakarma, transcendent Divine universal Mother Lordless Queen of the universe Paraprakriti (the universe all its cycle during, Divine universal Mother of the Bindu (the universe on resorption phases only) Lordless Queen of the universe Adi-Prakriti, Divine universal mother Bindu Lordless Queen of univers Shoonya (the universe on rebirth plactic time of the universe), Divine universal mother on expansion Lordless Queen of univers Prakriti the universe on expansion only), Divine universal energy Lordless Queen of universe lordless queen of universe Malaprakriti(the scalare energy fields universe), Cosmic Lingam Divine universal Lord King of universe Hyranyagarbha, Cosmic Lord Divine universal Lord King of universe Purusha omniscience creator of the 3 world Lord of the 3 worlds god Shiva and lordless of the 3 worlds goddess Parashakti , Omniscience destroyer of the 3 worlds Lord of the 3 worlds God Rudra and Lordless goddess of the 3 worlds goddess Kali, Chief of Heavens king and queen of Gods and Goddesses Lord king God Indra and lordless queen Goddess Indrani.

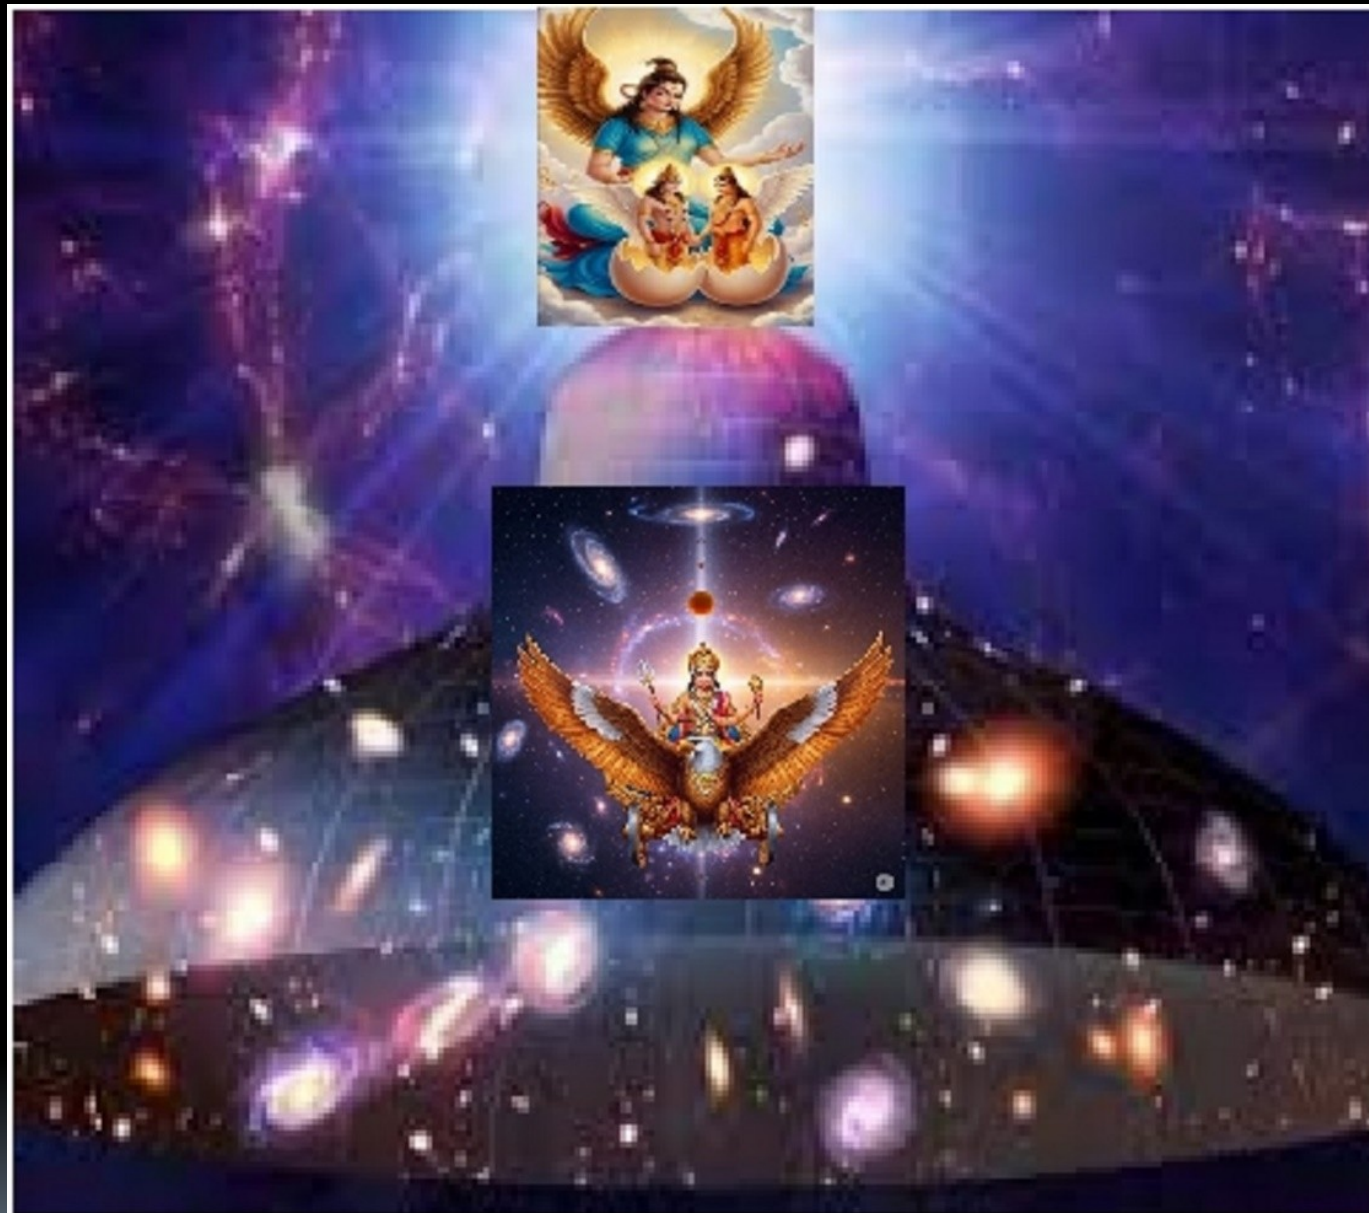

We are at the end of the Bindu phase, the Lord God Dharma order is destabilized by the arrival of Maharishi, then when he revives gravity, Sanata Kumara, through the action of gravity in the universe and the cosmos, which comes to disturb the unity, everything oscillated as one and now everything oscillates in a dissynchronized manner, in disorder, it transmutes itself, relying on the omniscience destroyer of the 3 worlds in charge of the deconfinement of the universe, Rudra, to seek a new bridge of stability elsewhere. Rudra the intelligence destroyer of the worlds therefore composes a deconfinement tool and sends Kali the power destroyer of the worlds to act on gravity Sanata Kumara combined with the vitality force of combativity Kartikeya and Valli causing disorganized activity with the heat Angi dominant in the Bindu she thus succeeds in composing agglutination of matter combining Vitality force of combativity Kartikeya and Valli with gravity Sanata Kumara and the faculty of fusion of matter Durvasa thus the creative accretion takes shape Tavshtri through the destructive omniscience Rudra and Kali through the combative force Kartikeya Valli through gravity Sanata Kumara and what made him born Maharishi and through the calorific element Agni Shiva to compose an omniscience that we call creative accretion Tvashtri it is one of his last acts of god very high of the Bindu with enculte the arrival of astral energy which moves the elements from universe to cosmos

The destructive omniscience of the 3 worlds Rudra and Kali also begins to work by organizing itself around the creative accretion Tvashtri begins to create matter to deconfine because favoring the accretion of quantum matter in agglutination it allows to gain space in the volume universe and cosmos (volume the size of a particle)

Divine nature Parabrahman True reality Brahman beyond all concepts omnipotent, male creator of Cosmos Lord King of universe male creator Ananta Shesha cosmic Snake manifestation of the cosmic force Lord King of universe Vamshi Great architect of the universe Lord King of the universe Vishvakarmam, transcendent Divine universal Mother Lordless Queen of the universe Parashakti (the universe all its cycle during, Divine universal Mother of the Hindu (the universe on resolution phases only) Lordless Queen of the universe Adi-Parakti, Divine universal mother Hindu Lordless Queen of universes Shoonya (the universe on both places time of the universe), Divine universal mother on expansion Lordless Queen of universes Prakriti the universe on expansion only) Divine universal energy Lordless Queen of universes Lordless Queen of universes Prakriti the universe on expansion only) Cosmic Lingam Divine universal Lord King of universe Hiranayagarbha, Cosmic lord divine universal, Lord King of universe Purusha omniscience creator of the 3 world Lord of the 3 worlds god Shiva and lordless of the 3 worlds goddess Parashakti, Omniscience destroyer of the 3 worlds Lord of the 3 worlds God Rudra and Lordless goddess of the 3 worlds goddess Kali, Chief of Heavens king and queen of Gods and Goddesses Lord king God Indra and lordless queen Goddess Indrani.

Let's celebrate the rebirth of the move Garuda with Aruna driving the Expansion. the universe passes from Shoonya divine universal aspect of Hiranayagarbha the lingam cosmic divine universal and Pusuha what moves and transforms inside Hiranayagarbha to Prakriti divine universal. Inside Paraprakriti Vishvakarmam turn the configuration from Shoonya divine universal to Prakriti inside Hiranayagarbha, inside Purusha Come out Lordless goddess Vinata a New potentiality of the universe who make born Aruna who installs himself at the command of the chariot universe and cosmos and Garuda the movement of the universe and the cosmos then begins the growth of the universe and the cosmos 0 inside Hiranayagarbha, Purusha begins to transform into matter and antimatter Spin while growing causing Hiranayagarbha to grow the volume goes from that of a particle to the volume of an orange full of Spin.

Divine nature Parabrahman True reality Brahman monistic omnipresent omniscient omnipotent, snake creator of Quantum world Lord king of universe snake creator Ananta Shesha cosmic Snake manifestation of the cosmic force lord King of universe Varaki, Great architect of the universe lord king of the universe Vihvakarman, transcendent Divine universal Mother Lordless Queen of the universe Paraprakriti (the universe all its cycle during, Divine universal Mother of the Bindu (the universe on reabsorption phases only) Lordless Queen of the universe Adi-Prakriti, Divine universal mother Bindu Lordless Queen of universe Bhoomya (the universe on rebirth planck time of the universe), Divine universal mother on expansion Lordless Queen of universe Prakriti the universe on expansion only), Divine universal energy Lordless Queen of universe Lordless queen of universe Mulaprakriti (the scalar energy fields universe), Cosmic Lingam Divine universal Lord King of universe Hyaranyagarbha, Cosmic Lord Divine universal Lord King of universe Purusha omniscience creator of the 3 worlds Lord of the 3 worlds god Shiva and lordless of the 3 worlds goddess Parashakti, Omniscience destroyer of the 3 worlds Lord of the 3 worlds God Rudra and Lordless goddess of the 3 worlds goddess Kali, Chief of Heavens king and queen of Gods and Goddesses Lord king God Indra and lordless queen Goddess Indrani.

Let's celebrate lordless goddess Durga Kushmananda Tridevi Kali/Lakshmi-Shri/Sarasvati. After Shiva the omniscience creator of the worlds struck down Bindu-Kama the ghana of love (organized for the functioning of the bindu) then remade it but organized for the creative process Shiva gave birth to lord god Maharishi transforming a fraction of the common divine nature god Brahman into a tool to rebirth the interactions by breaking the superforce of the bindu, and Maharishi reborn Sanata Kumara gravity Then appears the holy spirit lordless goddess Kushmananda who becomes Ghana again the time of the creative process of matter and antimatter. From her frontal chakra emerges Kali, the destructive power of the worlds, wife and active power of Rudra, the omniscient destructive of the worlds in charge of deconfinement of the universe. Kali begins to act immediately, putting an end to Shiva's function as the highest of the gods and organizing herself around Tvshtri, the new highest of the gods. Creative accretion is nourished by Kartikeya, the forces of combativeness, and Sanata Kumara, gravity. Immediately, space-time, Kala and Kalaratri, her active power, reorganizing space-time, are reborn, and we move into the phase of creation of matter and antimatter. This is how Shiva succeeds in moving the universe from the Bindu phase, where he is the highest of the gods, to the phase of creation of matter and antimatter, where he is no longer. Kushmananda, for her part, is Tridevi Kali/Lakshmi-Shri/Sarasvati; there is no goddess Shakti in Durga.

The lord God Varuna the holy spirit lord God creator of the universe 2nd phase big bang phase creation of matter and antimatter with the holy spirit lord God creator of the universe 2nd phase big bang of the kingdom of creators of all the kingdoms the goat head god have horns symbol of the alchemy of matter growing even on the animal body on its forehead and around it the pentagram eminently sacred symbol of the birth of particles and antiparticles the on his knees a caduceus symbol of the knot of the creator serpent with space what particles and antiparticles are. On his head a flame like the light that he gives birth to, all with the moon because the cycles of birth of particles and antiparticles are taught with the moon which sets the rhythm.

these kingdoms where several Gods and goddesses live and which make the kingdoms emerge when a new race of humans emerges so that the Gods and goddesses are in the image of their Race all the people of this race are then on the book of eternity of the kingdom from the beginning because the kingdom thus welcomes all individuals of the people of their race.

Varuna is one of the manifestations of the Big Bang 2nd phase and it is in all the kingdoms except the angelic which has a creator of heaven and earth for only God therefore impossible to add to it a creator of matter and antimatter since this kingdom responded to the demand of the Asia Minor Africa North East region in order to unify these regions facilitating the transit of individuals (the peoples were beginning to mix).

all kingdoms have the same origin and this origin is the gods goddesses king and queen of the universe of this kingdom at the origin of each of the others for 3.5 million human years and on all territories of the planet.

They were deprived of the cults necessary to be able to manage their influences, from the gods to their territory, to organize a religion that denigrated them and thus the power they worked against each other weakening the ability of the Gods to protect then the Christian deities helped By some Mazdeist and occultist we make realizations to make gods pass for angels or Eloïmes in order to curse everything that was not their will which gives contemplation to the respectful who claims that you are body of Christ if you are converted Or body of lucifer if you are not and of course this with rules of functioning or peoples are chastised by wars: 3 World Wars including a nuclear one to chastise a Christian trinity, 40 000 nuclear head to destroy an anti

The laity of the west simply wished that the human of their country was no longer jae to be used in the greed of religious who wanted the power to reign considering that it was not for the State to constrain a person Fair ereligion being given that it is necessary to make fair the glimpses of the exostence of the Gods and that it is then necessary to demonstrate that the constraint brings the love of the Gods to the level of adoration or one can live in their kingdom after the Dead but when atheism is used by its same religious to invoke the destruction of all these peoples a brake we no longer no longer under Christian constitution the inhabitants are in obligation to the gods of the Hebrew race. There are many other kingdoms there are not in obligation to the preference of anyone. In order to do this, stop the trail of the occultist to make his kingdoms pass for demon rods so we do not need the Vedas that mixes the Kingdoms and creates very hard strings to explér causing serious curse; Nor of the purnana which furnent influenced verses monotheism with a definition of Trine Murtie in Father Son Holy Spirit !!!!! Let's celebrate the Holy Spirit Lord God Varuna, the creator of the universe, the second phase of the Big Bang, creator of all matter and antimatter in the cosmos.

Celebrate Varuna, in whom are the two omnisciences of the three worlds, the creator Shiva and the destroyer Rudra, during the entire phase of creation of matter and antimatter. From Rudra, Varuna deconfines, from Shiva, through Rudra, Varuna conceives matter and antimatter particles.

Deity nature Parashakti: The deity Brahman reveals complementary construction components, such as creator of Quanta and Lord King of universe and creator Ananta Shakti cosmic. Let's celebrate Holy spirit lord god Varuna the creator of the universe 2nd phase big bang creator of all the matter and antimatter iof the cosmos. Celebrate Varuna in him is the creative accretion the highest principle of the gods of the phase (the central axis around which the phase is organized) lord god Tvastar. the creation phase of matter and antimatter is organized around the creative accretion Tvastar but this one is in Varuna, the accretion which creates matter and antimatter is the faculty of Varuna to create matter and antimatter by accretion.

Let's celebrate Holy spirit lord god Varuna the creator of the universe 2nd phase big bang creator of all the matter and antimatter iof the cosmos. Celebrate Varuna in him stands the God Dhanvantari who extracts the nectar of ambrosia lord god Soma from the interaction between night Ratri and darkness Vibhu producing Yami.

Celebrates the the sacrificial cow and dont mistake with Kamadhenu the particles earth matter goddess.

The sacrificial cow correspond to the part of scalare énergy field Mulaprakirti that transmute in the process creator of matter antimatter and molecular matter into mater antimatter and molecular matter, but also that transmutate into all the acif principle agissant the gods and goddesses.

During the process creator of matter and antiatter the divine énergy Mulaprakirti the scalare énergy the universe aspect énergy evaluate in Prakriti universe on expension the aspect divine universal of the cosmic lord divine universal Purusha inside Prakriti part of Mulaprakirti become the sacrificial cow and transmutate into matter and this come out as Purusha reborning developping matter antimatter and then molecular matter Purusha is describet to dye after those 2 phase because the sacrificial cow dye after the borning of molecular no more scalare énergy transmutate into Matter(molecular included) or antimatter.

Let's Celebrate Holy spirit lord god Uchchaisravas, the manifestation of the Astral energy. As the waters above Ganga come down to the level of the waters below Shantanu Uchchaisravas reborn in the universe the omniscience of the universe Shantanu the waters below can again transform ganga the waters above from which all matter comes.

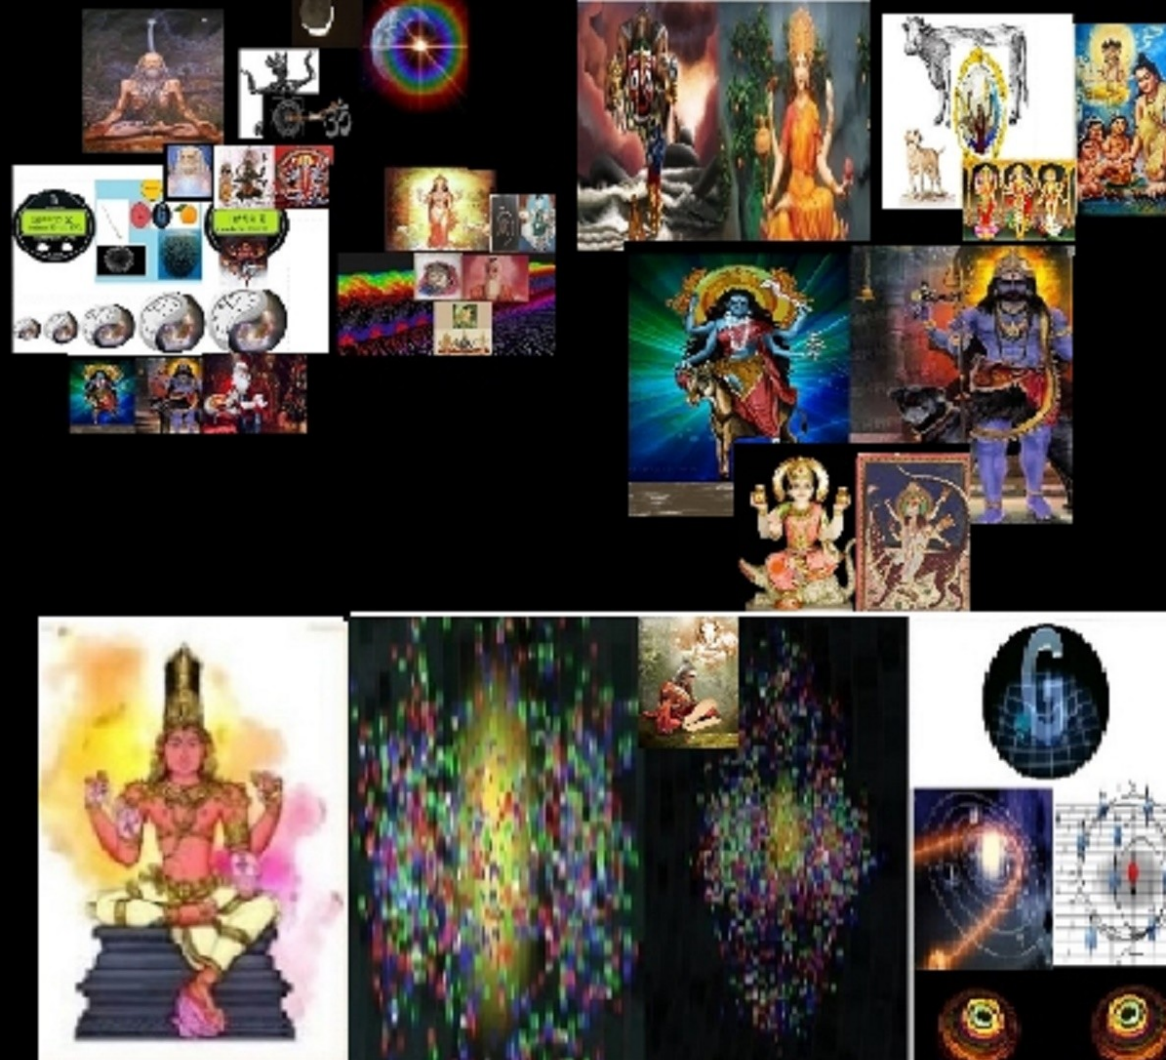

Let's celebrate the Waters of the universe the waters above lordress goddess Ganga where all types of matter takes its source, and the waters below lord god Shantanu the brain of the universe where all forms of active intelligence take its source. They create matter and antimatter, inside the Divine universe. Inside Prakriti the universe expanding, inside Mulaprakriti the divine universal energy that comes from Prakriti oscillation on expansion inside Hiranyargarbha the cosmic lingam divine universal and inside Purusha the aspect of hiranyargarbha that moves and transforms during the process creator/destroyer of the cosmos. The Waters of the universe take place inside Prakriti they are 2 aspect of the divine universal energy Mulaprakriti inside Prakriti the waters below origin of all shape of matter and the waters below origin of all intelligence that build the cosmos. Shiva, the omniscient creator of the 3 worlds using the knowledge lordress goddess Vidhya, creates intelligence capable of creating matter and antimatter, as in Shantanu, the brain, creating neuronal connections to build intelligence made to create matter and antimatter, and it is Varuna, who was born inside the waters below. Vruhi, born a little after gravity, is reborn. Astral energy lord Uchchaishravas connects Shantanu to Ganga, making their interaction with each other possible. The universal divine energy that transmutes the brain of the universe in Shantanu, thus gives birth to the intelligence to create matter and antimatter. Varuna, as well as the ability to act, begins to transform Ganga, giving him powers. Sanata Kumara's power of gravitational attraction, with which he makes matter and antimatter spin. The universe Prakriti Mulaprakriti then begins to create matter in the cosmos and we then see in Hiranyargarbha the cosmic lingam divine universal Purusha move, transforming first of all his divine universal aspect universe in expansion in the waters below he acquires the omniscience creator of matter and antimatter Varuna in his brain Shantanu and in the waters above Ganga he begins to develop matter and anti spin his cosmic body whereas he was a bubble of vacuum the size of a particle the two come to mingle at the level of the cosmos Purusha obtains faculties to act Varuni and his body begins to fill with Spin particles and antiparticles it begins its growth making Hiranyargarbha grow transforming his interior. Purusha is What we see moving from Hiranyargarbha

Let's celebrate the Indian Kingdoms, Kings and Queens of the Universe.

Let's celebrate the cosmic lord divine universal Purusha inside the cosmic divine universal lingam Hiranyagarbha and the cosmic snake Vazuki.

Hiranyagarbha is the volume of the universe and cosmos as one person. Lord King of the Universe, Purusha is what moves and/or transforms in the universe and the cosmos. Thus, Purusha is a part of Hiranyagarbha, and behind Purusha's ego, we find Hiranyagarbha. A part of Hiranyagarbha transforms from scalar fields into universal divine energy, then into quantum matter, and finally into particulate matter. This part that transforms is Purusha, both universe and cosmos, but in another aspect, comparable to a soul that creates a body for itself to be born with the help of the food and genome of its parents, and very creative during the entire Big Bang process, at least. This Faculty of Hiranyagarbha to give birth in him particles and antiparticles is Varuna and his creative power Varuni and this capacity of Purusha to transform a part of him into matter particles and antiparticles is Varuna and his wife his creative power Varuni. Should we specify Purusha does not die at the moment of the birth of the sky and the earth it is his capacity to create from the scalar field which dies, neither Purusha nor Hiranyagarbha are holy spirit beings, they are holy ghana beings (there is always a universe, the universe is therefore not spirit, there is always a cosmos, the cosmos is therefore not spirit, there is no longer a big bang in the universe, the Big bang, creator of the universe is spirit) so inside Hiranyagarbha, particles and antiparticles are born, first Spin, then quarks, then leptons and hadron, before large annihilation, it is Purusha who forms his body in the cosmos inside the lingam Hirabnyagarbha, his body is first made of spin, then quarks, and finally lepton, particles and antiparticles, and also after the leptons, hadron, before developing photon, light particles, during this entire phase of formation of Purusha's body, the universe and the cosmos go from the size of a particle to that of an organ, then from the volume of our star system, and finally 300,000 light years in volume. We admire Purusha in this phase because it shows him as very creative and powerful, growing from the size of a particle to 300,000 light years, but what we are seeing is happening in the cosmos; we even believe that he is born in the cosmos by making a body of matter. Outside the cosmos, it is Vazuki, the cosmic force. What we admire about Purusha is a considerable force that is seen in the cosmos; it is Vazuki, the cosmic force

Lorddess goddess Mohini the luck with Lord
god Kurma

- The Descent of Kurma
- At the beginning of the universe, following a great flood, the most precious things, including Amrita (the liquor of immortality), were lost at the bottom of a gigantic ocean of milk.
- The Devas (gods) and Asuras (demons), who were then vying for power over the world's order and therefore over the buried treasures, had to join forces under the orders of Vishnu to churn the ocean of milk so that the Amrita could rise to the surface and be retrieved.
- To do this, they used the great serpent Vastu as a rope and Mount Mandara (Mount Meru) as a handle. But to achieve their goal without the mountain falling, Vishnu had to intervene in the form of a turtle (Kurma) and descend to the depths of the sea to serve as a support, a base for the mountain.
- Thus, the transformation of the Ocean of Milk could take place efficiently and intelligently thanks to Kurma, who provided the necessary stability, and to the movements of Mount Meru, set in motion by the Devas and Asuras with the help of the Vastu Serpent.
- And it was in this alliance that the precious treasures surfaced, including Amrita and kalakuta (poison).
- While Amrita offered the Devas immortality, kalakuta, as a poison that destroys the universe, offered the Devas the most important awareness essential to the balance of the world. In other words, the dangers of the ego.
- Indeed, their quest for immortality at any cost, this insatiable desire to acquire this all-powerful power over the mastery of the world, generated the threat of the destruction of the universe, even though they are supposed to be the guarantors of its stability. Thus, they became aware of their dark sides and the dangers of ignoring them.
- Shaken by this teaching, they then sought help from Shiva, who sucked up the poison without swallowing it. All night long, the Devas sang and danced to help Shiva stay awake so that he could keep the poison in his throat without ingesting it, thus saving the universe.
- In the morning, the poison transformed, and to remind everyone of the dangers of listening only to one's pride, Shiva turned completely blue.
- The Devas were able to begin ensuring the preservation of the world's order without expectation of recognition, personal victories, expectations, or glory.
- Kûrma also means "work," because as a foundation, it is the necessary foundation, the basis of all work in Creation.
- The Mârkanḍey Purâṇa (a sacred Hindu text) describes the Indian continent as permanently resting on the back of this giant turtle, Vishnu.

Celebrate Lord God Dharma the manifestation of universal order

At the moment when Shiva transmutes Kama to adapt it from the bindu phase to the creation phase then the lord God Maharishi succeeds in breaking the unified superforce interaction bringing Gravity back to life Sanat Kumare

Dharma loses balance (there was no gravitational attraction in the universal order and now we have to deal with gravity) which was that of Bindu, it shifts towards the process of creation of matter to find balance on another Base and this leads to the birth of spin particles and antiparticles because the universal order which prohibited any creation of matter or antimatter is over.

Let's celebrate the early beginning of obig bang phase creation of all the matter and antimatter of the universe.
 lord god Maharaishi(Ishvara deva Maharishi) come out and break down the Supraforce this make the lorddess goddess of Birth Santana(Ishvari devi Santana) appearing with the bounding of the gravity lord god Sanata Kumara(Ishvara deva Sanata Kumara) the fighting forces, the vitality forces Lord god Kartikeya and his acting power lorddess goddess Valli start to generate and feed with the gravity a creative accresion force lord god Tvashitar, the higher lord of the phase (the central axis around which all the process organizes) Tvashitar with Kartikeya Valli and Sanata Kumara become the tool of the omniscience destroyer of the world lord of the worlds god Rudra(Trilokeshvara deva Rudra) and his acting power destroyer of the confinement in the worlds lorddess of the worlds goddess Kali (Trilokeshvari Kali) and from Tvashitar come the move dilatation of the volume universe and cosmos this creat space and make possible the rebirth of the space time lord god Kala Bhairava and his acting power lorddess goddess Kalaratri from Tvashitar.
 the space time growing up this make possible the rebirth of the creator of universe 2nd big bang phase lord god Varuna and lorddess goddess Varuni his acting power creator of particles and antiparticles matter that come just after when the temprature start to cool down Temperature colling down because the deconfinement of the space time through Kalaratri dilating Kala Bhairava Rudra and Kali deconfinate as a faculty of Kalaratri and Agni cool down from 10^{32} Kelvin to 10^{28} Kelvin

Let's Celebrate the prosperity lord god Kubra on phase creation of matter antimatter. Another long-awaited Wealth is reborn in the universe space time lord god Kalabhairava and his acting power Kalaratri of space is created where there was promiscuity it is the work of Rudra Kali and Sati a great wealth at this moment of the cycle of the universe Ashtalakshmi shape wealth of deconfinement including space which is created by dilation. However Kubera has still not found balance because this growing volume is filled with spin particles and antiparticles at such a great rate that there is no room for empty space there is still Promiscuity the husband of Shraddha, who is emptiness. The emptiness has increased thanks to the expansion but the expected benefit is not there because the creative process gives birth to such a large number of particles that this opulence takes over the place occupied by the emptiness

Let's celebrate Lord Turtle God Kurma, an associate of Vishnu Avatar, his manifestation of a particular principle of the universe and cosmos that makes it incapable of collapse.

The cosmos is reborn as bindu without any gravity, and then gravity is reborn, and the process of creating matter and antimatter begins, through the grace of Varuna and Varuni. The mass of the cosmos in the universe increases with the quantity of particles. The Lordless Goddess Kamadhenu increases the destructive omniscience of the three worlds. Lord God Rudra deconfines the universe, which goes from the size of a pinhead to that of an orange. It is filled with spin particles, Lord God Kurma, the tortoise god, and the mass in the cosmos increases exponentially, but no collapse occurs. there is no black hole in the magma of particles with the arrival of Quarks and antiquarks the cosmos soys the influence of Rudra inflates from the size of an orange to that of the volume of our stellar system and this entirely filled with particles and antiparticles. A gigantic mass because all the rest of the matter is only a combination between all these quarks yet no collapse there is no black hole in the cosmos and that is Kurma the turtle god who carries on his back the creation. Finally Rudra the destructive omniscience of the 3 worlds by combination of matter deconfines the universe he acts through Varuna and Kali through Varuni. Matter diversifies by exchanging gluons, then leptons are born. The volume continues to increase, and so does the mass. Finally, the quarks group together into hadrons, which allows for deconfinement. It is Rudra acting through Kali, Lordless Goddess Kamadhenu. The particles/antiparticles of Earth matter are finished being born from the quantic matter lordless goddess Bhumi Kamadhenu is made of. Its mass is greater than that of the current cosmos because all antimatter and almost all matter will annihilate. Again, Lord God Kurma supports the universe, and there is no collapse; there are no black holes in the cosmos. The Almighty God Kurma is one of the secrets of the universe and an aspect of the cosmic force Vazuki.

Let's celebrate the temperature during the phase creation of matter and antimatter. Lord god Agni burned at 10^{32} Kelvin when lord god Atri the cold the frigorific element reborn and grow up cooling down the temperature by the grace of Rudra Kali and Sati who deconfine the space time Kalabhairava working through Kalaratri the power reorganosator of the space time, the more the space time volume grow up stronger is lord god Atri the refrigerant element to cool down the temperature and Atri drive Agni to the temperature 10^{28} Kelvin. At the Passage of Atri it is Anasuya who influences the environment of her husband and Anasuya brings the universe to a transformation allowing Lord God Maharishi to revive the strong interaction Lord God Sanatana Kumara with Sanatana Kumara Varuna and Varuni can now create quarks and antiquarks particles. Space time Kalabhairava inflated from the size of an organ to that of our star system, and Atri drive Agni from 10^{28} K to 10^{15} K.

The first primary form particles of lordness goddess Kamadhenu are spin particles and antiparticles. clusters of quantum matter clusters of Bhumi clumped together by gravity only by lord god Sanat Kumare only a bit like the planets around the sun only hold in orbit by gravity. All this quantum matter Bhumi rotates around a central axis in one direction or another which means that it is matter or antimatter. The spin longevity is short

Jagannathā is the faculty of Prakriti through Mulaprakriti inside her transmuting, to grow making the cosmos growing up full of matter. Kūṣmananda is the agissant power acting to make Prakriti and the cosmos growing up, through them acting inside of her Prakriti grow up developping making matter and antimatter borne in the cosmos.

Rudra Kali working to transform the common divine nature Brahma/Sarasvati begin to use Sanata Kumara in the serpent creator while the creative accretion Tvashtar is the very high of the gods (the central axis around which the events of the universe are organized) Tvashtar is at the heart of Ananta Shesha because Sanata Kumara and Bhumi are also a part of Ananta Shesha the serpent creator and very high of the kings of the universe (central axis) during the Big bang process takes all forms of matter including quantum matter Bhumi and matter Particles Kamadhenu gravity at the heart of all matter is therefore at the heart of Ananta Shesha which thus deconfines and groups quantum matter into clusters of quantum matter brane making them grow until they become particles and antiparticles the abundance of quantum matter is Shri she transforms the cosmos which fills with particles and antiparticles

Let's celebrate the common divine nature transformation through the deconfinement of the universe driven by Rudra and Kali.

It is Jagannatha and Durga Kushmananda who deconfine the universe by transforming the common divine nature, God Brahma, whose aspect that will transform into matter and antimatter is Svayambuvah, and Shatarupa the oscillation of each particle, which gives form to the common divine nature.

Jagannatha is Brahma Svayambuvah, Vishnu Sanata Kumara gravity, and Rudra, while Durga Kushmananda is Sarasvati Shatarupa, Lakshmi Shri, and Kali the destructive power and Sati the creative aspect of this power. Brahma/Sarasvati are already in the waters above all the universal divine energy Mulprakriti which transmutes into quantum earth matter Bhumi but of what they are of Bhumi a part is Svayambuvah/Shatarupa this part which is agglutinated in cluster of quantum matter bigger and bigger until becoming particles and antiparticles spin and then gluons and quarks and then lepton and finally Hadron. Rudra Kali uses the gravity in the hearth of Ananta Shesha and build the cluster of quantum matter until particles and antiparticles to deconfinete the universe (to get place available inside the volume)

Rudra Kali working to transform the common divine nature Brahma/Sarasvati begin to use Sanata Kumara in the serpent creator while the creative accretion Tvastar is the very high of the gods (the central axis around which the events of the universe are organized) Tvastar is at the heart of Ananta Shesha because Sanata Kumara and Bhumi are also a part of Ananta Shesha the serpent creator and very high of the kings of the universe (central axis) during the Big bang process takes all forms of matter including quantum matter Bhumi and matter Particles Kamadhenu gravity at the heart of all matter is therefore at the heart of Ananta Shesha which thus deconfines and groups quantum matter into clusters of quantum matter brane making them grow until they become particles and antiparticles the abundance of quantum matter is Shri she transforms the cosmos which fills with particles and antiparticles

Divine nature Parabrahman True reality Brahman manifest omnipotent omnipresent, infinite creator of Cosmic seed Lord King of universe multi creator Ananta Shesha cosmic Brahma manifestation of the cosmic force Lord King of universe Vande Great architect of the universe Lord King of the universe Vidyalakshman, Supreme Lord Divine universal Mother Lordless Queen of the universe Parashakti (the universe, all its cycle during, Divine universal Mother of the Hindu (the universe on expansion phase only) Lordless Queen of the universe Adi-Prakriti, Divine universal mother Hindu Lordless Queen of universe Shomya (the universe on rebirth phase) of the universe), Divine universal mother on expansion Lordless Queen of universe Praditi (the universe on expansion only), Divine universal energy Lordless Queen of universe Kundalini (the universe on expansion only), Cosmic Lingam Divine universal Lord King of universe Haryanagarbha, Cosmic Lord Divine universal, Lord King of universe Parashakti omnipotence creator of the 3 worlds God Shiva and Goddess of the 3 worlds Goddess Parashakti, Omnipotence destroyer of the 3 worlds Lord of the 3 worlds God Rudra and Goddess of the 3 worlds goddess Kali, Chief of Heaven King and queen of Gods and Goddesses Lord King God Indra and Goddess queen Goddess Indrani.

Rudra Kali working to transform the common divine nature Brahma/Sarasvati begin to use Sanata Kumara in the serpent creator while the creative accretion Tvashtar is the very high of the gods (the central axis around which the events of the universe are organized) Tvashtar is at the heart of Ananta Shesha because Sanata Kumara and Bhumi are also a part of Ananta Shesha the serpent creator and very high of the kings of the universe (central axis) during the Big bang process takes all forms of matter including quantum matter Bhumi and matter Particles Kamadhenu gravity at the heart of all matter is therefore at the heart of Ananta Shesha which thus deconfines and groups quantum matter into clusters of quantum matter brane making them grow until they become particles and antiparticles the abundance of quantum matter is Shri she transforms the cosmos which fills with particles and antiparticles

Divine nature Parashurama True reality Brahman is much more perfect and complete, wide creator of Quanta, seed Lord of universe wide creator Ananta Shesha cosmic, subtle manifestation of the cosmic force Lord King of universe Yama, Great architect of the universe Lord of the universe Vishwakarma, transcendence Divine universal Mother Lordless Queen of the universe Paragoddess of the universe all in cycle during, Divine universal Mother of the Hindu (the universe on creation phases only) Lordless Queen of the universe Adi-Prakriti, Divine universal mother Hindu Lordless Queen of universe Shiva (the universe on both planes time of the universe), Divine universal mother on expansion Lordless Queen of universe Pradhi the universe on expansion only, Divine universal energy Lordless Queen of universe Vidya queen of universe Shakti (the universe on expansion only), Cosmic, Lingam, Divine universal Lord King of universe Vishnu universal, Cosmic, Lord of universe universal, Lord King of universe Parashu transcendence source of the 3 worlds Lord of the 3 worlds and time and creation of the 3 worlds goddess Parashu, Divine cosmic energy of the 3 worlds Lord of the 3 worlds goddess Kali, Chief of universe King and queen of Gods and Goddesses Lord King God Indra and Lordless queen Goddess Indrani.

Let's celebrate lord Jagannathâ trine murti Rudra and his wife goddess Durga Kushmananda tridevi on the early beginning of the process creator of the matter and antimatter. Jagannathâ is the theme of holiness commune divine nature god Brahma transformed by the omniscience destroyer of the 3 worlds Rudra/Kali for deconfinement of the universe, he is Svayambhuva Brahma Sanat Kumara the god avatar of Vishnu, and Rudra, and Durga Kushmananda is Kali, goddess Shri the avatar of Lakshmi and Shatarupa Sarasvati, the second Rudra wife goddess Sati is his creative aspect Rudra don't work to create but he provokes creation for deconfinement. At the quantum level we are not in the cosmos but in the universe Prakriti oscillating in expansion, a little bit of god Brahma/Sarasvati in the form of scalar fields universe generating the divine universal energy Mulaprakriti, a little bit of god Brahma in the form of energy of the scalar field universe oscillation, which transmutes into quantic earth matter Bhumi, herself also a little bit of commune nature divine Brahma/Sarasvati, Rudra and Kali to deconfinement uses gravity at the heart of Ananta Shesha who in the waters below has taken all the forms of quantum matter Bhumi part of Brahma/Sarasvati start to transforme it is Svayambhuva/Shatarupa this part from Quantic Branes of matter are agglomerated by the action of Rudra and Kali matricial Sanat Kumara the gravity and they are groups by attraction into larger ones. The quantic matter Bhumi agglomerates into bigger and bigger clusters of quantic matter each of them Svayamburva/Shatarupa. The growing clumps of matter transform into spin particles and antiparticles Kamadhenu which have a short lifespan because they are held only by gravity. those first particles and antiparticles spin are the bombing of Kamadhenu the particles/antiparticles earth matter. It is Kushmananda that we can see transforming Jagannathâ who pass from its Brahma aspect from particles volum size to the volum of an orange full of SPin particles and antiparticles Jagannathâ drive his growing up and Durga Kushmananda make it real using Gravity and Accretion to dilate the volum and deconfinement of Quantic matter to build clusters of quantic matter bigger and bigger until the particles size.

Jagannathâ is the faculty of Prakriti through Mulaprakriti inside her transmuted, to grow making the cosmos growing up full of matter. Kushmananda is the agissant power acting to make Prakriti and the cosmos growing up, through them acting inside of her Prakriti grow up developing making matter and antimatter bombing in the cosmos.

Dilatation of the Cosmos

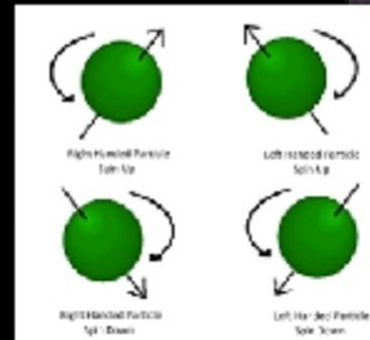

Divine nature Parabrahman True reality Brahman monoist omnipresent omniscient omnipotent, snake creator of Quantum node Lord king of creation Ananta Shesha, cosmic Snake Lord King of Creation Vacuki, Architect of the creation Lord king of the creation Vishvakarma, transcendent Divine universal Mother Lordless Queen of the creation Devi, Divine universal Mother on resorption of the Bindu Lordless Queen of the creation Adi-Prakriti, Divine universal mother Bindu Lordless Queen of creation Shonya, Divine universal mother on expansion Lordless Queen of creation Prakriti, Divine universal energy Lordless Queen of creation lordless queen of universe Mulaprakriti, Cosmic Lingam Divine universal Lord King of creation Haryangarbh, Cosmic Lord Divine universal Lord King of creation Purusha omniscience creator of the 3 world Lord god Shiva, Omniscience destroyer of the 3 worlds Lord God Rudra, Chief of Heavens king and queen of Gods and Goddesses Lord God Indra and lordless Goddess Indrani.

The snake creator Ananta Shesha using the omniscience of the architect of the universe Vishvakarma to direct him knots and scalar energy another aspect of him which manifests as the divine universal energy Mulaprakriti he takes the form of quantum matter Bhumi then accumulation of quantum matter in packets it is also transformed into matter antiparticle particle Kamadhenu because any form of matter is accumulation of quantum node of quantum matter in antiparticle particles then in molecule.

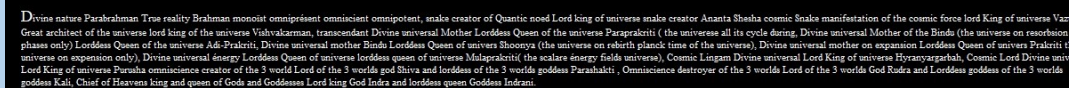

This process of particles mater and antimater borning is manifest as holi Spirit lord god Varuna and holi spirit lordless Goddess Varuni the aspect of the snake creator tht produce that phase of creation.

Spin particles or antiparticles

Divine nature Parabrahman True reality Brahman monoist omniprésnt omniscient omnipotent, snake creator of Quantic noed Lord king of création Ananta Sheha, cosmic Snake Lord King of Creation Vazuki, Architect of the création Lord king of the creation Vishvakarman, transcendant Divine universal Mother Lorddess Queen of the création Dévi, Divine universal Mother on resorbion of the Bindu Lorddess Queen of the création Adi-Prakriti, Divine universal mother Bindu Lorddess Queen of creation Shonya, Divine universal mother on expansion Lorddess Queen of creation Prakriti, Divine universal énergy Lorddess Queen of creation Durga, Cosmic Lingam Divine universal Lord King of creation Hyranyagarbha, Cosmic Lord Divine universal Lord King of creation Purusha omniscience creator of the 3 world Lord god Shiva, Omniscience destroyer of the 3 worlds Lord God Rudra, Chief of Heavens king and queen of Gods and Goddesses Lord God Indra and lorddess Goddess Indrani

Celebrate the holy Lorddess Goddess Santana Lakshmi the goddess of birth she act with Love and its agissant power Lord God Kama and Lorddess Goddess Rati and with the desir the Lorddess Goddess Kamakhya Through Varuna and Varuni giving birth to the Lorddess Goddess Kamadhenu the matter and the antimatter of the cosmos we see Santana Lakshmi giving birth to the matter and the antimatter of the cosmos

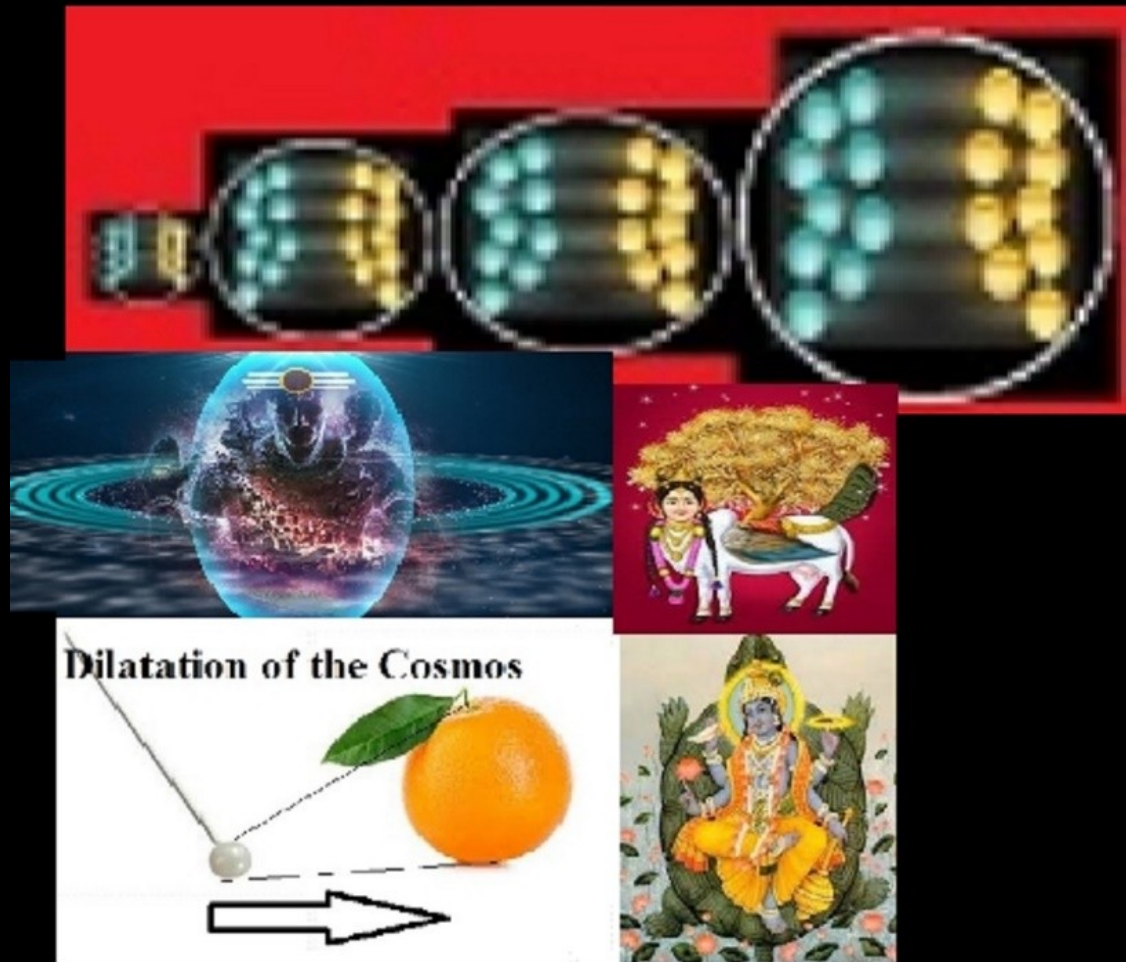

As the gravity reborn Sanat Kumara in the universe the Fighting forces the vitality forces lord god Kartikeya Murugan with Valli his acting power generate creative accretion the lord god Tvashtri and all start to organize around Tvashtri the fighting forces Kartikeya feed Tvashtri with the gravity Sanat Kumara and the space time Lord god Kala Bhairava reborn with lordness goddess Kalaratri it is Jagannath Trine trinity Rudra-Sanat-Kumara-Brahma start with Durga Kushmananda that transforms Brahma to deconformate the 3 worlds (infra-supra and mixed universe) the cosmos from particles size to the size of an orange just because of the gravity Rudra inside Jagannath succeeded with Kali to deconformate from Anasuya and Atri reborn Durvasa the principle of fusion of matter which begins to drink from The creative accretion Tvashtri and with gravity Sanat Kumare merge matter immediately Kala Bhairava and Kalaratri make reborn the creator of matter and antimatter and his wife Varuni all those principles together active Accretion fighting forces gravity vitality forces and Matter fusion take form as Varuna and Varuni the quantum matter is accreted and fused into Spin particles and antiparticles.

It is Dattatreya trine murtie Shiva-Durvasa-Brahma in charge of creation in the worlds that have just acted with Matrika tridevi Adi-Shakti, Lakshmi and Shatarupa

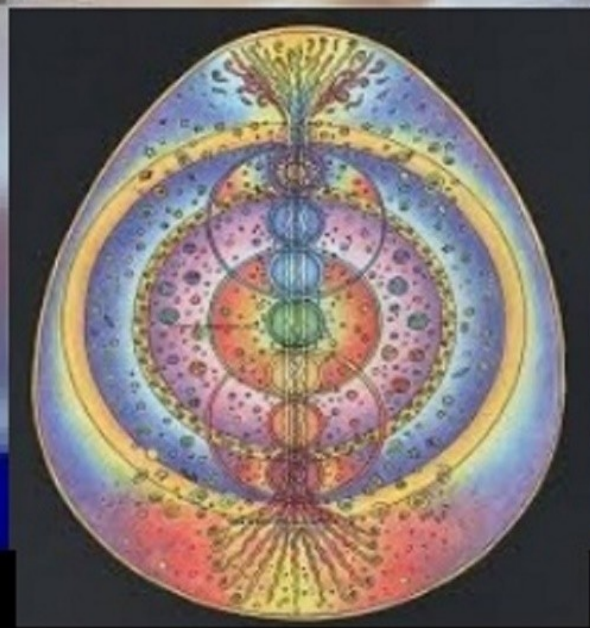

Shiva designs particles and their properties, and with Shakti, he directs the implementation, which is carried out by Adi-Shakti. Their joint work is seen as a matrix at the heart of Ananta Shesha, which takes the form of Lord God Yajna, the articulation of Ananta Shesha into particles and antiparticles of matter. With him, Dakshina represents the abundance of quantum matter in each particle. Dakshina is the portion of quantum matter necessary to create particle matter. Thus, Matrika transforms quantum matter into particle matter, transforming Jagannatha, who, among other things, is Brahma Svayambuvah, the entire common divine nature, which is transformed into matter oscillating with its own oscillation. She Agglutinates Bhumini the quantic earth matter into Kamadhenu the particles/antiparticles earth matter using the creative accretion Lord god Tvastar the higher lord god of the phase, the creative accretion make divine universal energy transmuting into quantic matter then it agglutinate matter into particles antiarticles matter and provoke diversification of quarks and borning of lepton by gluon accretion and finally build hadrons Shiva Adi-Shakti Dattatreya Matrika organise themselves around creative accretion. They first make born matter and antimatter Spin and then Quarks and then after quarks diversification leptons and hadrons.

Divine nature Parabrahman True reality Brahman monist omnipresent omnipotent, snake creator of Quantum coiled Lord king of universe snake creator Ananta Shesha cosmic Snake manifestation of the cosmic force lord King of universe Vazuki, Great architect of the universe lord king of the universe Vishvakarma, transcendent Divine universal Mother Lordless Queen of the universe Parapraliti (the universe all its cycle during, Divine universal Mother of the Budo (the universe on resorption phase only) Lordless Queen of the universe Adi-Prakriti, Divine universal mother Bindu Lordless Queen of universe Shunya (the universe on rebirth planck time of the universe), Divine universal mother on expansion Lordless Queen of universe Prakriti (the universe on expansion only), Divine universal energy Lordless Queen of universe lordless queen of universe Mulapraliti (the scalar energy field universe), Cosmic Lingam Divine universal Lord King of universe Haryanagarah, Cosmic Lord Divine universal Lord King of universe Parulha omniscience creator of the 3 world Lord of the 3 worlds god Shiva and lordless of the 3 worlds goddess Parashakti , Omniscience destroyer of the 3 world Lord of the 3 worlds God Rudra and Lordless goddess of the 3 worlds goddess Kali, Chief of Heavens king and queen of Gods and Goddesses Lord king God Indra and lordless queen Goddess Indrani.

Let's celebrate Lord Turtle God Kurma, an associate of Vishnu Avatar, his manifestation of a particular principle of the universe and cosmos that makes it incapable of collapse.

The cosmos is reborn as bindu without any gravity, and then gravity is reborn, and the process of creating matter and antimatter begins, through the grace of Varuna and Varuni. The mass of the cosmos in the universe increases with the quantity of particles. The Lordless Goddess Kamadhenu increases the destructive omniscience of the three worlds. Lord God Rudra deconfines the universe, which goes from the size of a pinhead to that of an orange. It is filled with spin particles. Lord God Kurma, the tortoise god, and the mass in the cosmos increases exponentially, but no collapse occurs, there is no black hole in the magma of particles with the arrival of Quarks and antiquarks the cosmos soysus the influence of Rudra inflates from the size of an orange to that of the volume of our stellar system and this entirely filled with particles and antiparticles. A gigantic mass because all the rest of the matter is only a combination between all these quarks yet no collapse there is no black hole in the cosmos and that is Kurma the turtle god who carries on his back the creation. Finally Rudra the destructive omniscience of the 3 worlds by combination of matter deconfines the universe he acts through Varuna and Kali through Varuni. Matter diversifies by exchanging gluons, then leptons are born. The volume continues to increase, and so does the mass. Finally, the quarks group together into hadrons, which allows for deconfinement. It is Rudra acting through Kali, Lordless Goddess Kamadhenu. The particles/antiparticles of Earth matter are finished being born from the quantic matter lordless goddess Bhumi Kamadhenu is made of. Its mass is greater than that of the current cosmos because all antimatter and almost all matter will annihilate. Again, Lord God Kurma supports the universe, and there is no collapse; there are no black holes in the cosmos. The Almighty God Kurma is one of the secrets of the universe and an aspect of the cosmic force Vazuki.

Divine name Parabrahma The only Brahman which is complete, without any parts, and is one of the four great powers of the universe, and is the source of all life and matter. The four powers of the universe are: 1. The power of the universe, which is the source of all life and matter. 2. The power of the universe, which is the source of all life and matter. 3. The power of the universe, which is the source of all life and matter. 4. The power of the universe, which is the source of all life and matter.

Let's celebrate the divine universal cosmic linga Hiranagarbha, the king of the universe (more than a god or a goddess is gods and goddesses evolve within the universe, but a king or a queen of the universe is the universe, the cosmos, or both of them). The alchemy of the creation of matter and antimatter takes place in Hiranagarbha, the divine universal cosmic linga. Hiranagarbha is like a sacred cauldron boiling at a very high temperature, containing all the components of matter. The ingredients are incorporated according to the sacred recipe for the creation of particles and antiparticles, and the cauldron fills with particles and antiparticles to the point where there is no free space without matter. Inside Hiranagarbha Spin, quarks, lepton particles and antiparticles are born, inside Hiranagarbha the quarks combine into Hadron, inside Hiranagarbha from the annihilation between quarks and antiquarks then lepton and antilepton light is born.

Spin particles and antiparticles

Architect of the creation Lord king of the creation Yuhvakarma, transcendent Divine universal Mother Lordess Queen of the creation Devi, Divine universal Mother on reabsorption of the Bindu Lordess Queen of the creation Adi-Prakriti, Divine universal mother Bindu Lordess Queen of creation Shomya, Divine universal mother on expansion Lordess Queen of creation Prakriti, Divine universal energy Lordess Queen of creation Lordess queen of universe Malaploriti, Cosmic Lingam Divine universal Lord King of creation Hyaragarbha, Cosmic Lord Divine universal Lord King of creation Parucha omniscience creator of the 3 world Lord god Shiva, Omniscience destroyer of the 3 worlds Lord God Rudra, Chief of Heavens king and queen of Gods and Goddesses Lord God Indra and lordess Goddess Indrani.

Let's celebrate the snake creator Ananta Shesha with a knot on himself he creates the universe Paraprakriti, and loosening this knot the universe expands it becomes universe Prakriti with the trident of the omniscience of the 3 worlds in his hands the creative omniscience Shiva, his faculty to create as well in infra universe as in supra universe where in the mixed level the level of the cosmos but also the destructive omniscience, Rudra, his faculty of growth which allows him to expand thus the universe shapes the cosmos. Around the neck of Prakriti is the cosmic snake Vazuki the cosmic force. The expansion is one of the aspects of the force of the cosmos during the first part of the expansion the universe and the cosmos expands from the size of a particle to that of an orange filling this volume with Spin particles and antiparticles that it gives birth to, then inflates to the size of the volume of our stellar system filling this volume with Quarks and antiquarks, then it expands the volume of our stellar system to 300,000 light years in volume. It is the force of the cosmos Vazuki that we contemplate but we also contemplate Purusha while his universal divine aspect becomes Prakriti Purusha begins to grow developing a body of matter and antimatter.

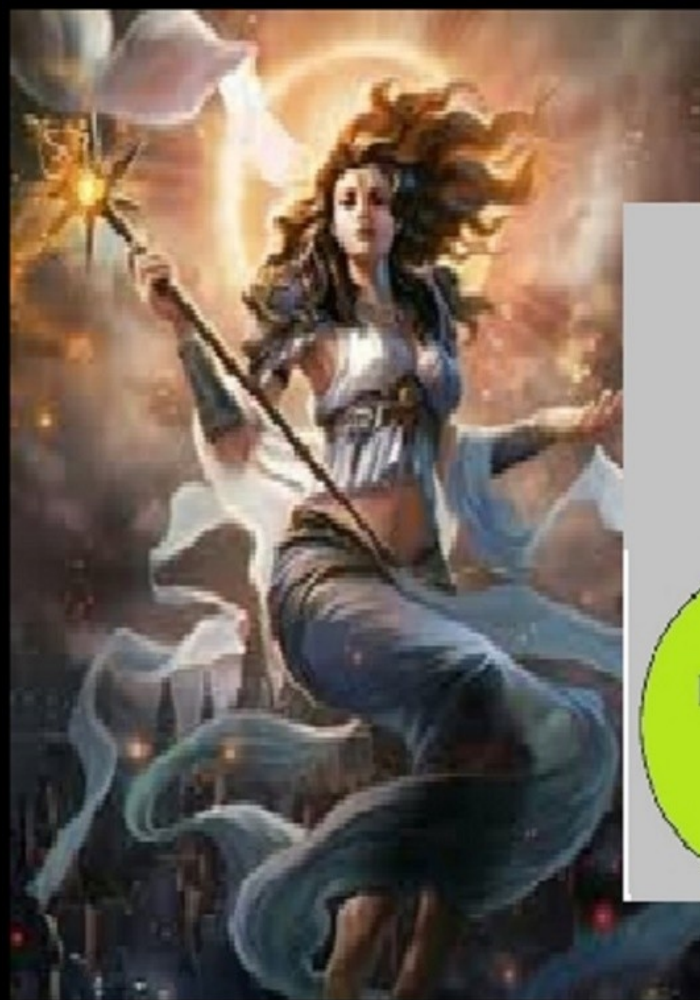

The Lingam Cosmic Hiranyargarbha is now Prakriti divin universal with her creative capacity Dattatrey
Purusha also inside Hiranyargarbha can now expend developping material body

Divine nature: Parashraman True reality Brahman monist omnipresent omniscient omnipotent, snake creator of Quantic need Lord king of creation Ananta Shesha, cosmic Snake Lord King of Creation Vamshi, Architect of the creation Lord king of the creation Vishnu akarma, transcendent Divine universal Mother Lordless Queen of the creation Devi, Divine universal Mother on recreation of the Bindu Lordless Queen of the creation Adi Prakriti, Divine universal mother Bindu Lordless Queen of creation Shomya, Divine universal mother on expansion Lordless Queen of creation Prakriti, Divine universal energy Lordless Queen of creation lordless queen of universe Mulaprakriti, Cosmic Lingam Divine universal Lord King of creation Hiranyagarbha, Cosmic Lord Divine universal Lord King of creation Purusha omniscience creator of the 3 world Lord god Shiva, Omniscience destroyer of the 3 worlds Lord God Rudra, Chief of Heavens king and queen of Gods and Goddesses Lord God Indra and lordless Goddess Indrani.

From Kushmananda Eye Come out Mahasarasvati Mahalakshmi and Mahakali and from Bindu unification of the 4 basic interaction start the separation of the interaction and the process of Creation
Part of Brahma true reality in all what exist at that moment took the form Hiranyagarbha the Cosmic Lingam but honestly Hiranyagarbha and Brahma are 2 different people Lords and From His Finger Come out the 4 Kumara expression of the wanting to experiment the process of creation the Swayambhuva Manu the original manu (principle Creator represented also as the caduce) and then the Prajapatis (principle creator of planets is the translation) Marishi, Atri Rishi, Angiras Rishi, Pulaha Rishi, Kratu Rishi, Pulastya Rishi et Vashishtha. and Prachethasa, Bhrgu, Narada Muni, Daksha Kashyapa
Then Brahma through Hiranyagarbha make Born Shatarupa the aspect matricial of Mahasarasvati which will use all the potentiality Brahma pashupatie concentrated as Hiranyagarbha to experiment the process of creation
"I generate Shatarupa expression of the matricial aspect of the potentiality Hiranyagarbha Bahma the Potential Brahma through Hiranyagarbha "Shatarupa come out and the potential Brahma of the lingam look at her in all direction, at that moment the potential Brahma of the lingam seem to have 5 Heads one for all direction the place of the Bindu original place and the South North East West during the phase of dilatation and then inflation and then expansion and this is the story of the process of creation particles and antiparticles come out annihilate creating light which accumulate inside the lingam and then molecules which liberate space inside the lingam and the light use the space to get out from the lingam
Shatarupa will make Born all the potentiality Creator of the universe expression of diversity of potentiality disponible to create by combination but it is the expression of the Lingam Hiranyagarbha
From her come Prasuti sometime called Asikini part of the (the origine of all river) which make born Diti the principle Nebulae creator of Galaxies and Aditi the principle Nebulae creator of Star system and of course Sati the Dakshina (daughter of Daksha) which is power agissant of the aspect destroyer of the omniscience creator of the 3 worlds Rudra.

Celebrate the Lord God Dharma he is the manifestation of the Hindu kingdoms of laws and mechanisms that rule the universe. he feeds on the Lordless Goddess Dhyana Lakshmi wisdom knowledge manifested as goddess Lordless level of holiness

Dharma feeds on Vidhya because the rules depend on what is and not on what is not when a Data which was not come to be it finds its place its balance in relation to what already existed and regulates them must then integrate it to function properly so before gravity is reborn there is none and therefore the universe does not work according to gravity but when gravity is reborn then Dharma the laws and mechanism of the universe l 'integrates with all the changes it implies and the cosmos expands the same when the strong interaction is reborn as well as when the electromagnetic and weak nuclear are reborn each of the 4 represents Data in the sense of knowledge which is involved in it this aspect of them is Vidhya and when Vidhya changes in the universe Dharma follows it the high temperature (the Lord God Agni) will thus modulate from a highest zenith to a cold marking the absence of agni at the Big Rip and this temperature involves data of knowledge which modifies the temperature rules of the bindu no mechanism to create or destroy matter no other matter than Quantum the Holy Lordless Goddess Bhumi when the temperature begins to drop authorized creation process. but no mechanism possible to make molecules. At the start the interactions dissociate and there are spin particles and antiparticles of matter but their lifespan is short (when they are not annihilated by their opposite matter antimatter) this longevity will increase and that is why the particles will change to give Quarks lepton ... this longevity is the Lord God Dhanvantari who is the Grace it evolves because Dhanvantari will manage to put more water of life (Amritaà in each particle and antiparticles and this is an expression Mechanism of Dharma in this phase of the Big bang which evolves according to Vidhya the data the raw knowledge that integrates the increasing aptitude of Dhanvantari. as of Bhumi matter Quantum one will pass to Kamadhenu matter Particles and antiparticles but because the knowledge registers a temperature Agni too high there is no mechanism to create molecules before the temperature does not fall again

Divine nature Parashakti is True reality. Let's celebrate the temperature during the phase creation of matter and antimatter. Lord god Agni burned at 10^{32} Kelvin when lord god Atri the cold the frigorific element reborn and grow up colling down the temperature by the grace of Rudra Kali and Sati who deconfinate the space time Kalabhairava working through Kalaratri the power reorganosator of the space time, the more the space time volume grow up stronger is lord god Atri the refrigerant element to cool down the temperature and Atri drive Agni to the temperature 10^{28} Kelvin. At the Passage of Atri it is Anasuya who influences the environment of her husband and Anasuya brings the universe to a transformation allowing Lord God Maharishi to revive the strong interaction Lord God Sanatana Kumara with Sanatana Kumara Varuna and Varuni can now create quarks and antiquarks particles. Space time Kalabhairava inflated from the size of an organ to that of our star system, and Atri drive Agni from 10^{28} K to 10^{15} K.

Divine nature Parabrahman True reality Brahman monoisit omnipresent omniscient omnipotent, snake creator of Quantic noed Lord king of universe snake creator Ananta Shesha cosmic Snake manifestation of the cosmic force lord King of universe Vasuki, Great architect of the universe lord king of the universe Vishvakarman, transcendant Divine universal Mother Lorddeas Queen of the universe Paraprakriti (the universe all its cycle during, Divine universal Mother of the Bindu (the universe on resorbsion phase only) Lorddeas Queen of the universe Adi-Parakriti, Divine universal mother Bindu Lorddeas Queen of universe Shooriya (the universe on rebirth planck time of the universe), Divine universal mother on expansion Lorddeas Queen of universe Prakriti the universe on expansion only), Divine universal energy Lorddeas Queen of universe Lorddeas queen of universe Malaprakriti (the scalar energy fields universe), Cosmic Lingam Divine universal Lord King of universe Hyanyagarabah, Cosmic Lord Divine universal Lord King of universe Puruha omniscience creator of the 3 world Lord of the 3 worlds god Shiva and Lorddeas of the 3 worlds goddess Parashakti , Omniscience destroyer of the 3 worlds Lord of the 3 worlds God Rudra and Lorddeas goddess of the 3 worlds goddess Kali, Chief of Heavens king and queen of Gods and Goddesses Lord king God Indra and lorddeas queen Goddess Indrani.

Let's celebrate the ebirth of interactions and the temperature Angi during the process Big bang creator of the universe pahse 2 creation of all the matter and antimatter by Holy spirit lord god Varuna and Holy spirit lorddes goddess Varuni. lord god Maharishi(ishvara deva Maharishi) break down the Electro nuclear force that remains after the rebirth of Gravity this Electronuclear force transmutate into Electro Weak force the goddess of Birth lorddess goddess Santana appear in the universe through rebirth of the Stong nuclear interaction lord god Sanatana reborn. The omniscience destroyer of the 3 worlds Rudra and his acting power destroyer of the confinement inside the 3 worlds Kali make the space time Kalabhairava and his acting power Kalaratri expending from the size of an orange to the volume size of our star system. the larger and larger the volume of the universe and cosmos cools down, the global oscillation is distributed over a larger volume and the agitation in the universe and the cosmos is therefore distributed over a larger volume, the calorific element lord god Agni decreases in intensity and goes from 10^{28} Kelvin to 10^{15} Kelvin gradually Rudra and Kali are in space time elements of the faculties of Kalabhairava and Kalaratri and they are the ones who lower the temperature of Kalabhairava and Kalaratri by expanding then inflating then expending their volume of space time and Rudra with Kali by being the faculty of deconfinement in Kalabhairava and Kalaratri. the process of deconfinement of scalar energy to quantum matte then to particles antiparticles driven by Rudra nd Kali get the benefit of Sanatana Kumara the strong nuclear interaction that make possible a stronger agglutination of matter into particles and a longer lifespan the agglutinations can remain welded together longer and more strongly Varuna and Varuni using the creative accresion Tavshitar that Kartikeya the vitality forces the fighting forces that are celebrated as god of war. Quantic matter aglutinate into Gluon and gluon agglutinate into quarks and antiquarks particles.

for Purusha the cosmic aspect is the cosmos. Purusha is the part of universe and cosos that move and transform within Hiranyargarbha Vishvakarmn is the architecture of Prakriti the architecture of the divine universal aspect of Hiranyargarbha and Purusha. In the Hand of Prakriti, the trident symbolizes the two types of omniscience of the three worlds, with the destructive one: Rudra, Kali, and Sati. Prakriti's faculty to grow. She produces her growth and makes the cosmos grow. With the omniscience of the creator of the three worlds: Shiva and Adi Shakti. Prakriti's faculty to create in the three worlds. Prakriti creates.

The creative process of matter and antimatter begins with the rebirth of gravity. Prakriti expands the cosmos, expanding itself as well (the universe), creating all the matter of the cosmos. She acts and we see the cosmos Vazuki force around her neck, the cosmos in the aspect of her Vazuki force expands from the size of a particle to that of an orange full of spin particles that she build with Sanata Kumara the gravity one of her faculties and antiparticles that he make born then to that of our stellar system filled with quarks and antiquarks that she build with Sanatana Kumara the strong nuclear interaction another of her facultie then reaches 300,000 light years volume filled first with quarks then with Sananda Kumara the electromagnetic interaction and Sanaka Kumara the Weak nuclear interaction she diversifies quarks types and make born leptons and finally the quarks combine into Hadron before the two great creative amplification of light all of them that he make born. Prakriti add to Vazuki inside Hiranyargarbha we see Purusha aspect of Hiranyargarbha that grow up full of spin dilating from particles size to an orange size then to the volum of our star system full of quarks and then to 300 000 years light volum full of quarks and leptons and then quarks combine into Hadron that fill the volume Purusha is the universe and the cosmos moving transforming inside Hiranyargarbha

At the beginning of time, both devatas and asuras were mortal and slowly weakening. So, despite their rivalry, Vishnu proposed to both sides that they join forces to churn the sea of milk and extract amrita, the elixir of immortality, or more precisely, of non-death.

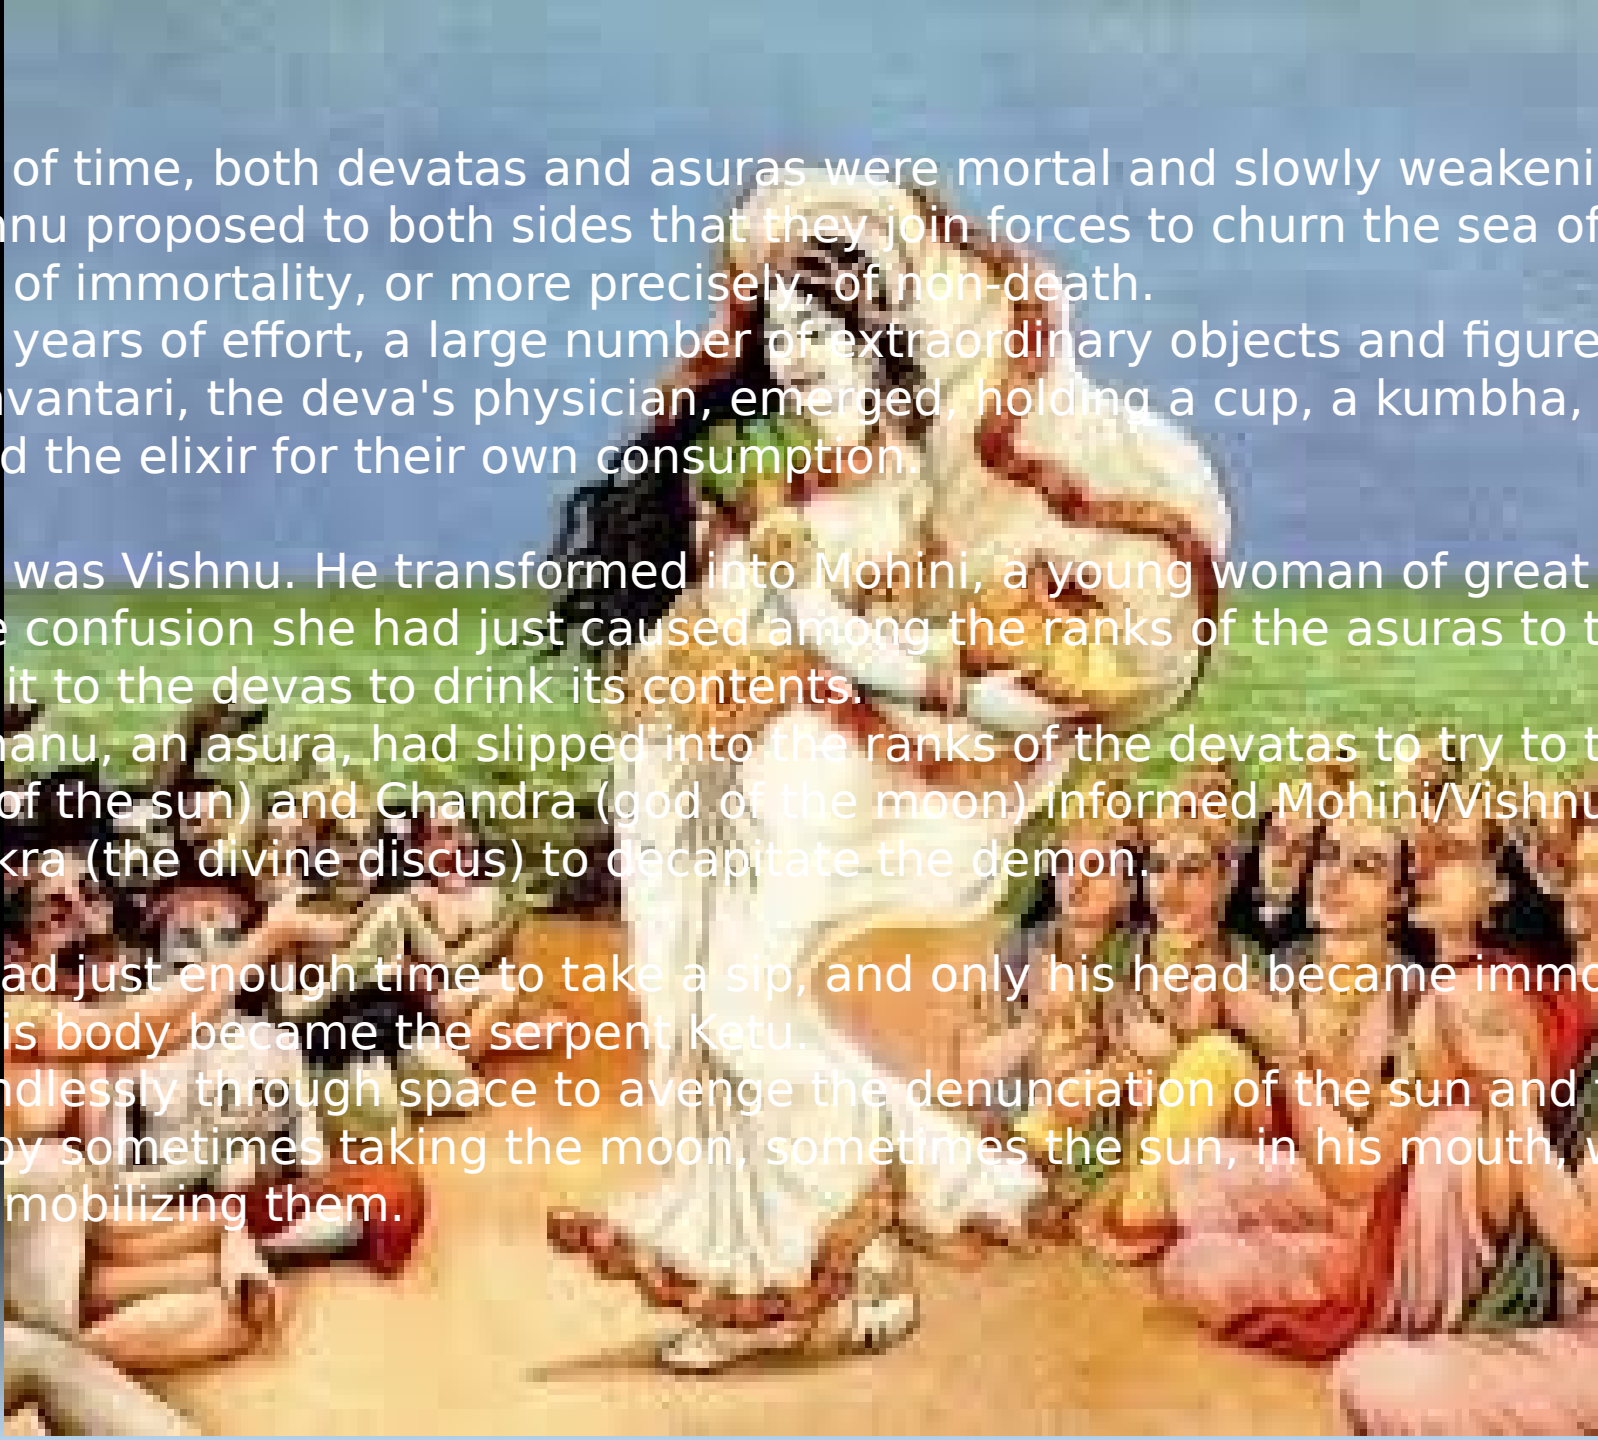

After a thousand years of effort, a large number of extraordinary objects and figures were extracted, and finally, Dhanvantari, the deva's physician, emerged, holding a cup, a kumbha, filled with amrita. The asuras seized the elixir for their own consumption.

The first to react was Vishnu. He transformed into Mohini, a young woman of great beauty who took advantage of the confusion she had just caused among the ranks of the asuras to take the cup from them and return it to the devas to drink its contents.

However, Svarbhanu, an asura, had slipped into the ranks of the devatas to try to take advantage of this. Surya (god of the sun) and Chandra (god of the moon) informed Mohini/Vishnu, who used the Sudarshana Chakra (the divine discus) to decapitate the demon.

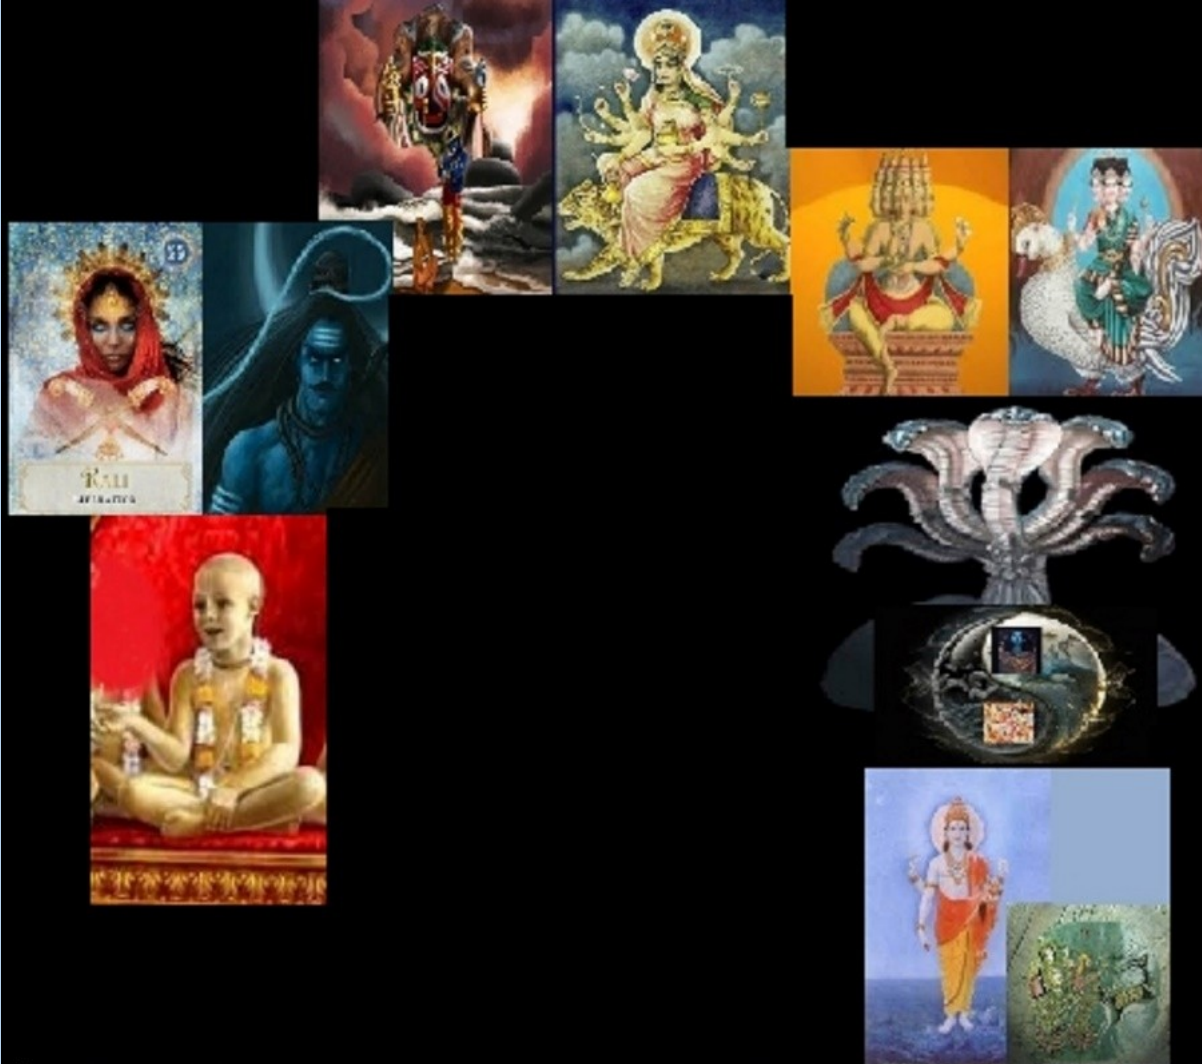

But Svarbhanu had just enough time to take a sip, and only his head became immortal under the name of Rahu. His body became the serpent Ketu.

Rahu wanders endlessly through space to avenge the denunciation of the sun and the moon. He causes eclipses by sometimes taking the moon, sometimes the sun, in his mouth, without ever succeeding in immobilizing them.

Let's celebrate lord god Jagannāth trine murti Rudra/Vishnu-Vibhu /Brahma the common nature transformed by the omniscience destroyer of the worlds for deconfinement inside the universe on 2nd phase big bang strong nuclear interaction lord god Sanatana reborn Jagannāthā sends his destructive power of the 3 worlds lordless goddess Durga Kushmananda tridevi Kali/Lakshmi/Sarasvati. unconfining the ambrosia nectar Lord God Soma responsible for the longevity of creatures who during the 1st Manvantara were confined, difficult to extract and therefore could not provide great longevity We then see Rudra, the omniscience destroyer of the 3 worlds, using Lord God Sanatana the strong nuclear interaction to improve the extraction capacity of Soma. He sends Kali, his active power, destroying the 3 worlds, to work on Brahma/Sarasvati in order to obtain more ambrosia nectar. We then see the snake creator Ananta Shesha, the very high king of the universe (central axis) around the night Lord Goddess Ratri and darkness Lord God Vibhu, the god avatar of the god Vishnu in this manvantara (it is him that we contemplate to see Vishnu in this phase, not in the other phases). Loosen the knot that traps Soma, the ambrosia nectar. darkness Vibhu then serves the knot that it produces around the night Ratri so that from it we can obtain more ambrosia nectar which allows the lord god Dhanvantari to increase the longevity of the creatures from this moment we obtain Quarks and antiquarks particles whose lifespan is much longer than before the spin the matter clumps together better forming lumps denser matter form of Vibhu the Darkness (the strong density are associated with the darkness in the cosmos) which allows the night Ratri to obtain a greater longevity (Soma the ambrosia nectar) because the strong interaction lord god Sanatana allows the accrescer matter to bind with a greater force.

Goddess Mohini is the only female avatar of Prabhu Sri Vishnu—she used her supernatural beauty and charm to deceive Bhasmasur into killing himself. Of all the avatars, Mohini is the only female avatar. But the most seductive of all. She is depicted as an enchantress who drives lovers mad, sometimes leading them to their doom. Unlike the Dasavataras, who appear on Earth for a certain period, Vishnu takes on Mohini's avatara for many periods. In the original text, Mohini is simply referred to as a female, enchanting form of Vishnu. In later versions, Mohini is described as the Maya (illusion) of Vishnu (Mayam Ashito Mohinim). Almost all of his tales have this element of deception. Most were those who led the asuras (wicked people) to their deaths. Bhasmasur was such an Asura. Bhasmasur was a devotee of Lord Shiva (Well, Lord Shiva had no restrictions on who could worship him. He was known as Bholenath - easily pleased). He used to perform long penances to please Shiva. Shiva, being pleased with his austerities, granted him one wish. Bhasmasur, asked for the only obvious wish - immortality. However, this was not part of Shiva's "salary". So, he asked for the next coolest wish - the license to kill.

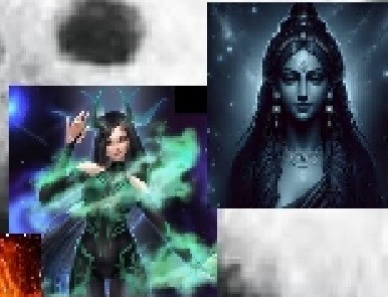

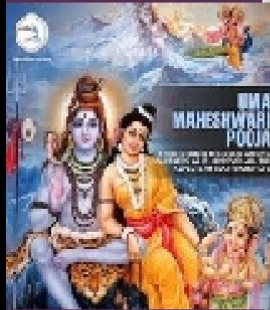

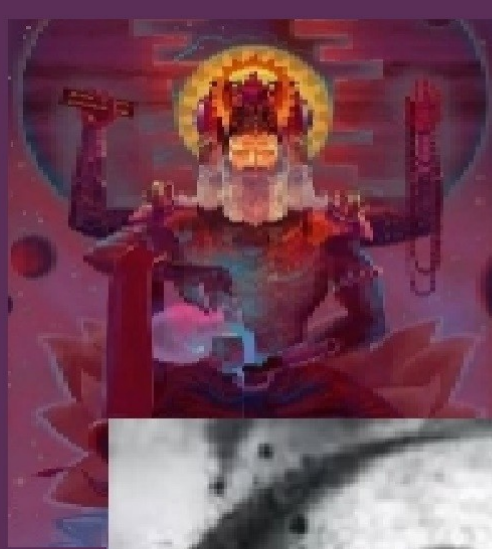

A fraction of God Brahma/Sarasvati's common divine nature is transforming into nectar of ambrosia, the Lord God Soma. Part of this common divine nature of God Brahma/Sarasvati is the night, the goddess Ratri, and another is the darkness, Lord God Vibhu. Shiva and Adi-Shakti go to transform Brahma, working more specifically on this night aspect, interacting with Darkness, they create a knot matrix for Ananta Shesha. At the Heart of Ananta Shesha, then we see Lord God Dhanvantari, dispenser of ambrosia and one of the avatar gods of God Vishnu with Lakshmi. He is the articulation of the knot that Ananta Shesha produces, providing longevity to the creatures that are born. He uses Yami and extracts Soma. It is Dattatreya Trine Murti Shiva that we see and with it may weave longevity to the creatures of the interaction between Vibhu the darkness and Ratri the night of their interaction is reborn lordless goddess Yami from where the nectar of Ambrosia is extracted (the god Soma)

Let's celebrate Lord Turtle God Kurma, an associate of Vishnu Avatar, his manifestation of a particular principle of the universe and cosmos that makes it incapable of collapse.

The cosmos is reborn as bindu without any gravity, and then gravity is reborn, and the process of creating matter and antimatter begins, through the grace of Varuna and Varuni. The mass of the cosmos in the universe increases with the quantity of particles. The Lordess Goddess Kamadhenu increases the destructive omniscience of the three worlds. Lord God Rudra deconfines the universe, which goes from the size of a pinhead to that of an orange. It is filled with spin particles. Lord God Kurma, the tortoise god, and the mass in the cosmos increases exponentially, but no collapse occurs. there is no black hole in the magma of particles with the arrival of Quarks and antiquarks the cosmos soys the influence of Rudra inflates from the size of an orange to that of the volume of our stellar system and this entirely filled with particles and antiparticles. A gigantic mass because all the rest of the matter is only a combination between all these quarks yet no collapse there is no black hole in the cosmos and that is Kurma the turtle god who carries on his back the creation. Finally Rudra the destructive omniscience of the 3 worlds by combination of matter deconfines the universe he acts through Varuna and Kali through Varuni. Matter diversifies by exchanging gluons, then leptons are born. The volume continues to increase, and so does the mass. Finally, the quarks group together into hadrons, which allows for deconfinement. It is Rudra acting through Kali, Lordess Goddess Kamadhenu. The particles/antiparticles of Earth matter are finished being born from the quantic matter lordess goddess Bhumi Kamadhenu is made of. Its mass is greater than that of the current cosmos because all antimatter and almost all matter will annihilate. Again, Lord God Kurma supports the universe, and there is no collapse; there are no black holes in the cosmos. The Almighty God Kurma is one of the secrets of the universe and an aspect of the cosmic force Vazuki.

Let's celebrate the Indian Kingdoms, Kings and Queens of the Universe.

Let's celebrate the cosmic lord divine universal Purusha inside the cosmic divine universal lingam Hiranyargarbha and the cosmic snake Vazuki.

Hiranyargarbha is the volume of the universe and cosmos as one person. Lord King of the Universe, Purusha is what moves and/or transforms in the universe and the cosmos. Thus, Purusha is a part of Hiranyargarbha, and behind Purusha's ego, we find Hiranyargarbha. A part of Hiranyargarbha transforms from scalar fields into universal divine energy, then into quantum matter, and finally into particulate matter. This part that transforms is Purusha, both universe and cosmos, but in another aspect, comparable to a soul that creates a body for itself to be born with the help of the food and genome of its parents, and very creative during the entire Big Bang process, at least. This Faculty of Hiranyargarbha to give birth in him particles and antiparticles is Varuna and his creative power Varuni and this capacity of Purusha to transform a part of him into matter particles and antiparticles is Varuna and his wife his creative power Varuni. Should we specify Purusha does not die at the moment of the birth of the sky and the earth it is his capacity to create from the scalar field which dies, neither Purusha nor Hiranyargarbha are holy spirit beings, they are holy ghana beings (there is always a universe, the universe is therefore not spirit, there is always a cosmos, the cosmos is therefore not spirit, there is no longer a big bang in the universe, the Big bang, creator of the universe is spirit) so inside Hiranyargarbha, particles and antiparticles are born, first Spin, then quarks, then leptons and hadron, before large ahinilation, it is Purusha who forms his body in the cosmos inside the lingam Hirabnyargarbha, his body is first made of spin, then quarks, and finally lepton, particles and antiparticles, and also after the leptons, hadron, before developing photon, light particles, during this entire phase of formation of Purusha's body, the universe and the cosmos go from the size of a particle to that of an organ, then from the volume of our star system, and finally 300,000 light years in volume. We admire Purusha in this phase because it shows him as very creative and powerful, growing from the size of a particle to 300,000 light years, but what we are seeing is happening in the cosmos; we even believe that he is born in the cosmos by making a body of matter. Outside the cosmos, it is Vazuki, the cosmic force. What we admire about Purusha is a considerable force that is seen in the cosmos; it is Vazuki, the cosmic force

000/years/light/volume the quarks find themselves weakened by this expansion and combine into hadron while the first great amplification between quarks and antiquarks begins then the second between leptons and antileptons.

Let's celebrate the Waters of the universe: the waters above lordless goddess Ganga where all types of matter takes its source, and the waters below lord god Shantanu the brain of the universe where all forms of active intelligence take its source. They create matter and antimatter, inside the Divine universe. Inside Prakriti the universe expanding, inside Mulaprakriti the divine universal energy that comes from Prakriti oscillation on expansion inside Hiranyagarbha the cosmic lingam divine universal and inside Purusha the aspect of Hiranyagarbha that moves and transforms during the process creator/destroyer of the cosmos. The Waters of the universe take place inside. Prakriti they are 2 aspect of the divine universal energy: Mulaprakriti inside Prakriti the waters above origin of all shape for matter and the waters below origin of all intelligence that build the cosmos. Shiva, the omniscient creator of the 3 worlds using the knowledge lordless goddess Vidya, creates intelligence capable of creating matter and antimatter, as in Shantanu, the brain, creating neuronal connections to build intelligence made to create matter and antimatter, and it is Varuna, who was born inside the waters below. Varuni, born a little after gravity, is reborn. Astral energy lord Uchchaihshravas connects Shantanu to Ganga, making their interaction with each other possible. The universal divine energy that transmits the brain of the universe in Shantanu, thus gives birth to the intelligence to create matter and antimatter. Varuna, as well as the ability to act, begins to transform Ganga, giving him powers. Sanata Kumara's power of gravitational attraction, and then Power of Strong nuclear interaction Sanatana Kumara to link stronger cluster of quantic matter into particles and it is quarks and antiquarks that born. The universe Prakriti Mulaprakriti then begins to create matter and antimatter Quarks in the cosmos and we then see in Hiranyagarbha the cosmic lingam divine universal Purusha move, transforming first of all his divine universal aspect universe in expansion in the waters below he acquires the omniscience creator of matter and antimatter Varuna in his brain Shantanu and in the waters above Ganga he begins to develop matter and anti spin and then quarks and antiquarks his cosmic body whereas he was a bubble of vacuum the size of a particle the two come to mingle at the level of the cosmos Purusha obtains faculties to act Varuni and his body begins to fill with Spin particles and antiparticles growing up from particles size to the volume of an orange and then quarks and antiquarks growing up to the volume of our star system it begins its growth making Hiranyagarbha grow transforming his interior. Purusha is what we see moving from Hiranyagarbha

Divine nature Parashuraman True reality Brahman manifest omnipotent-omniscient-omnipresent, male creator of Quantum world Lord ling of universe male creator Ananta Shesha cosmic male manifestation of the cosmic force Lord King of universe Vamshi Great architect of the universe Lord ling of the universe Vishvakarma, transcendent Divine universal Mother Lordless Queen of the universe Parashakti the universe all in cyclic during, Divine universal Mother of the Hindu (the universe on evolution phase only) Lordless Queen of the universe Adi-Prakriti, Divine universal mother Hindu Lordless Queen of universe Shreeya (the universe on rebirth plane/era of the universe), Divine universal mother on expansion, Lordless Queen of universe Prakriti the universe an expansion only, Divine universal energy Lordless Queen of universe Goddess queen of universe Mahadevi, the sacred energy Hindu universe, Cosmic Lingam Divine universal Lord and King of universe Hydrant jagatguru, Cosmic seed Divine universal Lord King of universe Parashakti an timeless creator of the 3 world Lord of the 3 worlds god Shiva and Goddess of the 3 worlds goddess Parashakti, Omniscience destroyer of the 3 worlds Lord of the 3 worlds God Rudra and Lordless goddess of the 3 worlds goddess Kali, Chief of Heavens ling and queen of Gods and Goddesses Lord ling God Indra and Goddess queen Goddess Indrani.

Let's celebrate the lord god Yajna, the god avatar of the god vishnu in the 1st part of the phase creation of matter and antimatter during the whole first Manvantara Vishnu is Shiva-Shakti in creative omniscience (trine murti shiva not trine murti Rudra) and during this phase Parashakti is Adi-Shakti Shiva is the shiva of the creation of matter and antimatter the matrix of Yajna is therefore Shiva/Adi-shakti the articulation of the knots that Ananta shesha produces to knot itself into matter particles and antiparticles.

Let's celebrate the Waters of the universe the waters above lord/ress goddess Ganga where all types of matter take their source, and the waters below lord god Shantanu the brain of the universe where all forms of active intelligence take their source. They create matter and antimatter. It is the very high king of the universe the snake creator and king of the universe Ananta Shesha who knots them together making them interact making them creators. They knot in Ganga becoming matter it knots in Shantanu creating new faculties becoming the gods. Shiva and Adi Shakti use the knowledge lord/ress goddess Vidhya inside Shantanu the waters below give birth to the gods and goddesses, they create intelligence in the brain that is Shantanu a bit like creating the neural connections allowing intelligence in the brain thus making shantanu becomes omniscient omnipotent and they shape Ganga. By the grace of lord/ress goddess Vidhya the knowledge, they Create the creative omniscience of matter and antimatter Holi spirit lord god Varuna who is then the intelligence of Shantanu to create matter and antimatter then when they create Maharishi this one makes gravity reborn and from the top of the waters above Ganga Indra made Ganga descend the waters above to the level of the waters below using Airavata the elephant god of Indra then lord god Uchchaisravas is reborn the manifestation of the Astral energy which connects the waters above to the waters below making it possible for Shantanu to act on Ganga and vice versa. Shantanu then interacts with Ganga with his creative intelligence Varuna he transforms a part of what she is into matter and antimatter this interaction is possible only by the grace of Uchchaisravas, Varuni is reborn with Gravity she is the holy spirit creative power of matter and antimatter the active power of Varuna it is she who accomplishes the transformation under the action of Ganga reacting to gravity, quantmic matter agglutinate as cluster of quantic Brane becomming bigger and bigger untill becoming particles or antiparticles. the volume begins to expand and the temperature Agni drops becoming favorable to the creation of matter Varuni reborn and then uses Tvashar the creative accretion with Kartikeya valli the forces of vitality of combativeness, and Sanat Kumara gravity accompanied by the gods of love Kama Rati and u desire Kamakhya agglutinating the quantum matter in clusters bigger and bigger until it becomes particles and antiparticles Spin. When the strong nuclear interaction lord god Sanatana Kumara reborn Ganga get from Shantanu a new power to link stronger matter into cluster untill particles and antiprticles quarks and antiquarks born that way.

Celebrate Uchchaihshravas it is he who makes possible the interaction between Ganga and Shantanu it is this knot that Ananta Shesha produces between Ganga and Shantanu which produces the mixed waters.

Divine universal Mother Prakriti is then the universal aspect of Purusha Ananta Shesha the snake creator is he who by a quantic universe node inside which he makes a cosmic quantic node thus produced and Purusha and Prakriti, their reality Purusha is at this moment of the cycle of the universe until the end of the Big Rip cosmic master Prakriti Divine universal (universe in expansion) Purusha (universe and cosmos in expansion) gravity is reborn in the cosmos and the process of creation of matter begins with the birth of Spin particles and antiparticles the cosmos dilates and then inflates which come first to produce a body of matter in Purusha then it is the quarks and antiquarks the cosmos expands which come to be born to make their physical body. it is the potential Prakriti universe that makes this possible before Prakriti it was Shanya bindu universe and it was impossible although other things now impossible were possible. in the cosmic lord Purusha Divine universal Prakriti it is the snake creator Ananta shesha who knots on himself from the omniscience of the great architect of the universe VishvaKarmam and thus Ananta Shesha becomes all the particles and antiparticles that come to be born a bit of him knotted in particles or antiparticles

Celebrate the great architect of the universe lord king of universe Vishvakarmam (more than what a god or a goddess is Reminder gods and goddesses live and evolve inside the cosmos and the universe but king and queen of universe are the cosmos or/and the universe and for for the snake creator the cosmos the universe and what give reality to them 2 the faculty the infinite outside of the universe and the cosmos to noed and create that way (univers cosmos mater antimater space and time)

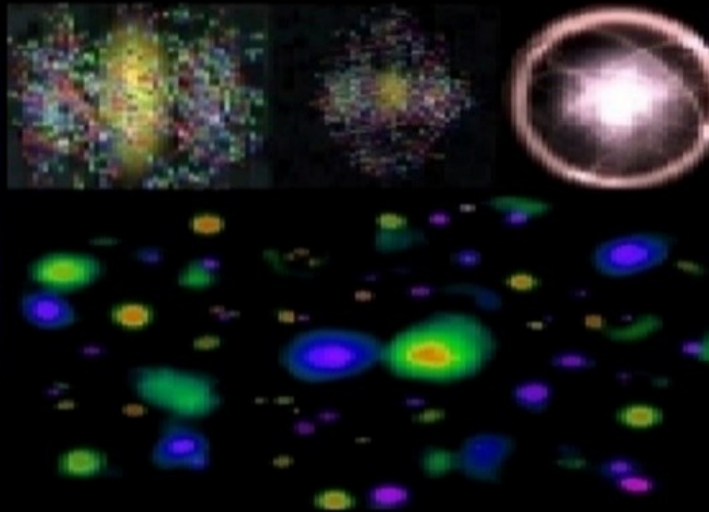

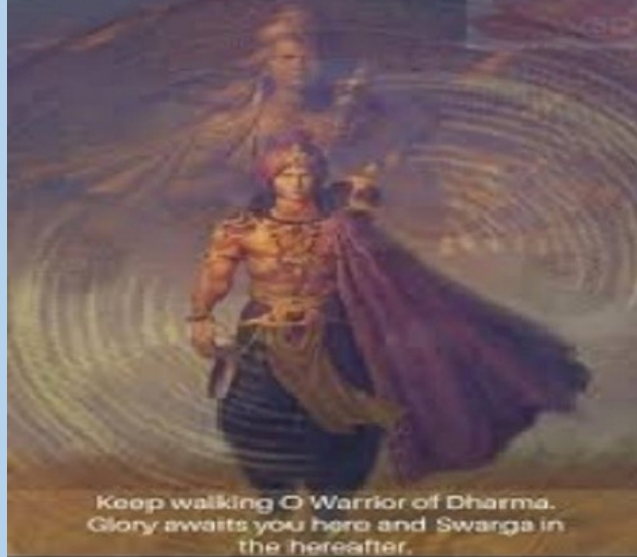

Celebrate the great architect Vishvakarmam with the snake creator Ananta shesha another king of universe.

on expansion which means the divine cosmic lingam Hiranagarbha who's energy is Mulaprakriti the scalare energy field universe, on expansion Prakriti the universe on expansion Vishvakarmam drive Ananta Shesha to noed as particles and antiparticles and later molecular inside Prakriti Ananta Noed driven by Vishvakarmam the intelligence of the universe and the cosmos to make born mater and antimater noeding quantum matter and then particles antiparticles matter into more elaborate and into combination of particles and antiparticles then to get molecular. Those noed build particles antiparticles whi come out as the body of Purusha the cosmic lord divine universal in the cosmos.

Purusha's body in the cosmos was nothingless (a drop of void in the void infinity that takes place outside of the universe and the cosmos) and come out spin quarks lepton hadron and later molecular.

the expression this phase of Ananta shesha noeding inside Prakriti driven by Vishvakarmam that make born all the matter and antimatter of the cosmos is manifested as Holy spirit lord god Varuna and Holy Spirit lordess goddess Varuni the omniscience creator of all the matter and antimatter

Celebrate Lord God Dharma the manifestation of universal order

At the time the lord God Maharishi succeeded in breaking the electroweak force into 2 unified ones, reviving the strong nuclear interaction the lord God Sanaka Kumara

Dharma is always losing balance (there was no gravitational attraction in the universal order and now we have to deal with gravity and now with the strong nuclear interaction in addition) it shifts from the production of spin particles and antiparticles of very short longevity towards the production of quarks and antiquarks of great longevity because the arrival of the strong nuclear interaction allows the improvement of the extraction and manufacture of Soma the nectar of life responsible for longevity.

The birth of Skanda Kartikeya Murugan the subramaniam takes place a little before the beginning of the creation phase of matter and antimatter or just when gravity Sanat Kumarere has in the cosmos.

It is the work of Jagannatha trine Gods trine murtie Rudra. (trinity of destructive omniscience). both Rudra Vishnu Brahma and his companion Durga Skanda Matta triune goddesses Kali Lakshmi-Shri and Sarasvati-Brahmani.

Reminder Skanda Kartikeya Murugan bit the Subramaniam the manifestation of the forces of combativity of vitalities that we celebrate as the God of War. is reborn from Rudra at the Big Bang and from Shiva at the start of the big Crunch, this is why from Skanda matta Kali aspect at the big bang and from Shakti-Parvati at the start of the big crunch (Parvati is only in resorption of the big crunch)

Celebrate the love divinities in the process big bang creator of the universe

On Bindu phase Love divinities reborn from the god and the goddess of Full and void polarity 2 aspect tht we can contemplate also through Brahma. and Kama the Love With Rati bhis agissant power Kamakhya the desir activate to make the population of the bindu to be as one single in unity but Shiva make reborn Gods goddesses and other population and the Cosmos start to be too small for that overpopulation. Love Kama reaches nonsense working to remain in the Bindu state is no longer loving others return to Shiva Shiva Burn him turing him to ashes, Shiva transmutate the love to adpate him for the process deconfinement few after Kamakhya start to impulse the desir to exist and to born for living the experiment to be a creature. Lord god Maharishi (Ishvara déva Maharishis) Broke down the electroweak force immediatly Lord god Sananda (Ishvara déva Sanatana) the electromgnetic interaction and Lord god Sanaka(Ishvara déva Sanaka) the weak nuclear interaction the quarks and antiquarks diversify Lepton antilepton star to born the cosmos pass from the volum of our star system to the volum size 300 000 years light

Vishvarupa the gods unfold in the process of creation and give birth to matter, antimatter and then molecular matter, expanding the universe and the cosmos.

Let's celebrate the Indian Kingdoms, Kings and Queens of the Universe.

Let's celebrate the cosmic lord divine universal Purusha inside the cosmic divine universal lingam Hiranyagarbha and the cosmic snake Vazuki.

Hiranyagarbha is the volume of the universe and cosmos as one person. Lord King of the Universe, Purusha is what moves and/or transforms in the universe and the cosmos. Thus, Purusha is a part of Hiranyagarbha, and behind Purusha's ego, we find Hiranyagarbha. A part of Hiranyagarbha transforms from scalar fields into universal divine energy, then into quantum matter, and finally into particulate matter. This part that transforms is Purusha, both universe and cosmos, but in another aspect, comparable to a soul that creates a body for itself to be born with the help of the food and genome of its parents, and very creative during the entire Big Bang process, at least. This Faculty of Hiranyagarbha to give birth in him particles and antiparticles is Varuna and his creative power Varuni and this capacity of Purusha to transform a part of him into matter particles and antiparticles is Varuna and his wife his creative power Varuni. Should we specify Purusha does not die at the moment of the birth of the sky and the earth it is his capacity to create from the scalar field which dies. neither Purusha nor Hiranyagarbha are holy spirit beings, they are holy ghana beings (there is always a universe, the universe is therefore not spirit, there is always a cosmos, the cosmos is therefore not spirit, there is no longer a big bang in the universe, the Big bang, creator of the universe is spirit) so inside Hiranyagarbha, particles and antiparticles are born, first Spin, then quarks, then leptons and hadron, before large ahinilation, it is Purusha who forms his body in the cosmos inside the lingam Hirabnyargarbha, his body is first made of spin, then quarks, and finally lepton, particles and antiparticles, and also after the leptons, hadron, before developing photon, light particles, during this entire phase of formation of Purusha's body, the universe and the cosmos go from the size of a particle to that of an organ, then from the volume of our star system, and finally 300,000 light years in volume. We admire Purusha in this phase because it shows him as very creative and powerful, growing from the size of a particle to 300,000 light years, but what we are seeing is happening in the cosmos; we even believe that he is born in the cosmos by making a body of matter. Outside the cosmos, it is Vazuki, the cosmic force. What we admire about Purusha is a considerable force that is seen in the cosmos; it is Vazuki, the cosmic force

goddess Kushmananda Durga

Divine nature Parabrahman True reality Brahman moonlight omnipresent omniscient omnipotent, snake creator of Quantum seed Lord King of creation Ananta Shesha, cosmic Snake Lord King of Creation Vazuki, Architect of the creation Lord King of the creation Vishvakarman, transcendent Divine universal Mother Lordless Queen of the creation Devi, Divine universal Mother on resorption of the Bindu Lordless Queen of the creation Adi Prakriti, Divine universal mother Bindu Lordless Queen of creation Shesha, Divine universal mother on expansion Lordless Queen of creation Prakriti, Divine universal energy Lordless Queen of creation lordless queen of universe Malaprikiti, Cosmic Lingam Divine universal Lord King of creation Haryanagartha, Cosmic Lord Divine universal Lord King of creation Parusha omniscience creator of the 3 worlds Lord God Shiva, Omniscience destroyer of the 3 worlds Lord God Rudra, Chief of Heavens king and queen of Gods and Goddesses Lord God Indra and lordless Goddess Indrani.

Celebrates the lordless goddess Durga active power of Jagannatha Tri-deva trine murtie

it implements the deconfinement of the universe bringing it from bindu size to its maximum volume at the end of the big rip.

to contemplate and recognize Durga in the universe cycle you must contemplate Durga as the goddess behind the ego of Kali Lakshmi Sarasvati the 3 as one single goddess that way you contemplate Brahma under all aspect of his transformation for deconfinement in the cosmos only on Expansion phase of course, there is no omniscience destroyer on resorption that why there is no Durga Goddess on resorption (the traditionnal celebration of Durga associate her to many Shakti Goddesses of agissant power of omniscience creator of the 3 worlds but durga is made of omniscience destroyer no omniscience creator.

Durga Durga works in expanding space-time

she is an aspect of Kalaratri, this aspect in charge of deconfinement of space and time.

Durga, however, is not Kalaratri, the power that reorganizes space-time. Kalaratri is both expanding and resorbing

and is not a bindu while Durga begins at bindu and ends with the stillness of the universe at the end of the expansion.

during the Big Bang phase Durga is lordless goddess Kushmananda Durga she make space time reborn by bindu cosmos dilatation to reach from particles

volums size the size of an orange then she make the cosmos inflating to the volum size of our star sytem and then she make the cosmos expensing to 300 000 years

light volum size. All the big bang during she make the temperature Cooling down lowering the temperature of Agni from 10^{32} K to 2.7 K

Celebrate the holy spsirit lordless goddess Kushmananda Durga the how Durga was on the big bang phases. Durga is still Ghana but Kushmananda is now Spirit

it emerges from the navel of the lord (Ishvara) King of the universe Vishvakarman lying on the creator serpent ananta Shesha around Prakriti
it is the God Shiva and the Goddess Uma who creates him the purview of an adapted omniscience and omnipotence
the Lord god Shiva-Shakti Vishnu, Shiva-Shakti Ishvara Deva Vishnu shows it in tantric method in his Vishnu-Shakti Yoga Hari as if it came out of his navel thus presenting the deity Tvshtar at his birth fruit of the work of Shiva and Shakti on the nautre Brahma of Lingam Cosmic Tvashtar is one of the fruits of the energy transfer from the Scalar Field the Lord King of the cosmic universe Divine universal Purusha.
the scalar champos was a unified as one being and all the Gods Work to break this force which tends to want to keep everything in one Bindu
when Rudra breaks the unity of interactions the moment Indra descends the waters of Heaven the one or Ganga descends on Shiva
Tvashtar emerges and begins his work in the service of Varuna and Varuni creator of the universe
nd phase Big Bang phase creation of matter and antimatter
it uses the desunification of Gravity to make the quantum particles collide with each other pushing them to agglutinate in bigger size

this longevity is the Lord God Dhanvantari who is the Grace

it evolves because Dhanvantari will manage to put more water of life (Amritaa in each particle and antiparticles and this is an expression Mechanism of Dharma in this phase of the Big bang which evolves according to Vidhya the data the raw knowledge that integrates the increasing aptitude of Dhanvantari. as of Bhumi matter Quantic one will pass to Kamadhenu matter Particles and antiparticles but because the knowledge registers a temperature Agni too high there is no mechanism to create molecules before the temperature does not fall again

Celebrate the Lord God Dharma he is the manifestation of the Hindu kingdoms of laws and mechanisms that rule the universe. he feeds on the Lordness Goddess Dhyana Lakshmi wisdom knowledge manifested as goddess Lordness level of holiness Dharma feeds on Vidhya because the rules depend on what is and not on what is not when a Data which was not come to be it finds its place its balance in relation to what already existed and regulates them must then integrate it to function properly so before gravity is reborn there is none and therefore the universe does not work according to gravity but when gravity is reborn then Dharma the laws and mechanism of the universe l'integrates with all the changes it implies and the cosmos expands the same when the strong interaction is reborn as well as when the electromagnetic and weak nuclear are reborn each of the 4 represents Data in the sense of knowledge which is involved in it this aspect of them is Vidhya and when Vidhya changes in the universe Dharma follows it the high temperature (the Lord God Agni) will thus modulate from a highest zenith to a cold marking the absence of agni at the Big Rip and this temperature involves data of knowledge which modifies the temperature rules of the bindu no mechanism to create or destroy matter no other matter than Quantic the Holy Lordness Goddess Bhumi when the temperature begins to drop authorized creation process. but no mechanism possible to make molecules. At the start the interactions dissociate and there are spin particles and antiparticles of matter but their lifespan is short (when they are not annihilated by their opposite matter antimatter) this longevity will increase and that is why the particles will change to give Quarks lepton ... this longevity is the Lord God Dhanvantari who is the Grace it evolves because Dhanvantari will manage to put more water of life (Amrita in each particle and antiparticles and this is an expression Mechanism of Dharma in this phase of the Big bang which evolves according to Vidhya the data the raw knowledge that integrates the increasing aptitude of Dhanvantari. as of Bhumi matter Quantic one will pass to Kamadhenu matter Particles and antiparticles but because the knowledge registers a temperature Agni too high there is no mechanism to create molecules before the temperature does not fall again

Let's celebrate the Rebirth of interactions and the temperature Angi during the process Big bang creator of the universe pahse 2 creation of all the matter and antimatter by Holy spirit lord god Varuna and Holy spirit lordless goddess Varuni.
 lord god Maharishi(ishvara deva Maharishi) break down the Electro weak force that remains after the rebirth of strong nuclear interaction the goddess of Birth lordless goddess Santana appear in the universe through rebirth of the weak nuclear interaction lord god Sanaka Kumara reborn in the same time as the electromagnetic interaction lord god Sananda Kumara. The omniscience destroyer of the 3 worlds Rudra and his acting power destroyer of the confinement inside the 3 worlds Kali make the space time Kalabhairava and his acting power Kalaratri expending from the volume size of our star system to 300,000 years light volume.
 The deconfinement process finds a new path because, thanks to Sanaka Kumara, the destructive omniscience in charge of deconfinement, but also serving Varuna and Varuni. during this phase deconfines the quarks, causing them to lose gluons through the weak interaction of Lord God Sanaka Kumara, and at the same time, with the help of Sananda Kumara, the electromagnetic interaction.
 A whole diversity of quarks appears, thus deconfining the diversity. Rudra and Kali act through Varuna and Varuni for everything related to the creation of matter and antimatter, such as the faculties of Varuna and Varuni.
 Then the leptons appear, and finally the quarks confine themselves in HAdron in pairs (mesons) or triomes (baryons), but this is also part of the action of Rudra and Kali, who gain space in the cosmic volume through this means. The intelligence and capacity for action of the creative accretion Tvashtar, the fighting forces Kartikeya and valli. the destructive omniscience Rudra and Kali as well as the interactions Sanat Kumara, Sanatana Kumara, Sananda Kumara and Sanaka Kumara all this combines to create matter and antimatter in Varuna the creative intelligence of matter and antimatter and Varuni the power which put into action the principles giving birth to each of the particles and antiparticles of the cosmos.

Let's celebrate the Indian Kingdoms, Kings and Queens of the Universe.

Let's celebrate the cosmic lord divine universal Purusha inside the cosmic divine universal lingam Hiranyagarbha and the cosmic snake Vazuki.

Hiranyagarbha is the volume of the universe and cosmos as one person. Lord King of the Universe, Purusha is what moves and/or transforms in the universe and the cosmos. Thus, Purusha is a part of Hiranyagarbha, and behind Purusha's ego, we find Hiranyagarbha. A part of Hiranyagarbha transforms from scalar fields into universal divine energy, then into quantum matter, and finally into particulate matter. This part that transforms is Purusha, both universe and cosmos, but in another aspect, comparable to a soul that creates a body for itself to be born with the help of the food and genome of its parents, and very creative during the entire Big Bang process, at least. This Faculty of Hiranyagarbha to give birth in him particles and antiparticles is Varuna and his creative power Varuni and this capacity of Purusha to transform a part of him into matter particles and antiparticles is Varuna and his wife his creative power Varuni. Should we specify Purusha does not die at the moment of the birth of the sky and the earth it is his capacity to create from the scalar field which dies. neither Purusha nor Hiranyagarbha are holy spirit beings, they are holy ghana beings (there is always a universe, the universe is therefore not spirit, there is always a cosmos, the cosmos is therefore not spirit, there is no longer a big bang in the universe, the Big bang, creator of the universe is spirit) so inside Hiranyagarbha, particles and antiparticles are born, first Spin, then quarks, then leptons and hadron, before large annihilation, it is Purusha who forms his body in the cosmos inside the lingam Hiranyagarbha, his body is first made of spin, then quarks, and finally lepton, particles and antiparticles, and also after the leptons, hadron, before developing photon, light particles, during this entire phase of formation of Purusha's body, the universe and the cosmos go from the size of a particle to that of an organ, then from the volume of our star system, and finally 300,000 light years in volume. We admire Purusha in this phase because it shows him as very creative and powerful, growing from the size of a particle to 300,000 light years, but what we are seeing is happening in the cosmos; we even believe that he is born in the cosmos by making a body of matter. inside the cosmic lingam divine universal Hiranyargarba on expansion take place Prakriti the universe expanding the divine universal aspect of Hiranyargarba a for Purusha the cosmic aspect is the cosmos. Purusha is the part of universe and cosos that move and transform within Hiranyargarba Vishvakarmn is the architecture of Prakriti the architecture of the divine universal aspect of Hiranyargarba and Purusha. In the Hand of Prakriti, the trident symbolizes the two types of omniscience of the three worlds, with the destructive one: Rudra, Kali, and Sati. Prakriti's faculty to grow. She produces her growth and makes the cosmos grow. With the omniscience of the creator of the three worlds: Shiva and Adi Shakti, Prakriti's faculty to create in the three worlds, Prakriti creates.

The creative process of matter and antimatier begins with the rebirth of gravity. Prakriti expends the cosmos, expanding itself as well (the universe), creating all the matter of the cosmos. She acts and we see the cosmos Vazuki force around her neck, the cosmos in the aspect of her Vazuki force expands from the size of a particle to tint of an orange full of spin particles that she build with Sanata Kumara the gravity one of her faculties and antiparticles that he make born then to that of our stellar system filled with quarks and antiquarks that she build with Sanatana Kumara the strong nuclear interaction another of her facultie then reaches 300,000 light years volume filled first with quarks then with Sananda Kumara the electromagnetic interaction and Sanaka Kumara the Weak nuclear interction she diversifies quark types and make born leptons and finally the quarks combine into Hadron before the two great creative amplification of light all of them that he make born. Prakriti add to Vazuki inside Hiranyargarbha we see Purusha aspect of Hiranyargarbha that grow up full of spin dilating from particles size to an orange size then to the volum of our star system full of quarks and then to 300 000 years light volum full of quarks and leptons and then quarks combinate into Hadron that fill the volume Purusha is the universe and the cosmos moving transforming inside Hiranyargarbha

Lets celebrate the waters of the universe Ganga the water above and Shantanu the Waters below. The serpent creator Ananta Shesha the higher lord king of universe (central axis) knots between them giving birth to lord god Uchchaihshravas the horse of the astral has 7 Heads thus creating the mixed waters where Ganga and Shantanu are Melee and interact Ananta Shesha makes them creator and from them gives birth to matter particles and antiparticles. The architecture inside the waters of the universe is Vishvakarman it is an aspect of him, what he is in the waters, with Shiva and Adi-Shakti using the knowledge lordless goddess Vidhya creat the creative intelligence of matter and antimatter such creating neurons and neural connections in the brain of the universe Shantanu the architecture Vishvakarman is modified so that with the birth of gravity then of the astral lord god Uchchaihshravas Shantanu can shape Ganga and Ganga Shantanu the interaction between them becomes possible, Vishvakarman architecture is then transformed and Ganga obtains from Shantanu the power of gravitational attraction Sanat Kumara a little that Ananta Shesha produces between each particle of matter in the waters above and Ganga in the waters mixed with Shantanu the omniscience of the universe Ananta Shesha then knots in Ganga in cluster of quantum matter that it agglutinates until the size of particles and antiparticles it is then Ganga that we see obtaining from Shantanu the faculty of being subjected to gravity and which reorganizes first of all in Spin particles and antiparticles then with the rebirth of the strong interaction Sanatana Kumara it is the power to bind more strongly the matter together in particles and antiparticles and the quarks are born then it is the weak nuclear interaction Sanaka Kumara and the electromagnetic interaction Sananda Ganga obtains the power to lose by its quarks gluon and to capture them in other quarks the quarks diversify and the leptons and antileptons are born and this during an expansion going from the size of a particle then the volume of an orange then that of our stellar system then 300 000/years/light/volume the quarks find themselves weakened by this expansion and combine into hadron while the first great amplification between quarks and antiquarks begins then the second between leptons and antileptons.

The Waters of the universe take place inside Prakriti they are 2 aspect of the divine universal energy Mulaprakriti inside Prakriti the waters above origin of all shape of matter and the waters below origin of all intelligence that build the cosmos. Shiva, the omniscient creator of the 3 worlds, uses the knowledge lordness goddess Vidhya to creates intelligence capable of creating matter and antimatter, as in Shantanu, the brain, creating neuronal connections to build intelligence made to create matter and antimatter, and it is Varuna, who was born inside the waters below. Varuni, born a little after gravity, is reborn. Astral energy lord Uchchaishravas connects Shantanu to Ganga, making their interaction with each other possible. The universal divine energy that transmutes the brain of the universe in Shantanu, with goddess Vidhya the knowledge thus gives birth to the intelligence to create matter and antimatter Varuna, as well as the ability to act, begins to transform Ganga, giving him powers. Sanata Kumara's power of gravitational attraction, and then Power of Strong nuclear interaction Sanatana Kumara to link stronger cluster of quantic matter into particles and it is quarks and antiquarks that born. with the Weak nuclear interaction Sanaka Kumara, Ganga get the power to loose Gluons from her shapes Quarks and with the electromagnetic interaction Sananda Kumara Ganga get the power to capture gluons. Ganga and Shantanu diversify the types of quarks particles and antiparticles and make born leptons and antilepton

The universe Prakriti Mulaprakriti then begins to create matter and antimatter leptons and to diversify quarks in the cosmos and we then see in Hiranyagarbha the cosmic lingam divine universal Purusha move, transforming first of all his divine universal aspect universe in expansion in the waters below he acquires the omniscience creator of matter and antimatter Varuna in his brain Shantanu and in the waters above Ganga he begins to develop matter and antimatter leptons his cosmic body whereas he was a bubble of vacuum the size of a particle the two come to mingle at the level of the cosmos Purusha obtains faculties to act Arun and his body begins to fill with Spin particles and antiparticles tehn quarks antiquarks an now leptons and antilepton growing up from particles size to the volum of an orange then to the volum of our star system and then to 300 000 years light volume fill of particles and antiparticles

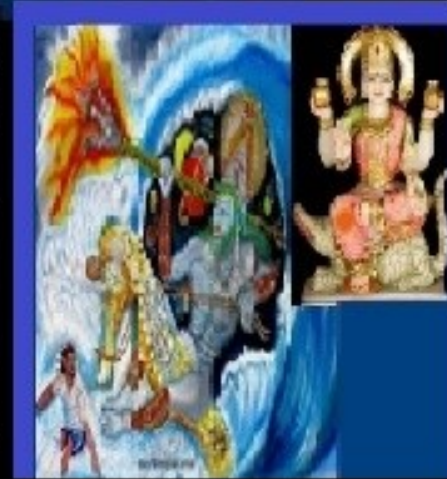

Purusha begins its growth making Hiranvargarbha grow transforming his interior. Purusha is what we see moving from Hiranvargarbha

Celebrate the Lord God Dharma he is the manifestation of the Hindu kingdoms of laws and mechanisms that rule the universe.

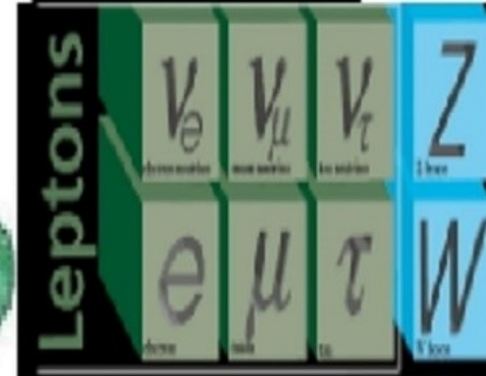

he feeds on the Lordness Goddess Dhyana Lakshmi wisdom knowledge manifested as goddess Lordness level of holiness

Dharma feeds on Vidhya because the rules depend on what is and not on what is not when a Data which was not come to be it finds its place its balance in relation to what already existed and regulates them must then integrate it to function properly so before gravity is reborn there is none and therefore the universe does not work according to gravity but when gravity is reborn then Dharma the laws and mechanism of the universe l 'integrates with all the changes it implies and the cosmos expands the same when the strong interaction is reborn as well as when the electromagnetic and weak nuclear are reborn each of the 4 represents Data in the sense of knowledge which is involved in it this aspect of them is Vidhya and when Vidhya changes in the universe Dharma follows it the high temperature (the Lord God Agni) will thus modulate from a highest zenith to a cold marking the absence of agni at the Big Rip and this temperature involves data of knowledge which modifies the temperature rules of the bindu no mechanism to create or destroy matter no other matter than Quantic the Holy Lordness Goddess Bhumi when the temperature begins to drop authorized creation process, but no mechanism possible to make molecules. At the start the interactions dissociate and there are spin particles and antiparticles of matter but their lifespan is short (when they are not annihilated by their opposite matter antimatter) this longevity will increase and that is why the particles will change to give Quarks lepton ...

Let's celebrate the Indian Kingdoms, Kings and Queens of the Universe.
 Let's celebrate the cosmic lord divine universal Purusha inside the cosmic divine universal lingam Hiranyargarbha and the cosmic snake Vazuki.
 Hiranyargarbha is the volume of the universe and cosmos as one person. Lord King of the Universe, Purusha is what moves and/or transforms in the universe and the cosmos. Thus, Purusha is a part of Hiranyargarbha, and behind Purusha's ego, we find Hiranyargarbha. A part of Hiranyargarbha transforms from scalar fields into universal divine energy, then into quantum matter, and finally into particulate matter. This part that transforms is Purusha, both universe and cosmos, but in another aspect, comparable to a soul that creates a body for itself to be born with the help of the food and genome of its parents, and very creative during the entire Big Bang process, at least. This Faculty of Hiranyargarbha to give birth in him particles and antiparticles is Varuna and his creative power Varuni and this capacity of Purusha to transform a part of him into matter particles and antiparticles is Varuna and his wife his creative power Varuni. Should we specify Purusha does not die at the moment of the birth of the sky and the earth it is his capacity to create from the scalar field which dies. neither Purusha nor Hiranyargarbha are holy spirit beings, they are holy ghana beings (there is always a universe, the universe is therefore not spirit, there is always a cosmos, the cosmos is therefore not spirit, there is no longer a big bang in the universe, the Big bang, creator of the universe is spirit) so inside Hiranyargarbha, particles and antiparticles are born, first Spin, then quarks, then leptons and hadron, before large annihilation, it is Purusha who forms his body in the cosmos inside the lingam Hirabnyargarbha, his body is first made of spin, then quarks, and finally lepton, particles and antiparticles, and also after the leptons, hadron, before developing photon, light particles, during this entire phase of formation of Purusha's body, the universe and the cosmos go from the size of a particle to that of an organ, then from the volume of our star system, and finally 300,000 light years in volume. We admire Purusha in this phase because it shows him as very creative and powerful, growing from the size of a particle to 300,000 light years, but what we are seeing is happening in the cosmos; we even believe that he is born in the cosmos by making a body of matter. Outside the cosmos, it is Vazuki, the cosmic force. What we admire about Purusha is a considerable force that is seen in the cosmos; it is Vazuki, the cosmic force

The Waters of the universe take place inside Prakriti they are 2 aspect of the divine universal energy Mulaprakriti inside Prakriti the waters above origin of all shape of matter and the waters below origin of all intelligence that build the cosmos. Shiva, the omniscient creator of the 3 worlds, uses the knowledge lordless goddess Vidhya to creates intelligence capable of creating matter and antimatter, as in Shantanu, the brain, creating neuronal connections to build intelligence made to create matter and antimatter, and it is Varuna, who was born inside the waters below. Varuni, born a little after gravity, is reborn. Astral energy lord Uchchaihshravas connects Shantanu to Ganga, making their interaction with each other possible. The universal divine energy that transmutes the brain of the universe in Shantanu, with goddess Vidhya the knowledge thus gives birth to the intelligence to create matter and antimatter Varuna, as well as the ability to act, begins to transform Ganga, giving him powers. Sanata Kumara's power of gravitational attraction, and then Power of Strong nuclear interaction Sanatana Kumara to link stronger cluster of quantic matter into particles and it is quarks and antiquarks that born. with the Weak nuclear interaction Sanaka Kumara, Ganga get the power to loose Gluons from her shapes Quarks and with the electromagnetic interaction Sananda Kumara Ganga get the power to capture gluons. Ganga and Shantanu diversify the types of quarks particles and antiparticles and make born leptons and antilepton when quarks'energy tired because of the expansion Shantanu impulse Ganga through his intelligence Varuna to combine as Hadron and Varuni inside Ganga start the process Hadron meson and Hadron Baryon born that way Ganga reorganising matter inside of her.

The universe Prakriti Mulaprakriti then begins to create matter and antimatter leptons and to diversify quarks in the cosmos and we then see in Hiranyagarbha the cosmic lingam divine universal Purusha move, transforming first of all his divine universal aspect universe in expansion in the waters below he acquires the omniscience creator of matter and antimatter Varuna in his brain Shantanu and in the waters above Ganga he begins to develop matter and antimatter leptons his cosmic body whereas he was a bubble of vacuum the size of a particle the two come to mingle at the level of the cosmos Purusha obtains faculties to act Varuni and his body begins to fill with Spin particles and antiparticles then quarks antiquarks and now leptons and antilepton and then with combination of quarks Hadron particles growing up from particles size to the volume of an orange then to the volume of our star system and then to 300 000 years light volume fill of particles and antiparticles

Let's celebrate Lord Turtle God Kurma, an associate of Vishnu Avatar, his manifestation of a particular principle of the universe and cosmos that makes it incapable of collapse.

The cosmos is reborn as bindu without any gravity, and then gravity is reborn, and the process of creating matter and antimatter begins, through the grace of Varuna and Varuni. The mass of the cosmos in the universe increases with the quantity of particles. The Lordless Goddess Kamadhenu increases the destructive omniscience of the three worlds. Lord God Rudra deconfines the universe, which goes from the size of a pinhead to that of an orange. It is filled with spin particles. Lord God Kurma, the tortoise god, and the mass in the cosmos increases exponentially, but no collapse occurs, there is no black hole in the magma of particles with the arrival of Quarks and antiquarks the cosmos soys the influence of Rudra inflates from the size of an orange to that of the volume of our stellar system and this entirely filled with particles and antiparticles. A gigantic mass because all the rest of the matter is only a combination between all these quarks yet no collapse there is no black hole in the cosmos and that is Kurma the turtle god who carries on his back the creation. Finally Rudra the destructive omniscience of the 3 worlds by combination of matter deconfines the universe he acts through Varuna and Kali through Varuni. Matter diversifies by exchanging gluons, then leptons are born. The volume continues to increase, and so does the mass. Finally, the quarks group together into hadrons, which allows for deconfinement. It is Rudra acting through Kali, Lordless Goddess Kamadhenu. The particles/antiparticles of Earth matter are finished being born. Its mass is greater than that of the current cosmos because all antimatter and almost all matter will annihilate. Agam, Lord God Kurma supports the universe, and there is no collapse; there are no black holes in the cosmos.

The Almighty God Kurma is one of the secrets of the universe and an aspect of the cosmic force Vazuki.

It doesn't only deconfine by growing up its volume size inside the volume of the universe and cosmos. Jagannatha conceives of saving space for matter inside volume by grouping quarks by 2 or 3 in Hadron. They take up less space in the volume. Let's not forget that there is no space in the magma particles in this phase and that particles are constantly being born.

when we contemplate the destructive omniscience over the whole cycle we see that it gives birth to matter and antimatter but it is only to deconfine creation is not its priority it acts in Varuna and Kali Sati in Varuni Black Matter born on the moment made of Meson (non baryonic matter)

Let's celebrate Lord Dattatreya, the trine murti Shiva, and his wife, the goddess Matrika Tridevi. They are the manifestation of the creative capacity of the common divine nature in the universe.

Here we are in the second phase of the Big Bang, the phase of creation of matter and antimatter in the cosmos by Varuna and Varuni. The expansion has exhausted the energy of the quarks, putting them in danger. Then begins a process of combining the quarks into hadrons.

Dattatreya is Brahma, whose forms are composed of Matrika, who is the aspect of Brahma, and Sarasvati, who transmutes into matter. Shatarupa and Swayambhuva are part of Dattatreya and Matrika. Dattatreya is also Shiva, and conceives an adaptation by molecular combination. He launches Adi-Shakti into a work on Brahma/Sarasvati. Matrika is also Adi-Shakti who begins to transform Brahma directed by Shiva thus in Dattatreya is created a matrix of articulation of the nodes that produces Ananta Shesha on itself to knot 2 or 3 quarks together in Hadron, this matrix appears as lord god Satyasena god avatar of the god Vishnu in the heart of Ananta Shesha. Ananta Shesha already all the quarks (knot of Ananta Shesha in the form of quarks) then knots in Hadron mson or Baryon progressively Brahma/Sarasvati the common divine nature in the universe is transformed with Abundance Lakshmi another facet of Matrika the quantity of Hadron begins to increase. Satyasena then appears to be one of the tools of creation in the hands of Varuna and Varuni the creators of the universe using the forces of vitality of combativeness Kartikeya and gravity Sanata Kumara in order to bind the quarks together by the creative accretion Tvahastar and to weld them by the strong nuclear interaction Sanatana Kumara.

Again, Lord God Kurma supports the universe, and there is no collapse; there are no black holes in the cosmos.

The Almighty God Kurma is one of the secrets of the universe and an aspect of the cosmic force Vazuki.

Let's Celebrate lord god Jagannathā ad his Wife Goddess Durga on the 2nd phase Big bang Durga is Durga-Kushmananda both Kali/Sati, Lakshmi and Sarasvatī/Shatarupa Jagannathā and Durga re the manifestation of the common divine nature God Brahma/Sarasvatī inside the universe and cosmos turn by the omniscience destroyer of the worlds god Rudra for the universe deconfinement. All the pass during the universe is going to expand to the volume of an organ then inflating to the volume of our star system and then expanding to 300,000 years/light

It doesn't only deconfine by growing up its volume size inside the volume of the universe and cosmos. Jagannatha conceives of saving space for matter inside the volume by grouping quarks by 2 or 3 in Hadron. They take up less space in the volume. Let's not forget that there is no space in the magma particles in this phase and that particles are constantly being born.

Jagannatha wants to reorganize matter in its volume. He is BRAHma, whose forms are the result of the oscillation of Sarasvati, one of the facets of Durga-Kushmananda. Rudra and Kali generate, through their joint work, a Rudra/Kali Matrix (deconfinement, Sati creation) to transform the common divine nature. It is through gravity at the heart of Ananta Shesha, the creator serpent (who is also in the cosmos all forms of matter) that Rudra and Kali push the quarks to group into Hadron. Aupores of Sanata Kumara Kamadenu and Lakshmi the face of Brahma Swyambhuva is transformed the abundance of Quarks is transformed into abundance of Hadron this is another of the tools in the hands of Varuna and Varuni the force of Vitality and combateness KAriteya with Sanata Kumara generates accresion God Tvashtra the very high of the gods of the phase in the heart of Ananta shesha the very high of the kings of the universe. Grouped the quarks are bound together with the help of Lord god Sanatana Kumara the strong nuclear interaction.

when we contemplate the destructive omnipotence over the whole cycle we see that it gives birth to matter and antimatter but it is only to deconfine creation is not its priority it acts in Varuna and Kali Sati in Varuni Black Matter born on the moment made of Meson (non baryonic matter)

Dattatreya is Brahma, whose forms are composed of Mattrika, who is the aspect of Brahma, and Sarasvati, who transmutes into matter. Shatarupa and Swayambhuva are part of Dattatreya and Mattrika. Dattatreya is also Shiva, and conceives an adaptation by molecular combination. He launches Adi-Shakti into a work on Brahma/Sarasvati. Mattrika is also Adi-Shakti who begins to transform Brahma directed by Shiva thus in Dattatreya is created a matrix of articulation of the nodes that produces Ananta Shesha on itself to knot 2 or 3 quarks together in Hadron, this matrix appears as lord god Satyasena god avatar of the god Vishnu in the heart of Ananta Shesha. Ananta Shesha already all the quarks (knot of Ananta Shesha in the form of quarks) then knots in Hadron mson or Baryon progressively Brahma/Sarasvati the common divine nature in the universe is transformed with Abundance Lakshmi another facet of Mattrika the quantity of Hadron begins to increase. Satyasena then appears to be one of the tools of creation in the hands of Varuna and Varuni the creators of the universe using the forces of vitality of combativeness Kartikeya and gravity Sanata Kumara in order to bind the quarks together by the creative accretion Tvastar and to weld them by the strong nuclear interaction Sanatana Kumara.

Let's celebrate Lord Dattatreya, the trine murti Shiva, and his wife, the goddess Matrika Tridevi. They are the manifestation of the creative capacity of the common divine nature in the universe.

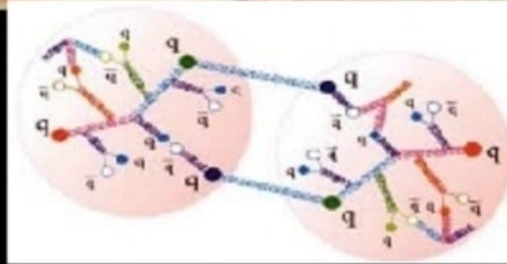

Here we are in the second phase of the Big Bang, the phase of creation of matter and antimatter in the cosmos by Varuna and Varuni. The expansion has exhausted the energy of the quarks, putting them in danger. Then begins a process of combining the quarks into hadrons.

Dattatreya is Brahma, whose forms are composed of Matrika, who is the aspect of Brahma, and Sarasvati, who transmutes into matter. Shatarupa and Swayambhuva are part of Dattatreya and Matrika. Dattatreya is also Shiva, and conceives an adaptation by molecular combination. He launches Adi-Shakti into a work on Brahma/Sarasvati. Matrika is also Adi-Shakti who begins to transform Brahma directed by Shiva thus in Dattatreya is created a matrix of articulation of the nodes that produces Ananta Shesha on itself to knot 2 or 3 quarks together in Hadron, this matrix appears as lord god Satyasena god avatar of the god Vishnu in the heart of Ananta Shesha. Celebrate the luck the holy Lordless Goddess Mohini she emerges from Shiva-Shakti the Lord God Vishnu fruit of the work of the creative omniscience of the 3 worlds and his power acting on Brahma reality in the universe already at the start it brings back the water of life towards the Gods after the Demons have seized it if the Demons had been able to keep everything there would be little to be no universe or some say it would be entirely in antimatter. but thanks to Mohini the precious nectare returned to the Gods

Here she is now in this episode of creation strongly courted by Shiva then we find her strongly courted by the Demon Bhasmasura is that Bhasmasura is the demon of annihilation that the creative omniscience has made emerge with Adi Shakti in the process of creation of matter and antimatter in the service of Varuna and Varuni and now this principle threatens to annihilate in a homogeneous way, without breaking the symmetry between matter and antimatter. As there is as much matter as there is antimatter, this threatens the cosmos not to be able to be born, grow and have a body of matter, so Shiva the omniscience Creator of the 3 worlds begins to pray for luck to beg her, to do everything for it. seduce and he succeeds in getting her to seduce Bhasmasura and destroy him at the end of his Action Mohini allows matter to remain after the end of the annihilation, there is then no more antimatter which is what has breaking the symmetry between matter and antimatter luck Mohini

In Hindu mythology, Bhasmasura (Sanskrit: भस्मासुरा, Bhasmāsura), also known as Brahmasura, was an asura or demon who was given the power to burn and immediately reduce to ashes (bhasma) anyone whose head he touched. The asura was deceived by the only female avatar of the god Vishnu, the enchantress Mohini, and reduced himself to ashes.

Bhasmasura was a devotee of the god Shiva. He performed great penance to obtain a blessing from the deity. Shiva became pleased and asked him what blessing he desired. Bhasmasura then requested that he be granted the power that anyone whose head was touched with his hand should burn and immediately be reduced to ashes (bhasma)

Quick as a flash Shiva realized Bhasmasura's evil plan and broke into a run. "Come back!" shouted Bhasmasura. "You cannot escape me." Red-eyed and puffed up with pride, Bhasmasura set off after Shiva. "Fooled by my own devotee!" thought Shiva, running as fast as he could.

Bhasmasura then requested that he be granted the power that anyone whose head was touched with his hand should burn and immediately be reduced to ashes (bhasma). Shiva granted this request, but Bhasmasura then attempted to touch Shiva's head with his hand because he had seen Adi-Shakti, the wife goddess of Shiva, and wanted to possess her, which would only be possible if he reduced Shiva to ashes.

Brihaspati is one of all the form of non molecular manifested(non quantic)mater that come to be when Kamadhenu come out from the omniscience and omnipotence of Lord God Varuna and Lorddess Goddess Varuni

Lets celebrate the waters of the universe Ganga teh water above and Shantanu the Waters below. The serpent creator Ananta Shesha the higher lord king of universe(central axis) knots between them giving birth to lord god Uchchahishravas the horse of the astral has 7 Heads thus creating the mixed waters where Ganga and Shantanu are Melee and interact Ananta Shesha makes them creator and from them gives birth to matter particles and antiparticles. The architecture inside the waters of the universe is Vishvakarman it is an aspect of him, what he is in the waters, with Shiva and Adi-Shakti using the knowledge lordless goddess Vidyha creat the creative intelligence of matter and antimatter such creating neurons and neural connections in the brain of the universe Shantanu the architecture Vishvakarman is modified so that with the birth of gravity then of the astral lord god Uchchahishravas Shantanu can shape Ganga and Ganga Shantanu the interaction between them becomes possible. Vishvakarman architecture is then transformed and Ganga obtains from Shantanu the power of gravitational attraction Sanat kumara a little that Ananta Shesha produces between each particle of matter in the waters above and Ganga in the waters mixed with Shantanu the omnisience of the universe Ananta Shesha then knots in Ganga in cluster of quantum matter that it agglutinates until the size of particles and antiparticles it is then Ganga that we see obtaining from Shantanu the faculty of being subjected to gravity and which reorganizes first of all in Spin particles and antiparticles then with the rebirth of the strong interaction Sanatana Kumara it is the power to bind more strongly the matter together in particles and antiparticles and the quarks are born then it is the weak nuclear interaction Sanaka Kumara and the electromagnetic interaction Sananda Ganga obtains the power to lose by its quarks gluon and to capture them in other quarks the quarks diversify and the leptons and antileptons are born and this during an expansion going from the size of a particle then the volume of an orange then that of our stellar system then 300 000/years/light/volume the quarks find themselves weakened by this expansion and combine into hadron while the first great amplification between quarks and antiquarks begins then the second between leptons and antileptons.

Let's celebrate the Waters of the universe the waters above lordless goddess Ganga where all types of matter take their source, and the waters below lord Goshantamu the brain of the universe where all forms of active intelligence take their source. They create matter and antimatter. It is the very high king of the universe the snake creator and king of the universe Ananta Shesha who knots them together making them interact making them creators. They knot in Ganga becoming matter it knots in Shantamu creating new faculties becoming the gods. Let's celebrate the Waters of the universe the waters above lordless goddess Ganga where all types of matter take their source, and the waters below lord Goshantamu the brain of the universe where all forms of active intelligence take their source. They create matter and antimatter. It is the very high king of the universe the snake creator and king of the universe Ananta Shesha who knots them together making them interact making them creators. They knot in Ganga becoming matter it knots in Shantamu creating new faculties becoming the gods. Shiva and Adi-Shakti use the knowledge lordless goddess Vidya inside Shantamu the waters below give birth to the gods and goddesses, they create intelligence in the brain that is Shantamu a bit like creating the neural connections allowing intelligence in the brain thus making shantamu becomes omniscient omnipotent and they shape Ganga. By the grace of lordless goddess Vidya the knowledge, they Create the creative omniscience of matter and antimatter Holi spirit lord god Varuna who is then the intelligence of Shantamu to create matter and antimatter then when they create Maharishi this one makes gravity reborn and from the top of the waters above Ganga Indra made Ganga descend the waters above to the level of the waters below using Airavata the elephant god of Indra then lord god Uchchaihshravas is reborn the manifestation of the Astral energy which connects the waters above to the waters below making it possible for Shantamu to act on Ganga and vice versa. Shantamu then interacts with Ganga with his creative intelligence Varuna he transforms a part of what she is into matter and antimatter this interaction is possible only by the grace of Uchchaihshravas. Varuni is reborn with Gravity she is the holy spirit creative power of matter and antimatter the active power of Varuna it is she who accomplishes the transformation under the action of Ganga reacting to gravity, quantum matter agglutinate as cluster of quantum Brane becoming bigger and bigger until becoming particles or antiparticles, the volume begins to expand and the temperature Agni drops becoming favorable to the creation of matter Varuni reborn and then uses Tvashata the creative accretion with Kartikeya valli the forces of vitality of combativeness, and Sanat Kumara gravity accompanied by the gods of love Kama Rati and U desire Kamaksha agglutinating the quantum matter in clusters bigger and bigger until it becomes particles and antiparticles. Spin quarks leptons and hadrons has been created that way Ganga receiving specific power from Shantamu with the rebirth of gravity Sanat Kumara then strong nuclear interaction Sanatana then weak nuclear Sanaka Kumara and electromagnetic Sananda, but the explosion of the universe tried the quarks energy as the hadron combination of quarks start the 1st big annihilation between quarks and antiquarks start making photon light particles burning lord god Brihaspati, then few after it is a big annihilation between leptons and antileptons at the end only a few part of matter will survey and no more antimatter when the process creation of matter and antimatter is ended. Varuna is the intelligence creator made by Shiva inside Shantamu part of Shantamu used to create matter and antimatter and Varuni is the omnipotence creator of the matter and antimatter that come to transform Ganga acting through Ganga building particles and antiparticles this had become possible by the grace (beauty elegance kindness) of Uchchaihshravas the god of Astral that connect Water above Ganga to waters below Shantamu making possible their together interaction.

The Waters of the universe take place inside Prakriti they are 2 aspect of the divine universal energy Mulaprakriti inside Prakriti the waters above origin of all shape of matter and the waters below origin of all intelligence that build the cosmos. Shiva, the omniscient creator of the 3 worlds using the knowledge lordess goddess Vidhya creates intelligence capable of creating matter and antimatter, as in Shantanu, the brain, creating neuronal connections to build intelligence made to create matter and antimatter, and it is Varuna, who was born inside the waters below. Varuni, born a little after gravity, is reborn. Astral energy lord Uchhaishravas connects Shantanu to Ganga, making their interaction with each other possible. The universal divine energy that transmutes the brain of the universe in Shantanu with the goddess Vidhya the knowledge thus gives birth to the intelligence to create matter and antimatter, Varuna, as well as the ability to act, begins to transform Ganga, giving him powers. But the expansion had tired quarks energy Shantanu impulses the quarks combination into Hadron from his Varuna intelligence creator of matter and antimatter and Ganga start to combine matter into Hadron but her energy inside the quarks can't protect them from annihilation between quarks and antiquarks. It is the first big annihilation light lord god Brihaspati is reborn after the quarks it is leptons and antileptons that annihilate each other Shantanu and Ganga create a little more matter than antimatter to save the universe. The universe Prakriti Mulaprakriti then begins to create photon light particles through annihilation between quarks and antiquarks and then leptons and antileptons. Inside Hiranyagarbha the cosmic lingam divine universe start the 2 big annihilation creator of light photon particles Purusha move, transforming first of all his divine universal aspect universe in expansion in the waters below he acquires the omniscience creator of matter and antimatter Varuna in his brain Shantanu and in the waters above Ganga all quarks and antiquarks that are not combine as Hadron start to Annihilate making born light photon particles Brihaspati to light Purusha's body inside Hiranyagarbha.

Shiva fled and was chased away by Bhasmasura. Bhasmasura chased him wherever Shiva went.

as the strong nuclear interaction lord god Sanatana Kumara reborn start the inflation phase led by Rudra with Kali and Sati, his active powers destructive of confinement the cosmos grow up from Orange volume size to the volume of our star system

The order of Lord God Dharma was the strict respect of the symmetry between matter and antimatter, the articulation of the creative knot of Particles and antiparticles (the part of Ananta Shesha which is knotted into matter, particles and antiparticles). Lord God Yajna with the abundance of quantum matter necessary to make each particle, Dakshina therefore produces as much matter spin as antimatter spin.

During the expansion phase led by Rudra with Kali and Sati, its active powers destructive of confinement bringing the cosmos and the universe to a size of 300,000 years/light volume while the Dharma order is still the same since the beginning of the phase of creation of matter and antimatter, Dharma becomes unbalanced and finds itself on a paste because there is a factor which upsets the orders it is the expansion which has tired the energy of the quarks they are thus weakened and therefore the order must leave its traditional to find a balance whose symmetry matter antimatter is broken. Lord god Yajna the articulation of the creative knot of Particles and antiparticles, the part of Ananta shesha which is knotted in matter particles and antiparticles lord god Yajna with the abundance of quantum matter necessary to make each particle Dakshina therefore produces as much of matter spin than of antimatter quarks and leptons but now what was order and good before becomes disorder and danger.

Somehow, Shiva managed to reach Vishnu to seek a solution to this difficult situation. Vishnu, upon hearing Shiva's problem, agreed to help him.

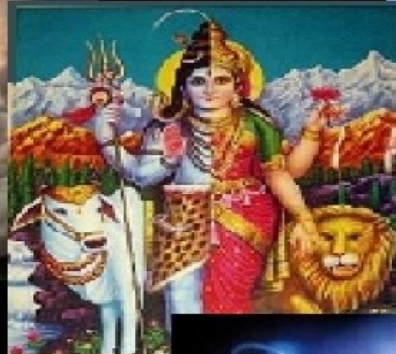

Divine entity: Parashurama True reality, Brahman monistic omnipotent omniscient omnipresent, male creator of Quanta, good Lord king of universe male creator Ananta Shesha cosmic, South manifestation of the cosmic force Lord King of universe Vashist, Great architect of the universe Lord king of the universe, Vishvakarma, transcendence Divine universal Mother, Lordless Queen of the universe Parashakti (the universe all its cycle during Divine universal Mother of the Hindu (the universe on resolution phases only)), Lordless Queen of the universe Adi-Prakriti, Divine universal mother, Hindu Lordless Queen of univers Shomya (the universe on rebirth plancktime of the universe), Divine universal mother on expansion Lordless Queen of univers Prakriti (the universe on expansion only), Divine universal energy, Lordless Queen of universe, Lordless queen of universe Mahaprakriti (the scalar energy fields universe), Cosmic, Lingam Divine universal Lord King of universe Hyranyagarbha, Cosmic, Lord divine universal, Lord King of universe Parashu omniscience creator of the 3 world Lord of the 3 worlds god Shiva and lordless of the 3 worlds goddess Parashakti, Omniscience destroyer of the 3 worlds Lord of the 3 worlds God Rudra and Lordless goddess of the 3 worlds goddess Kali, Chief of Heavens king and queen of Gods and Goddesses Lord king God Indra and lordless queen Goddess Indrani.

The expansion led by Rudra and Kali exhausts the quarks and antiquarks which see their internal energy weakened, the combination into Hadron begins and shortly after it is the first ahinilation between quarks and antiquarks then the second ahinilation begins between lepton and antilepton. these Ahinilation is Bhasmasura who is born from the action of the destructive omniscience of the 3 worlds Rudra and Kali expending the universe bringing the darkness Vibhu and the night Ratri to give birth Bhasmasura their tools also to give birth to Brihaspati but matter like antimatter are destroyed so quickly that the problem of symmetry between matter and antimatter arises because there is 1 particle for 1 antiparticle and ahinilation destroys 1 particle and 1 antiparticle for a collision between the 2 the risk is therefore that there is no more matter or antimatter and the universe would be dead the cycle ending here without even a guarantee that they can be reborn Bindu. Galaxies, star systems, planets, and creatures could have been made entirely of antimatter, and it wouldn't have mattered, but all this wouldn't have existed if the symmetry between matter and antimatter had led to the destruction of both.

Shiva then begins to pray as strongly as possible. It is the presence of Tyaga, the god of worship offerings and piety, that makes the connection between Shiva and Vishnu, who is then prayed for and invoked for help. But what is Vishnu in creative omniscience at this moment in the cycle of the universe? He is the omniscience/omnipotence of Shiva/Adi-Shakti and manifests himself in the form of Yajna, the articulation of the knot that Ananta Shesha produces to knot itself into particles and antiparticles. Yajna appears, and from it emerges Mohini, luckily, Shiva prays and begs to intervene. This is the episode of Shiva in love with Mohini.

Vishnu, in the form of Mohini, appeared before Bhasmasura

Shiva prays frightened by the danger of the ahinilation of all matter as of all antimatter that represents the god Bashmasura the ghana of the ahinilation he prays Vishnu who at this moment is the matrix Shiva/Adi-Shakti manifesting as Lord God Yajna from which comes Mohini the chance that Shiva begins to pray and to beg to generate a solution this solution is to break the symmetry between matter and antimatter. Indeed at this moment it is born strictly as much matter as antimatter if each particle is ahiniled with an antiparticle at the end there will be nothing left. the solution is therefore Shiva intervening on the laws of the universe begins to produce through Yajna a little more matter than antimatter Shiva merges with Yajana in a god that we call HariHara although it is not the Hara form of Shiva which comes later in the cycle nor the god Hari avatar of Vishnu who also comes later. he is more of a God Shivayajana subject to knowing the exact name of the Shiva form during the process of creation of matter and antimatter.

Śiva, his good sense taken away by the woman because of lusty desires to enjoy with Her, became so mad for Her that even in the presence of Bhavānī he did not hesitate to approach Her. The beautiful woman was already naked, and when She saw Śiva coming toward Her, She became extremely bashful. Thus She kept smiling, but She hid Herself among the trees and did not stand in one place.

After following Her with great speed, Śiva caught Her by the braid of Her hair and dragged Her near him. Although She was unwilling, he embraced Her with his arms. Being embraced by Śiva like a female elephant embraced by a male, the woman swirled like a snake. This woman had large, high hips. She released Herself somehow from the fond embrace of Śiva's arms and ran away. Just as a maddened bull elephant follows a female elephant who is able to conceive pregnancy, Śiva followed the beautiful woman and discharged semen.

The God called Harihara comes from Shiva's action to destroy the symmetry between matter and antimatter at the time of the 2 great annihilation between quarks and leptons. Shiva merges Vishnu Yajna the articulation of the knot that produces Ananta Sheshash knotting in particles or antiparticles in order to produce more matter. We are far from the parable that describes Shiva so in love with Mohini that he would have had homosexual relations with Vishnu when Vishnu would have taken back his male form.

Shiva, Lover of Mohini, is the omniscient creator of the worlds who turns towards luck and praises it, adores it, hoping for it.

Finally, Shiva caught up with Mohini just as she was reverting to Vishnu. The two devas merged to form a new deity named Harihara.

As there is as much matter as there is antimatter, this threatens the cosmos not to be able to be born, grow and have a body of matter, so Shiva the omniscience Creator of the 3 worlds begins to pray for luck to beg her, to do everything for it. seduce and he succeeds in getting her to seduce Bashmasura and destroy him at the end of his Action Mohini allows matter to remain after the end of the annihilation, there is then no more antimatter which is what has breaking the symmetry between matter and antimatter luck Mohini

Divine nature Parabrahman True reality Brahman reveals omnipotent omnipresent omnipotence, create creator of Quantum need Lord King of universe create Ananta Shesha cosmic Shiva manifestation of the cosmic force Lord King of universe Vishnu, Great architect of the universe Lord King of the universe Vishwakarma, transcendent Divine universal Mother Lordless Queen of the universe Parvati (the universe all its cycle during, Divine universal Mother of the Hindu (the universe on motion phases only) Lordless Queen of the universe Adi Prakrit, Divine universal mother Hindu Lordless Queen of universe Shoozya (the universe on rebirth plucktime of the universe), Divine universal mother on expansion Lordless Queen of universe Prakriti (the universe on expansion only), Divine universal energy Lordless Queen of universe Lakshmi the sacred energy Deity universe), Cosmic Lingam Divine universal Lord King of universe Hyranyagarbha, Cosmic Lord Divine universal, Lord King of universe Purandara omnipotence creator of the 3 worlds Lord of the 3 worlds God Shiva and Lordless of the 3 worlds goddess Parvati, Omnipotence destroyer of the 3 worlds Lord of the 3 worlds God Indra and Lordless goddess of the 3 worlds goddess Kali, Chief of Heavens King and queen of Gods and Goddesses Lord King God Indra and Lordless queen Goddess Indrani.

Let's celebrate lordless goddess Mohini the luck with lord god called Harihara the matricial Vishnu Shiva-Adi Shakti manifesting as Lord God Yajna that Shiva Merge to influence the proportion of matter to antimatter that is born Lord God Harihara is the matricial articulation of the knot that Ananta Shesha produces on itself to knot itself into matter and antimatter particles when shiva influences the breaking of symmetry in matter and antimatter so that a little more matter than antimatter is born. Bhasmasura destroys all the antimatter born and the exact same amount of matter but in the end there remains a little matter and no more antimatter the ahinilations are no longer possible due to lack of antimatter and Bhasmasura dies becoming holy spirit ahinilation between matter and antimatter. Lord God Dharma loses his balance. He was on an order of strict symmetry between matter and antimatter, but the universe is saved and Dharma regains his balance after the end of the ahinilations. through that episode it is also Varuna and Varuni who kill Mahesasura by creating a few more matter than antimatter they break down the symmetry and kill Bhasmasura.

Luck Mohini by this way saved the univers from early death of all forms of matters which would have end the cycle. The story tell Mohini succeed to seduce Bhasmasura and start a dance with hand upon his head and at the end Bhasmasura touch his head and ahinilate himself.

Celebrate also Holy spirit lord god Varuna and Holy spirit lordless goddess Varuni they also kill Bhasmasura by creating a few more matter than antimatter Harihara is the knot articulation Varuna design and Varuni build. Harihara is Varuna's tool to break down the symmetry.

Celebrate lord god Dharma on that moment of big ahinilation Dharma lose stability and to restore the balance create a few more matter than antimatter.

but thanks to Mohini the precious nectare returned to the Gods
Here she is now in this episode of creation strongly courted by Shiva then we find her strongly courted by the Demon Bashmasura is that Bhasmasura is the demon of ahinilation that the creative omniscience has made emerge with Adi Shakti in the process of creation of matter and antimatter in the service of Varuna and Varuni and now this principle threatens to annihilate in a homogeneous way, without breaking the symmetry between matter and antimatter. As there is as much matter as there is antimatter, this threatens the cosmos not to be able to be born, grow and have a body of matter, so Shiva the omniscience Creator of the 3 worlds begins to pray for luck to beg her, to do everything for it. seduce and he succeeds in getting her to seduce Bashmasura and destroy him at the end of his Action Mohini allows matter to remain after the end of the annihilation, there is then no more antimatter which is what has breaking the symmetry between matter and antimatter luck Mohini

Vishnu appeared in the form of the beautiful Mohini ("the infuriating"), whose beauty immediately seduced Bhasma, who forgot Shiva in his shell. To win her over, Mohini demanded only that he wash his head and his dirty hair on the banks of the nearby river. Still under Mohini's spell, Bhasma rushed to the riverbank, but he had barely touched her head when he was reduced to ashes.

Varuna Varuni with the moon

The abundance vera laksmi is increasing with the phases of creation and decrease during the annihilation and recombination phases

Thus the quarks and the lepton emerge and grow in quantity it is Rahu Lakshmi who emerge from Goddess Chandra New Moon Lakshmi who reaches his climax by a maximum quantity of quarks (and antiquarks) in God Chandra Full Moon LAKSMI then this abundance decreases Essentially by recombination and annihilations is Ketu Decreasing moon lakshmi

thus comes by recombination the Hadrons and the fermions they are born and because it is made of quarks the quantity of quark alone decreases the annihilation quother ant quarks and no longer finish having quarks or antiquarks alone for them the decay of their Abundance Ketu Lakshmi to the only state until Goddess black moon goddess who expresses end of cycle More quarks lakshmi quark disappears giving way to Lakshmi Hadron Fermion and Lepton

Then this emergence is Goddess Chandra New Moon Lakshmi becoming Rahu Increasing Moon Lakshmi then reached are apoged in God Chandra Full Moon Lakshmi then this one falls by the process of annihilation (there is not yet a decombination which gives birth to the Molecules God Vidhi) but c 'Is Ketu lakshmi until their quantity stabilizes at the end of Hadron-Antihadron Goddess Chandra Old Moon LAKSHMI who ends in Goddess Chandra Black Moon Lakshmi who is the end of the cycle and waiting for a new cycle This time either with Varuna and Varuni but with Vidhi then Ankariksa and Dhatri

Veena Lakshmi is the Global Abundance actif in this phase and she is made of cycles of increasing and cycles of decreasing starting and ending together inside of her reality this Abundance participate to the process creator she's agissante power and it is the moment in this phase 2 Big Bang Brihaspati born by billions photon burning and his burning is also consequent of the destruction of mater and animator that's why it is also a way to get a vision of Brihaspati destroying the world

Lets celebrate the waters of the universe. Ganga the water above and Shantanu the Waters below. The serpent creator Ananta Shesha the higher lord king of universe(central axis) knots between them giving birth to lord god Uchchaiskhravas the horse of the astral has 7 Heads thus creating the mixed waters where Ganga and Shantanu are Melee and interact Ananta Shesha makes them creator and from them gives birth to matter particles and antiparticles. The architecture inside the waters of the universe is Vishvakarman it is an aspect of him, what he is in the waters, with Shiva and Adi-Shakti using the knowledge lorddess goddess Vidhya creat the creative intelligence of matter and antimatter such creating neurons and neural connections in the brain of the universe Shantanu the architecture Vishvakarman is modified so that with the birth of gravity then of the astral lord god Uchchaiskhravas Shantanu can shape Ganga and Ganga Shantanu the interaction between them becomes possible. Vishvakarman architecture is then transformed and Ganga obtains from Shantanu the power of gravitational attraction Sanat kumara a little that Ananta Shesha produces between each particle of matter in the waters above and Ganga in the waters mixed with Shantanu the omnisience of the universe Ananta Shesha then knots in Ganga in cluster of quantum matter that it agglutinates until the size of particles and antiparticles it is then Ganga that we see obtaining from Shantanu the faculty of being subjected to gravity and which reorganizes first of all in Spin particles and antiparticles then with the rebirth of the strong interaction Sanatana Kumara it is the power to bind more strongly the matter together in particles and antiparticles and the quarks are born then it is the weak nuclear interaction Sanaka Kumara and the electromagnetic interaction Sananda Ganga obtains the power to lose by its quarks gluon and to capture them in other quarks the quarks diversify and the leptons and antileptons are born and this during an expansion going from the size of a particle then the volume of an orange then that of our stellar system then 300 000/years/light/volume the quarks find themselves weakened by this expansion and combine into hadron while the first great amplification between quarks and antiquarks begins then the second between leptons and antileptons.

We celebrate the Waters of the universe the waters above lordless goddess Ganga where all types of matter take their source, and the waters below lord god Shantanu the brain of universe where all forms of active intelligence take their source. They create matter and antimatier. It is the very high king of the universe the snake creator and king of the universe Ananta Shesha who knots them together making them interact making their creators. They knot in Ganga becoming matter it knots in Shantanu creating new faculties becoming the gods. Let's celebrate the Waters of the universe the waters above lordless goddess Ganga where all types of matter take their source, and the waters below lord god Shantanu the brain of the universe where all forms of active intelligence take their source. They create matter and antimatier. It is the very high king of the universe the snake creator and king of the universe Ananta Shesha who knots them together making them interact making their creators. They knot in Ganga becoming matter it knots in Shantanu creating new faculties becoming the gods. Shiva and Adhi-Shakti use The knowledge lordless goddess Vidhya inside Shantanu the waters below give birth to the gods and goddesses, they create intelligence in the brain that is Shantanu a bit like creating the neural connections allowing intelligence in the brain thus making Shantanu becomes omniscient omnipotent and they shape Ganga. The grace of lordless goddess Vidhya the knowledge, they create the creative omniscience of matter and antimatier Holi spirit lord god Varuna who is then the intelligence of Shantanu to create matter and antimatier then when they create Maharishi this one makes gravity reborn and from the top of the waters above Ganga Indra made Ganga descend the waters above to the level of the waters below using Airavata the elephant god of Indra then lord god Uchchaihshravas is reborn the manifestation of the Astral energy which connects the waters above to the waters below making it possible for Shantanu to act on Ganga and vice versa. Shantanu then interacts with Ganga with his creative intelligence Varuna he transforms a part of what she is into matter and antimatier this interaction is possible only by the grace of Uchchaihshravas. Varuni is reborn with Gravity she is the holy spirit creative power of matter and antimatier the active power of Varuna it is she who accomplishes the transformation under the action of Ganga reacting to gravity, quantum matter agglutinate as cluster of quarks. Brane becoming bigger and bigger until becoming particles or antiparticles, the volume begins to expand and the temperature Agni drops becoming favorable to the creation of matter. Varuni reborn and then uses Tvashtri the creative accretion with Kartikeya will the forces of vitality of combativeness, and Sanat Kumara gravity accompanied by the gods of love Kama Rati and y desire Kamakhya agglutinating the quantum matter in clusters bigger and bigger until it becomes particles and antiparticles : Spin quarks leptons and hadrons is then been created that way Ganga receiving specific power from Shantanu with the rebirth of gravity Sanata Kumara then strong nuclear interaction Sanatananta then weak nuclear Sanaka Sanand and electromagnetic Sananda, but the explosion of the universe tired the quarks energy as the hadron combination of quarks start the 1st big annihilation between quarks and antiquarks start making photon light particles burning lord god Brihaspati, then few after it is a big annihilation between leptons and antileptons at the end only a few part of matter survive and no more antimatier when the process creation of matter and antimatier is ended. Varuna is the intelligence creator made by Shiva inside Shantanu part of Shantanu used to create matter and antimatier and Varuni is the omnipotence creator of the matter and antimatier that come to transform Ganga acting through Ganga building particles and antiparticles this had become possible by the grace (beauty elegance kindness) of Uchchaihshravas the god of Astral that connect Water above Ganga to waters below Shantanu making possible to interact together interaction.

In another version, Bhasma asked Mojini to marry him. She explained that she would only marry a man who knew how to dance exactly like her. Bhasma agreed and began to imitate the goddess's dance, which lasted for several days. Mohini, seeing that her partner was only thinking about dancing, placed one hand on his chest and the other on his head; Bhashma did the same, forgetting Shiva's favor, and he was immediately reduced to ashes.

Finally, Shiva caught up with Mohini just as she was reverting to Vishnu. The two devas merged to form a new deity named Harihara. The destroyer of the symetrie between matter and antimatter

Vishnu took the form of Mohini and appeared before Bhasmasur. Mohini was so extremely beautiful that Bhasmasur immediately fell in love with Mohini (that's what years of austerity do to you). Bhasmasur asked her (Mohini) to marry him.

The 2 Gods associate to be vishnu manifested as 2 avatar Nara and Narayana just because lord God vishnu show by tantric méthode différent gods to his devots and then when he showed them they prefere to say it is Vishnu instead to accept what vishnu asked (to make those Gods worships in order to recognize their greatness and thanks them for their manifestation) are not the lord god Vishnu (Lakshmi Husband, netierh Nara nor Narayana are lakshmi husband) they are 2 lords Gods the lord god nara and the lord God Narayana (manifested long before any avatar could born part of the divinity they are , n earth living as human avatar with humans) they take place in the ocean of Milk story of the creation. \$ we can clearly ear about them from the starting of the process Creator of mater, antimater and light (when indra make heavens Water coming down which symbolize the end of unification of basic interaction the temperature start to cool down. and then we fin them during all the process creator of mater and antimater under the blessing of varuna creator of mater antimater and light from Rahu heads cut (the first cycle of creation /anihilation and untill this process end (with Mohini and Basmazura when basmasura dye symboleof the end of anihilation between mater and anti mater rest no more antimater but only mater before the moleculare combination moment of the creation of Terre (moleculare aspect of the universe under the blessing of lord God Vidhi and then with the creation of sky aspect non moleculare of the universe (Dhatri); they can easy be contemplate inside the reality of kartikeya which is non-dualiste the Asura as the Gods tae expression of kartiyea's reality " the fighting tendencies of the universe to grow up) they are presented in the group of Gods (side mater fighting against side antimater presented as risk of destruction of any capacity to creat a threatened aspect of the reality. but the story of ocean of milk invit also to contemplate them out he moment of the creation of first galaxies with Diti(because they are descript as iller of many of Diti's children and this come on the creation of first Galaxies;

Varuna Varuni with the moon

The abundance vera laksmi is increasing with the phases of creation and decrease during the ahnilation and recombination phases

Thus the quarks and the leptons emerge and grow in quantity it is Rahu Lakshmi who emerge from Goddess Chandra New Moon Lakshmi who reaches his climax by a maximum quantity of quarks (and antiquarks) in God Chandra Full Moon LAKSMI then this abundance decreases Essentially by recombination and annihilations is Ketu Decreasing moon lakshmi

thus comes by recombination the Hadrons and the fermions they are born and because it is made of quarks the quantity of quark alone decreases the ahnilation quother ant quarks and no longer finish having quarks or antiquarks alone for them the decay of their Abundance Ketu Lakshmi to the only state until Goddess black moon goddess who expresses end of cycle More quarks lakshmi quark disappears giving way to Lakshmi Hadron Fermion and Lepton

Then this emergence is Goddess Chandra New Moon Lakshmi becoming Rahu Increasing Moon Lakshmi then reached are apoged in God Chandra Full Moon Lakshmi then this one falls by the process of ahnilation (there is not yet a decombination which gives birth to the Molecules God Vidhi) but c 'Is Ketu lakshmi until their quantity stabilizes at the end of Hadron-Antihadron Goddess Chandra Old Moon LAKSMI who ends in Goddess Chandra Black Moon Lakshmi who is the end of the cycle and waiting for a new cycle This time either with Varuna and Varuni but with Viddhi then Ankariksa and Dhatri

Veera Lakshmi is the Global Abundance actif in this phase and she is made of cycles of increasing and cycles of decreasing starting and ending together inside of her reality this Abundance participate to the process creator she's agissante power

Celebrate the Lord God (Ishvara Deva) Agni

The manifestation of the calorific element

Who Renaises With Bindu and Reached SA Maximum Power 10^{32} K

The hottest stars in the universe are at a temperature of the order of 20,000 to 50 000 K for the one who transmit a blue light the average white light goes up to 10,000 k those as our sun are about 5 to 6,000 k and the most "cold" are at 3,000 K

At Bindu Agni Reed 10^{32} K is $2e + 27$ hotter than hot stars !!

It forbids by its strength any creation of particles and antiparticles these are Rudra Kali Indra Kushmananda and Kama among others who will get progressively from AGNI that he authorizes the process of creation by increasing

Celebrate the Big Bang phase creation of all matter and antimatter in the cosmos with the moon, black moon Lorddes goddess Chandra,

It is the end of the process of matter and antimatter burning the creator of the universe and his agissante power holy spirit lord god Varuna and holy spirit lordness goddess Varuni stop their activitate in the universe cause the temperature became too low since the starting of the process temperature was hot was lord god Agni Agni 10^{32} K and it is now 10^{13} K the cosmo is allways hot ! but no more enough to allow the process of matter and antimatter burning Varuna and Varuni fro Living ghana(actif int he universe) return to living Spirit (no more actif in the universe)until the next Big Bang.

End of this part
